- MICHIGAN
- MINNESOTA
- MISSOURI
- MONTANA
- NEBRASKA
- NORTH DAKOTA
- OHIO
- SOUTH DAKOTA
- WISCONSIN
- WYOMING

The price for each plant and size listed in the *Eligible Plant List and Plant Price Schedule* is your lowest wholesale price, as determined from your wholesale catalogs or price lists submitted in accordance with the Special Provisions, not to exceed the maximum price limits included in this Schedule. Insurable plants damaged prior to the attachment of insurance coverage will be insured at a reduced value until such plants have fully recovered from damage.

INTRODUCTION

The Eligible Plant List and Plant Price Schedule are parts of the nursery crop insurance program provided by the Federal Crop Insurance Corporation (FCIC), an agency of the United States Department of Agriculture (USDA).

The Eligible Plant List and Plant Price Schedule are used to:

1. Determine the eligibility of nursery plants for insurance.
2. Assist in estimating nursery plant inventory value.
3. Determine the cold protection requirements in accordance with the Nursery Crop Insurance Provisions.
4. Assist in establishing Field market value A and Field market value B for claim settlement in accordance with the Nursery Crop Insurance Provisions.

The following provides important information regarding the use of the Eligible Plant List.

CROP INSURANCE NOMENCLATURE FORMAT

Consistent use of plant names is key to the administration of the nursery crop insurance program. The Eligible Plant List and Plant Price Schedule use researched plant names taken from the *DataScape Guide to Commercial Nomenclature* and contain four forms of plant names defined as follows:

Botanical Name	The Latin, scientific, or legal form of a plant name. Parts of the name may be genus, specific epithet (species), subspecies, variety, and cultivar.
Commercial Botanical Name	The botanical form of a plant name (often including trademarked and/or registered cultivar names) used in commerce.
Common Name	The name by which a plant may be known in everyday commerce.
Invalid Botanical Name	A Latinized form of a plant name, which is incorrectly used to identify a plant.

Plants are sometimes sold commercially by a different name from the botanical name. In some cases, that name is one that taxonomists consider outdated or incorrect. In other cases, the name is one that is more often used in commercial trade. If such conditions are present, these invalid botanical names and commercial botanical names are listed with a “see” notation that points to the correct botanical name (e.g. *Acer x freemanii* ‘Autumn Blaze’ is followed by the statement, “See – *Acer x freemanii* ‘Jeffersred’ which is the correct botanical name).

DETERMINING ELIGIBLE PLANT LIST PRICE OF UNLISTED CULTIVARS

The Eligible Plant List (EPL) provides, for applicable plant genera, a stair-step approach for establishing insurable prices of **cultivars** not listed on the EPL at the genus, species, hybrid, subspecies, and variety taxonomic levels.

- A genus level name (e.g., *Rhododendron*) is always listed on the EPL if any cultivars are listed under the genus (e.g., *Rhododendron* ‘1000 Butterflies’). The genus level name may be used to price a new cultivar that is marketed as a genus/cultivar name without listing a species name.
- A genus/species name (e.g., *Acer rubrum*) is always listed on the EPL if any cultivars are listed under the species (e.g., *Acer rubrum* ‘Autumn Flame’). The genus/species name may be used to price a new cultivar that is marketed with the genus/species name.
- A genus/hybrid name (e.g., *Acer x freemanii*) is always listed if any cultivars are listed under the genus/hybrid name (e.g., *Acer x freemanii* ‘Armstrong’). The genus/hybrid name may be used to price a new cultivar that is marketed with the genus/hybrid name.
- A genus/species/subspecies (e.g., *Cedrus libani* ssp. *atlantica*) or variety name (e.g., *Acer palmatum* var. *dissectum*) is always listed if any cultivars are listed under the subspecies (e.g., *Cedrus libani* ssp. *atlantica* ‘Aurea’) or variety name (e.g., *Acer palmatum* var. *dissectum* ‘Garnet’). The genus/species/subspecies or variety name may be used to price a new cultivar that is marketed with the genus/species/subspecies or variety name.

