INSURANCE CORPORATION**

**ELIGIBLE PLANT LIST AND PLANT PRICE SCHEDULE**

## **NURSERY CROP INSURANCE PROGRAM**

- NEW MEXICO
- OKLAHOMA
- TEXAS

The price for each plant and size listed in the *Eligible Plant List and Plant Price Schedule* is your lowest wholesale price, as determined from your wholesale catalogs or price lists submitted in accordance with the Special Provisions, not to exceed the maximum price limits included in this Schedule. Insurable plants damaged prior to the attachment of insurance coverage will be insured at a reduced value until such plants have fully recovered from damage.

## INTRODUCTION

---

The Eligible Plant List and Plant Price Schedule are parts of the nursery crop insurance program provided by the Federal Crop Insurance Corporation (FCIC), an agency of the United States Department of Agriculture (USDA).

The Eligible Plant List and Plant Price Schedule are used to:

1. Determine the eligibility of nursery plants for insurance.
2. Assist in estimating nursery plant inventory value.
3. Determine the cold protection requirements in accordance with the Nursery Crop Insurance Provisions.
4. Assist in establishing Field market value A and Field market value B for claim settlement in accordance with the Nursery Crop Insurance Provisions.

The following provides important information regarding the use of the Eligible Plant List.

### **NURSERY GROWER'S PRICE ENDORSEMENT – PILOT PROGRAM**

Growers in eligible states who elect the Pilot Nursery Grower's Price Endorsement may insure for a price that is higher than the Eligible Plant List maximum insurance price but less than or equal to their catalog/price list price. This pilot program is only available to growers in the following states at the current time:

|             |                |                |
|-------------|----------------|----------------|
| Alabama     | Maryland       | Pennsylvania   |
| Arkansas    | Massachusetts  | South Carolina |
| Connecticut | Mississippi    | Tennessee      |
| Florida     | New Jersey     | Virginia       |
| Georgia     | New York       | Washington     |
| Kentucky    | North Carolina |                |
| Louisiana   | Oregon         |                |

### **CROP INSURANCE NOMENCLATURE FORMAT**

Consistent use of plant names is key to the administration of the nursery crop insurance program. The Eligible Plant List and Plant Price Schedule use researched plant names taken from the *DataScape Guide to Commercial Nomenclature* and contain four forms of plant names defined as follows:

|                |  |
|----------------|--|
| Botanical Name | The Latin, scientific, or legal form of a plant name. Parts of the name may be genus, specific epithet (species), subspecies, variety, and cultivar. |
|----------------|--|

|                           |   |
|---------------------------|---|
| Commercial Botanical Name | The botanical form of a plant name (often including trademarked and/or registered cultivar names) used in commerce. |
| Common Name               | The name by which a plant may be known in everyday commerce.  |
| Invalid Botanical Name    | A Latinized form of a plant name, which is incorrectly used to identify a plant.                                    |

Plants are sometimes sold commercially by a different name from the botanical name. In some cases, that name is one that taxonomists consider outdated or incorrect. In other cases, the name is one that is more often used in commercial trade. If such conditions are present, these invalid botanical names and commercial botanical names are listed with a “see” notation that points to the correct botanical name (e.g. *Acer x freemanii* ‘Autumn Blaze’ is followed by the statement, “See – *Acer x freemanii* ‘Jeffersred’ which is the correct botanical name).

## DETERMINING ELIGIBLE PLANT LIST PRICE OF UNLISTED CULTIVARS

The Eligible Plant List (EPL) provides, for applicable plant genera, a stair-step approach for establishing insurable prices of **cultivars** not listed on the EPL at the genus, species, hybrid, subspecies, and variety taxonomic levels.

- A genus level name (e.g., *Rhododendron*) is always listed on the EPL if any cultivars are listed under the genus (e.g., *Rhododendron* ‘1000 Butterflies’). The genus level name may be used to price a new cultivar that is marketed as a genus/cultivar name without listing a species name.
- A genus/species name (e.g., *Acer rubrum*) is always listed on the EPL if any cultivars are listed under the species (e.g., *Acer rubrum* ‘Autumn Flame’). The genus/species name may be used to price a new cultivar that is marketed with the genus/species name.
- A genus/hybrid name (e.g., *Acer x freemanii*) is always listed if any cultivars are listed under the genus/hybrid name (e.g., *Acer x freemanii* ‘Armstrong’). The genus/hybrid name may be used to price a new cultivar that is marketed with the genus/hybrid name.
- A genus/species/subspecies (e.g., *Cedrus libani* ssp. *atlantica*) or variety name (e.g., *Acer palmatum* var. *dissectum*) is always listed if any cultivars are listed under the subspecies (e.g., *Cedrus libani* ssp. *atlantica* ‘Aurea’) or variety name (e.g., *Acer palmatum* var. *dissectum* ‘Garnet’). The genus/species/subspecies or variety name may be used to price a new cultivar that is marketed with the genus/species/subspecies or variety name.