The example below illustrates how a new, unlisted cultivar ('XX') should be priced on the EPL:

<u>Name not found on the EPL</u>	<u>Name to use on EPL for pricing</u>
<i>Rhododendron</i> ‘XX’	<i>Rhododendron</i>
<i>Acer rubrum</i> ‘XX’	<i>Acer rubrum</i>
<i>Acer x freemanii</i> ‘XX’	<i>Acer x freemanii</i>
<i>Cedrus libani</i> ssp. <i>atlantica</i> ‘XX’	<i>Cedrus libani</i> ssp. <i>atlantica</i>
<i>Acer palmatum</i> var. <i>dissectum</i> ‘XX’	<i>Acer palmatum</i> var. <i>dissectum</i>

This pricing order must be followed for unlisted cultivars. For example, a genus level price should not be used if the botanical name of the unlisted plant includes a species name that is listed on the EPL, nor should the species level price be used if the botanical name includes a subspecies or variety name that is listed on the EPL. Likewise, if the cultivar name of a plant is listed on the EPL, the price for that plant should always be determined at the correct taxonomic level based on the plant name.

PLANT TYPES

All plant material is classified in one of the plant types shown below. For administering the nursery crop insurance program, plants will carry a designation contained in this list:

<u>Code</u>	<u>Description</u>
AN	Annuals
BE	Broadleaf Evergreen Trees
BS	Broadleaf Evergreen Shrubs
CE	Coniferous Evergreen Trees
CS	Coniferous Evergreen Shrubs
DS	Deciduous Shrubs
DT	Deciduous Trees (Shade and Flower)
FN	Fruit and Nut Trees
FO	Foliage
GC	Ground Cover and Vines
HP	Herbaceous Perennials
PC	Palms and Cycads
RO	Roses
SF	Small Fruits
LI	Liners

See the definition of “Liners” in the Plant Size section of this document. Liners are reported as a separate plant type, inclusive of all other plant types.

STORAGE KEYS

Some container plants require cold protection to retain insurance coverage against cold damage. The cold protection requirements are listed on the Eligible Plant List for each insurable container plant through the use of the storage key (SK) code. Storage key code specifications are detailed in Appendix B.

HARDINESS ZONE DESIGNATIONS

All counties are assigned a single hardiness zone (HZ) designation for insurance purposes. These assignments are listed in Appendix A and affect the insurability for both container and field grown material.

CONTAINER INSURABLE HARDINESS ZONES

Container plant insurability is limited to the hardness zone (HZ) or range of hardness zones specified. These zones are listed under "Req" (requiring cold protection) and "Not Req" (not requiring cold protection).

Hardiness zone (HZ) insurability, container example:

Insurable HZ	
<u>Req</u>	<u>Not Req</u>
2 – 6	7 – 8

The plant is insurable in zones 2-8 and is not insurable in hardness zones 1 and 9-11.

FIELD GROWN MINIMUM HARDINESS ZONES

The Eligible Plant List designates the minimum hardness zone for each insurable field grown plant. Field grown plant material is not insurable below the minimum hardness zone specified for each plant.

Hardiness zone (HZ) insurability, field grown example:

<u>Minimum Field HZ</u>
5

The plant is insurable in zones 5-11 and is not insurable in hardness zones 1-4.

PLANT SIZE

All eligible plants are considered either field grown or container grown material with sizes listed for each category (practice).

Field grown plants are listed by plant size for height, width, or caliper. Caliper is determined by measuring tree diameter 6 inches above the soil line up to and including a caliper of 4 inches and 12 inches above the soil line for larger sizes. Plant sizes below the smallest listed in the Base Price Table are not insurable.

A seedling size is available for two plant types: deciduous tree (DT) and coniferous evergreen tree (CE). A seedling is a DT or CE that is at least 6 inches high and less than 18 inches high. Rounding is not permitted.

Plants in containers where the diameter is 3 inches or greater at the widest point of the container interior are listed by the container size with volume units of measure (e.g. quart, gallon). No plant sizes (height, width, or caliper) are listed for plant material in containers. Each cell of insurable multiple-cell nursery containers (cellpacks, jumbo packs, six packs, pony packs, etc.) will be valued as a separate plant. Container size is measured by actual volume in gallons as specified in the Special Provisions. Use the worksheet shown in Appendix D to calculate container gallon size if the plant inventory

container size is unknown. The worksheet includes formulas for both round and square (rectangular) containers.