The example below illustrates how a new, unlisted cultivar ('XX') should be priced on the EPL:

| <u>Name not found on the EPL</u>         | <u>Name to use on EPL for pricing</u> |
|--|---------------------------------------|
| <i>Rhododendron 'XX'</i>                 | <i>Rhododendron</i>                   |
| <i>Acer rubrum 'XX'</i>                  | <i>Acer rubrum</i>                    |
| <i>Acer x freemanii 'XX'</i>             | <i>Acer x freemanii</i>               |
| <i>Cedrus libani ssp. atlantica 'XX'</i> | <i>Cedrus libani ssp. atlantica</i>   |
| <i>Acer palmatum var. dissectum 'XX'</i> | <i>Acer palmatum var. dissectum</i>   |

This pricing order must be followed for unlisted cultivars. For example, a genus level price should not be used if the botanical name of the unlisted plant includes a species name that is listed on the EPL, nor should the species level price be used if the botanical name includes a subspecies or variety name that is listed on the EPL. Likewise, if the cultivar name of a plant is listed on the EPL, the price for that plant should always be determined at the correct taxonomic level based on the plant name.

## PLANT TYPES

All plant material is classified in one of the plant types shown below. For administering the nursery crop insurance program, plants will carry a designation contained in this list:

| <u>Code</u> | <u>Description</u>                  |
|-------------|-------------------------------------|
| AN          | Annuals                             |
| BE          | Broadleaf Evergreen Trees           |
| BS          | Broadleaf Evergreen Shrubs          |
| CE          | Coniferous Evergreen Trees          |
| CS          | Coniferous Evergreen Shrubs         |
| DS          | Deciduous Shrubs                    |
| DT          | Deciduous Trees (Shade and Flower)* |
| FN          | Fruit and Nut Trees                 |
| FO          | Foliage                             |
| GC          | Ground Cover and Vines              |
| HP          | Herbaceous Perennials               |
| PC          | Palms and Cycads                    |
| RO          | Roses                               |
| SF          | Small Fruits                        |
| LI          | Liners**                            |

\*The Deciduous Trees plant type includes deciduous conifer trees.

\*\*See the definition of "Liners" in the Plant Size section of this document. Liners are reported as a separate plant type, inclusive of all other plant types.

## **STORAGE KEYS**

Some container plants require cold protection to retain insurance coverage against cold damage. The cold protection requirements are listed on the Eligible Plant List for each insurable container plant through the use of the storage key (SK) code. Storage key code specifications are detailed in Appendix B.

## **HARDINESS ZONE DESIGNATIONS**

All counties are assigned a single hardness zone (HZ) designation for insurance purposes. These assignments are listed in Appendix A and affect the insurability for both container and field grown material.

## **CONTAINER INSURABLE HARDINESS ZONES**

Container plant insurability is limited to the hardness zone (HZ) or range of hardness zones specified. These zones are listed under “Req” (requiring cold protection) and “Not Req” (not requiring cold protection).

Hardiness zone (HZ) insurability, container example:

| Insurable HZ |                |
|--------------|----------------|
| <u>Req</u>   | <u>Not Req</u> |
| 2 – 6        | 7 – 8          |

The plant is insurable in zones 2-8 and is not insurable in hardness zones 1 and 9-11.

## **FIELD GROWN MINIMUM HARDINESS ZONES**

The Eligible Plant List designates the minimum hardness zone for each insurable field grown plant. Field grown plant material is not insurable below the minimum hardness zone specified for each plant.

Hardiness zone (HZ) insurability, field grown example:

| <u>Minimum Field HZ</u> |
|-------------------------|
| 5                       |

The plant is insurable in zones 5-11 and is not insurable in hardness zones 1-4.

## **PLANT SIZE**

All eligible plants are considered either field grown or container grown material with sizes listed for each category (practice).

Field grown plants are listed by plant size for height, width, or caliper. Caliper is determined by measuring tree diameter 6 inches above the soil line up to and including a caliper of 4 inches and 12 inches above the soil line for larger sizes. Plant sizes below the smallest listed in the Base Price Table are not insurable.

A seedling size is available for two plant types: deciduous tree (DT) and coniferous evergreen tree (CE). A seedling is a DT or CE that is at least 6 inches high and less than 18 inches high. Rounding is not permitted.

Plants in containers where the diameter is 3 inches or greater at the widest point of the container interior are listed by the container size with volume units of measure (e.g. quart, gallon). No plant sizes (height, width, or caliper) are listed for plant material in containers. Each cell of insurable multiple-cell nursery containers (cellpacks, jumbo packs, six packs, pony packs, etc.) will be valued as a separate plant. Container size is measured by actual volume in gallons as specified in the Special Provisions. Use the worksheet shown in Appendix D to calculate container gallon size if the plant inventory container size is unknown. The worksheet includes formulas for both round and square (rectangular) containers.