Liners in containers (trays with individual cells) are insurable. Liners are defined as plants produced in standard nursery containers that are equal to or greater than 1 inch in diameter (including trays containing 200 or fewer individual cells, unless specifically provided by the Special Provisions) but less than 3 inches in diameter at the widest point of the container or cell interior, have an established root system reaching the sides of the containers, are able to maintain a firm root ball when lifted from the containers, and meet all other conditions specified in the Special Provisions. Liners are listed by the number of cells per tray. Each cell will be valued as a separate plant. Equivalency measurements for liners in individual containers are listed in the Base Price Tables.

Container or liner sizes below the smallest size listed in the Base Price Table are not insurable.

SOFTWARE AVAILABILITY

The Eligible Plant List and Plant Price Schedule are available on compact disk (CD) for use on personal computers. The software is a Windows application and allows:

1. Searching for a plant by botanical name, commercial botanical name, common name, or key word. The multiple search function is designed to assist those who may not be familiar with scientific plant nomenclature.
2. Compiling a plant inventory list for estimating nursery inventory value. The program allows the plant inventory list to be printed as shown in the following example.

Please note that the CD containing the application program is intended to provide convenient access to eligible plant information and help estimate the nursery plant inventory value. The CD is not required for processing insurance coverage.

SYSTEM REQUIREMENTS

Minimum:

Pentium 233 CPU or better
64 MB RAM or more
Windows 95, Windows 98, Windows 2000, Windows NT or Windows XP
32 MB available disk space or more
Video resolution of 800 x 600
256 color display

Recommended:

Pentium 500 CPU or better
128 MB RAM or more
Windows 2000, Windows NT or Windows XP
32 MB available disk space or more
Video resolution of 800 x 600
True Color (24-bit) color display

SAMPLE CROP INVENTORY VALUATION ESTIMATE

A sample of the Crop Inventory Valuation Estimate that is produced by the software is shown on the following three pages.

For plants with prior damage, enter the reduced plant value.

The plant prices that will be used in settling any claims will be the lower of the FCIC maximum price limit or your lowest wholesale price as calculated from your wholesale catalog or price list submitted in accordance with the Special Provisions. Insurable plants damaged prior to the attachment of insurance coverage will be insured at a reduced value until such plants have fully recovered from damage.

* denotes price from grower wholesale catalog, price list, or a reduced plant value for plants with prior damage

INSURANCE PRICE CALCULATION

Eligible plant insurance prices are based on:

Plant Type
Practice (container/field grown)
Measurement Method

The two growing practices involve four different plant size measurement methods:

<u>Container</u>	<u>Field Grown</u>
Volume (gal.) - 3" diameter or more	Caliper (in.)
Cells/tray - 1" to <3" diameter (liners)	High/Wide (in. or ft.)

Included in this section are the Base Price Tables for each of the plant types showing a base price for each eligible size and practice (container and field).

The main body of this document, titled "Eligible Plant List and Plant Price Schedule" (EPLPPS), shows a factor for each eligible plant name and valid measurement method. The container factor will be used for liners as well as for containers that measure 3 inches in diameter or more at the widest point.

The insurance price for each plant size is the grower's lowest wholesale catalog price (from catalogs or price lists submitted in accordance with the Special Provisions) not to exceed the maximum price calculated by multiplying the plant factor on the EPLPPS for the plant by the base price on the Base Price Table for that plant type and measurement method. Insurable plants damaged prior to the attachment of insurance coverage will be insured at a reduced value until such plants have fully recovered from damage.

EXAMPLES OF INSURANCE PRICE CALCULATION:

A grower wants to insure his Autumn Blaze maples (*Acer x freemanii* ‘Jeffersred’). Examples of price calculations for each measurement method follow.

PRICE CALCULATION EXAMPLE – CONTAINER

Plant Name: *Acer x freemanii* ‘Jeffersred’

Plant Type: DT
(from Eligible Plant List)

Size: 5 gal.