Liners in containers (trays with individual cells) are insurable. Liners are defined as plants produced in standard nursery containers that are equal to or greater than 1 inch in diameter (including trays containing 200 or fewer individual cells, unless specifically provided by the Special Provisions) but less than 3 inches in diameter at the widest point of the container or cell interior, have an established root system reaching the sides of the containers, are able to maintain a firm root ball when lifted from the containers, and meet all other conditions specified in the Special Provisions. Liners are listed by the number of cells per tray. Each cell will be valued as a separate plant.

Insurable prices for liners in individual cells are determined using the measurement method by which they are listed and priced in the insured's wholesale catalog or price list; i.e., size of the cell or cells per tray. Size of the cell is based on the inch diameter for round cells or the inch dimension of the longest side for square or rectangular cells. If both the inch and cells per tray measurement methods are listed and priced in the catalog, the inch measurement will take precedence. An equivalency table for the two measurement methods is included in each Base Price Table.

Container or liner sizes below the smallest size listed in the Base Price Table are not insurable.

---

## **SOFTWARE AVAILABILITY**

---

The Eligible Plant List and Plant Price Schedule are available on compact disk (CD) for use on personal computers. The software is a Windows application and allows:

1. Searching for a plant by botanical name, commercial botanical name, common name, or key word. The multiple search function is designed to assist those who may not be familiar with scientific plant nomenclature.
2. Compiling a plant inventory list for estimating nursery inventory value. The program allows the plant inventory list to be printed as shown in the following example.

Please note that the CD containing the application program is intended to provide convenient access to eligible plant information and help estimate the nursery plant inventory value. The CD is not required for processing insurance coverage.

## **SYSTEM REQUIREMENTS**

Minimum:

Pentium 233 CPU or better  
64 MB RAM or more  
Windows 95, Windows 98, Windows 2000, Windows NT or Windows XP  
32 MB available disk space or more  
Video resolution of 800 x 600  
256 color display

Recommended:

Pentium 500 CPU or better  
128 MB RAM or more  
Windows 2000, Windows NT or Windows XP  
32 MB available disk space or more  
Video resolution of 800 x 600  
True Color (24-bit) color display

## **SAMPLE CROP INVENTORY VALUATION ESTIMATE**

A sample of the Crop Inventory Valuation Estimate that is produced by the software is shown on the following three pages.

**Crop Inventory Valuation Estimate

4250

\$2,869.50

Container Total

5450

\$12,811.00

For this estimate to be accurate, you must enter your lowest wholesale price for each plant size, except for plants with prior damage. For plants with prior damage, enter the reduced plant value. If you have elected the NGPE and the plant price has no prior damage, you may enter a price less than or equal to your lowest wholesale catalog price.

The plant prices that will be used in settling any claims will be the lower of the FCIC maximum price limit or your lowest wholesale price as calculated from your wholesale catalog or price list submitted in accordance with the Special Provisions, unless the NGPE is selected in which case the upgraded plant price will be used (provided you have submitted sales records in accordance with the Nursery Grower's Price Endorsement and the upgraded plant price is less than or equal to the price on the sales records). Insurable plants damaged prior to the attachment of insurance coverage will be insured at a reduced value until such plants have fully recovered from damage.

\* denotes price from grower wholesale catalog, price list, or a reduced plant value for plants with prior damage

\*E denotes Nursery Grower's Price Endorsement upgraded plant price from the grower wholesale catalog or price list that is 50% or more over the EPL maximum insurance price.

\*e denotes Nursery Grower's Price Endorsement upgraded plant price from the grower wholesale catalog or price list that is less than 50% over the EPL maximum insurance price.

## INSURANCE PRICE CALCULATION

---

Eligible plant insurance prices are based on:

Plant Type  
Practice (container/field grown)  
Measurement Method

The two growing practices involve four different plant size measurement methods:

| <b><u>Container</u></b>                  | <b><u>Field Grown</u></b> |
|--|---------------------------|
| Volume (gal.) - 3" diameter or more      | Caliper (in.)             |
| Cells/tray - 1" to <3" diameter (liners) | High/Wide (in. or ft.)    |

Included in this section are the Base Price Tables for each of the plant types showing a base price for each eligible size and practice (container and field).

The main body of this document, titled "Eligible Plant List and Plant Price Schedule" (EPLPPS), shows a factor for each eligible plant name and valid measurement method. The container factor will be used for liners as well as for containers that measure 3 inches in diameter or more at the widest point.