Measurement Method: Container/Liner Caliper High/Wide

Factor: 1.07
(from Eligible Plant List)

Base Price: \$ 18.00

Calculation of Max. Price:

$$\frac{\$ 18.00}{\text{Base Price}} \times \frac{1.07}{\text{Factor}} = \frac{\$ 19.26}{\text{Max. Price}}$$

Insurance Price: Lesser of Max. Price or Grower Lowest Wholesale Price

$$\frac{\$ 19.26}{\text{Max. Price}} \quad \frac{\$ 23.50}{\text{Grower Lowest Wholesale Price}}$$

Insurance price is \$ 19.26 in this example.

PRICE CALCULATION EXAMPLE – LINER

Plant Name: *Acer x freemanii* ‘Jeffersred’

Plant Type: DT
(from Eligible Plant List)

Size: 37–71/Tray

Measurement Method: Container/Liner Caliper High/Wide

Factor: 1.07
(from Eligible Plant List)

Base Price: \$.72

Calculation of Max. Price:

$$\frac{\$.72}{\text{Base Price}} \times \frac{1.07}{\text{Factor}} = \frac{\$.77}{\text{Max. Price}}$$

Insurance Price: Lesser of Max. Price or Grower Lowest Wholesale Price

$$\frac{\$.77}{\text{Max. Price}} \quad \frac{\$.85}{\text{Grower Lowest Wholesale Price}}$$

Insurance price is \$.77 in this example.

PRICE CALCULATION EXAMPLE – CALIPER

Plant Name: Acer x freemanii ‘Jeffersred’

Plant Type: DT
(from Eligible Plant List)

Size: 3 "

Measurement Method: Container/Liner Caliper X High/Wide

Factor: 1.13
(from Eligible Plant List)

Base Price: \$ 174.00

Calculation of Max. Price:

$$\frac{\$ 174.00}{\text{Base Price}} \times \frac{1.13}{\text{Factor}} = \frac{\$ 196.62}{\text{Max. Price}}$$

Insurance Price: Lesser of Max. Price or Grower Lowest Wholesale Price

$$\frac{\$ 196.62}{\text{Max. Price}} \quad \frac{\$ 165.00}{\text{Grower Lowest Wholesale Price}}$$

Insurance price is \$ 165.00 in this example.

PRICE CALCULATION EXAMPLE – HIGH/WIDE

Plant Name: Acer x freemanii ‘Jeffersred’

Plant Type: DT
(from Eligible Plant List)

Size: 5 ft.

Measurement Method: Container/Liner Caliper High/Wide X

Factor: 1.32
(from Eligible Plant List)

Base Price: \$ 44.00

Calculation of Max. Price:

$$\frac{\$ 44.00}{\text{Base Price}} \times \frac{1.32}{\text{Factor}} = \frac{\$ 58.08}{\text{Max. Price}}$$

Insurance Price: Lesser of Max. Price or Grower Lowest Wholesale Price

$$\frac{\$ 58.08}{\text{Max. Price}} \quad \frac{\$ 42.00}{\text{Grower Lowest Wholesale Price}}$$

Insurance price is \$ 42.00 in this example.

2006 and Succeeding Crop Years Eligible Plant List and Plant Price Schedule

Annuals (AN)

STORAGE KEY G1

Woody plants (plant types): BE, BS, CE, CS, DS, DT, FN, GC, PC, RO, SF
(For reference purposes only. Use of this storage key is not limited to the listed plant types.)

Hardiness Zones 1-6

Storage, such as:

1. Poly covered walk-in Quonset House with functional irrigation and
 - a. Supplemental heat or
 - b. Poly liners or
 - c. Thermo blankets.
2. Storage barns or buildings proven satisfactory in previous seasons.

Hardiness Zones 7-8

Storage, such as:

1. Poly covered walk-in Quonset Houses or
2. Low Hoop Houses or
3. Pit frames covered with poly or
4. Outside beds covered with thermo blankets or poly.

Hardiness Zones 9-10

Storage, such as:

1. Overhead irrigation with sprinklers capable of providing complete coverage of the crop throughout the duration of cold temperatures or
2. Plastic film covered structures without heat or overhead irrigation or
3. Plants covered with thermo blankets or poly during periods of cold temperature. Over-sized containerized plants (plants that are too large) should be laid on their side prior to covering.

NOTE: If wind conditions prevent effective use of overhead irrigation, either strategy #2 or #3 must be followed.

NOTE: The storage temperature must be established to prevent above freezing low temperature damage to the species being produced, including protection from dry, desiccating winds, either by covering the plants, use of overhead irrigation, or wind blocks.

Hardiness Zone 11

Storage, such as:

1. Overhead irrigation with sprinklers capable of providing complete coverage of the crop throughout the duration of cold temperatures or
2. Plants covered with thermo blankets or poly during periods of cold temperature. Over-sized containerized plants (plants that are too large) should be laid on their side prior to covering.

STORAGE KEY G2

Woody plants (plant types): BE, BS, CE, CS, DS, DT, FN, GC, PC, RO, SF
(For reference purposes only. Use of this storage key is not limited to the listed plant types.)

Note: If other than white or clear poly is used to cover plants for cold protection, it must be removed prior to sun exposure the following day.

Hardiness Zones 1-6

Storage, such as:

1. Poly covered walk-in Quonset Houses or
2. Low Hoop Houses or
3. Pit frames covered with poly or
4. Outside beds covered with thermo blankets or poly.

Hardiness Zones 7-8

Storage, such as:

1. Overhead irrigation with sprinklers capable of providing complete coverage of the crop throughout the duration of cold temperatures or
2. Plastic film covered structures without heat or overhead irrigation or
3. Plants covered with thermo blankets or poly during periods of cold temperature. Over-sized containerized plants (plants that are too large) should be laid on their side prior to covering.

Hardiness Zones 9-10

Storage, such as:

Plants covered with thermo blankets or poly during periods of cold temperature. Over-sized containerized plants (plants that are too large) should be laid on their side prior to covering.

Hardiness Zone 11

No cold protection required.

STORAGE KEY G3

Foliage (plant types): FO, PC

(For reference purposes only. Use of this storage key is not limited to the listed plant types.)

Hardiness Zones 1-9A

Plants to be stored in a greenhouse, covered with glass or plastic film, equipped with irrigation and a heating system.

Hardiness Zones 9B-10A

Plants to be stored in a greenhouse or a shadehouse covered with plastic film during the cold season and equipped with irrigation and a heating system, or a below bench and/or aisle irrigation system capable of maintaining the air temperature around the plants above critical minimums for the crops grown (minimum water temperature for heating purposes: 70° F).

Hardiness Zones 10B-11

Plants to be stored in a shadehouse covered with plastic film during the cold season and equipped with irrigation system.

STORAGE KEY G4

Herbaceous (plant types): AN, GC, HP, SF

(For reference purposes only. Use of this storage key is not limited to the listed plant types.)

Hardiness Zones 1-6

Storage, such as:

1. Glass, fiberglass, polycarbonate or poly covered greenhouse with supplemental heat and irrigation or
2. Poly covered structures plus supplemental heat with overhead irrigation from sprinklers or mist or
3. Poly covered structures with irrigation.

Hardiness Zones 7-8

Storage, such as:

1. Poly covered structures plus supplemental heat with overhead irrigation from sprinklers or mist or
2. Poly covered structures with irrigation.

Hardiness Zones 9-10A

Storage, such as:

1. Poly covered structures with supplemental heat and irrigation or
2. Poly covered structures with irrigation or
3. Outside beds covered with thermal blankets during periods of cold weather.

Hardiness Zones 10B-11

Overhead irrigation from sprinklers.

STORAGE KEY R1

Hardiness Zones 1-8

Storage, such as:

1. Glass or poly greenhouses with supplemental heat and irrigation or
2. Pot-in-Pot with adequate drainage to prevent water-logging and excess salt accumulation.

STORAGE KEY R2

Hardiness Zones 1-8

Storage structures, such as glass or poly greenhouses with supplemental heat and irrigation.

STORAGE KEY S1

Alaska Hardiness Zones 2-3

Containers standing or laid on their side; containers mulched with 6-10 inches of straw, hay, leaves, evergreen boughs, or wood chips from the top of the container, mulch material covered with netting or floating row cover to hold mulch in place, if necessary, or

Containers/B&B set in trench and backfilled with soil, straw, hay or leaves.

NOTE: Rodent proofing required.

Hardiness Zones 1-6

Mandatory cold protection level 1 (Winter Long Protection)

Storage, such as:

1. Co-poly (white preferred) covered walk-in Quonset House and poly liners
or
2. Thermal blankets covered with poly or
3. Supplemental heat.

Hardiness Zones 7-8

Mandatory cold protection level 2 (Winter Long Protection)

Storage, such as:

1. Co-poly (white preferred) covered walk-in Quonset House or
2. Co-poly (white preferred) covered Hoop House or
3. Structureless storage, such as: Outside beds covered with thermal blankets laminated or overlaid with white co-poly (white required).

STORAGE KEY S2

Mandatory cold protection level 1 (Winter Long Protection)

Storage, such as:

1. Co-poly (white preferred) covered walk-in Quonset House and poly liners
or
2. Thermal blankets covered with poly or
3. Supplemental heat.

STORAGE KEY S3

Mandatory cold protection level 2 (Winter Long Protection)

Storage, such as:

1. Co-poly (white preferred) covered walk-in Quonset House or
2. Co-poly (white preferred) covered Hoop House or
3. Structureless storage, such as: Outside beds covered with thermal blankets laminated or overlaid with white co-poly (white required).

STORAGE KEY S4

Hardiness Zones 1-6

Mandatory cold protection level 1 (Winter Long Protection)

Storage structures, such as controlled environment greenhouses.

Hardiness Zones 7-8

Mandatory cold protection level 2 (Winter Long Protection)

Storage, such as:

1. Co-poly (white preferred) covered walk-in Quonset House or
2. Co-poly (white preferred) covered Hoop House or
3. Structureless storage, such as: Outside beds covered with thermal blankets laminated or overlaid with white co-poly (white required).

STORAGE KEY S5

Mandatory cold protection level 1 (Winter Long Protection)

Storage structures, such as controlled environment greenhouses.

STORAGE KEY NR

No cold protection required.

STORAGE KEY XX

The "XX" code does not communicate any information regarding storage requirements. Rather, it is used in situations where it is necessary to communicate that field grown material is insurable and container material is not insurable.

INSURANCE PRICE CALCULATION WORKSHEET

SAMPLE FOR REPRODUCTION

Plant Name: _____

Plant Type: _____
(from Eligible Plant List)

Size: _____

Measurement Method: Container/Liner Caliper High/Wide

Factor: _____
(from Eligible Plant List)

Base Price: _____
(from Base Price Table for Plant Type)

Calculation of Max. Price:

$$\frac{\text{Base Price}}{\text{Factor}} = \text{Max. Price}$$

Insurance Price: Lesser of Max. Price or Grower Lowest Wholesale Price

Max. Price _____ Grower Lowest Wholesale Price _____

CONTAINER VOLUME CALCULATION WORKSHEET

Round container volume calculation:

Calculate radius R_1 and R_2 in inches using diameter D_1 and D_2 in inches:

$$R_1 \text{ (inches)} = D_1 \div 2$$

$$R_2 \text{ (inches)} = D_2 \div 2$$

Calculate volume in gallons using R_1 , R_2 and H in inches:

$$\text{Volume (gallons)} = \frac{3.1416 (H \div 3) [(R_1 \times R_1) + (R_1 \times R_2) + (R_2 \times R_2)]}{231}$$

Note: Measurements for D_1 , D_2 and H should be taken inside the container.

Square/rectangular container volume calculation:

Calculate top (Y) and bottom (Z) area in square inches using T_1 , T_2 , B_1 , and B_2 in inches:

$$Y \text{ (square inches)} = T_1 \times T_2$$

$$Z \text{ (square inches)} = B_1 \times B_2$$

Calculate volume in gallons using Y and Z in square inches and H in inches:

$$\text{Volume (gallons)} = \frac{(H \div 3)(Y + Z + \sqrt{Y \times Z})}{231}$$

Note: Measurements for T_1 , T_2 , B_1 , B_2 and H should be taken inside the container.

FCIC CONTAINER DEFINITIONS