The insurance price for each plant size is the grower's lowest wholesale catalog price (from catalogs or price lists submitted in accordance with the Special Provisions) not to exceed the maximum price calculated by multiplying the plant factor on the EPLPPS for the plant by the base price on the Base Price Table for that plant type and measurement method. Insurable plants damaged prior to the attachment of insurance coverage will be insured at a reduced value until such plants have fully recovered from damage.

## **EXAMPLES OF INSURANCE PRICE CALCULATION:**

A grower wants to insure his Autumn Blaze maples (*Acer x freemanii* ‘Jeffersred’). Examples of price calculations for each measurement method follow.

### **PRICE CALCULATION EXAMPLE – CONTAINER**

**Plant Name:** *Acer x freemanii* ‘Jeffersred’

**Plant Type:** DT  
(from Eligible Plant List)

**Size:** 5 gal.

**Measurement Method:** Container/Liner X Caliper \_\_\_\_\_ High/Wide \_\_\_\_\_

**Factor:** 1.13  
(from Eligible Plant List)

**Base Price:** \$ 18.50

**Calculation of Max. Price:**

$$\frac{\$ 18.50}{\text{Base Price}} \times \frac{1.13}{\text{Factor}} = \frac{\$ 20.91}{\text{Max. Price}}$$

**Insurance Price:** Lesser of Max. Price or Grower Lowest Wholesale Price

$$\frac{\$ 20.91}{\text{Max. Price}} \quad \frac{\$ 23.50}{\text{Grower Lowest Wholesale Price}}$$

Insurance price is \$ 20.91 in this example.

### **PRICE CALCULATION EXAMPLE – LINER**

**Plant Name:** *Acer x freemanii* ‘Jeffersred’

**Plant Type:** DT  
(from Eligible Plant List)

**Size:** 37–71/Tray

**Measurement Method:** Container/Liner X Caliper \_\_\_\_\_ High/Wide \_\_\_\_\_

**Factor:** 1.13  
(from Eligible Plant List)

**Base Price:** \$ .72

**Calculation of Max. Price:**

$$\frac{\$ .72}{\text{Base Price}} \times \frac{1.13}{\text{Factor}} = \frac{\$ .81}{\text{Max. Price}}$$

**Insurance Price:** Lesser of Max. Price or Grower Lowest Wholesale Price

$$\frac{\$ .81}{\text{Max. Price}} \quad \frac{\$ .85}{\text{Grower Lowest Wholesale Price}}$$

Insurance price is \$.81 in this example.

## **PRICE CALCULATION EXAMPLE – CALIPER**

**Plant Name:** Acer x freemanii ‘Jeffersred’

**Plant Type:** DT  
(from Eligible Plant List)

**Size:** 3 "

**Measurement Method:** Container/Liner       Caliper X High/Wide      

**Factor:** 1.13  
(from Eligible Plant List)      

**Base Price:** \$ 178.00

**Calculation of Max. Price:**

$$\frac{\$ 178.00}{\text{Base Price}} \times \frac{1.13}{\text{Factor}} = \$ 201.14$$

**Insurance Price:** Lesser of Max. Price or Grower Lowest Wholesale Price

$$\frac{\$ 201.14}{\text{Max. Price}} \quad \frac{\$ 165.00}{\text{Grower Lowest Wholesale Price}}$$

Insurance price is \$ 165.00 in this example.

## **PRICE CALCULATION EXAMPLE – HIGH/WIDE**

**Plant Name:** Acer x freemanii ‘Jeffersred’

**Plant Type:** DT  
(from Eligible Plant List)

**Size:** 5 ft.

**Measurement Method:** Container/Liner       Caliper       High/Wide X

**Factor:** 1.31  
(from Eligible Plant List)      

**Base Price:** \$ 47.00

**Calculation of Max. Price:**

$$\frac{\$ 47.00}{\text{Base Price}} \times \frac{1.31}{\text{Factor}} = \$ 61.57$$

**Insurance Price:** Lesser of Max. Price or Grower Lowest Wholesale Price

$$\frac{\$ 61.57}{\text{Max. Price}} \quad \frac{\$ 52.00}{\text{Grower Lowest Wholesale Price}}$$

Insurance price is \$ 52.00 in this example.

## 2007 and Succeeding Crop Years Eligible Plant List and Plant Price Schedule

---

### Base Price Table - Annuals (AN)

The Base Price Tables are used to calculate the maximum insurable prices as described in the Insurance Price Calculation section.

Insurable prices for liners in individual cells are determined using the measurement method by which they are listed and priced in the insured's wholesale catalog or price list; i.e., size of the cell or cells per tray. Size of the cell is based on the inch diameter for round cells or the inch dimension of the longest side for square or rectangular cells. If both the inch and cells per tray measurement methods are listed and priced in the catalog, the inch measurement method will take precedence. An equivalency table for the two measurement methods is shown below.

| Container   |       | Field Grown |       |      |           |
|-------------|-------|-------------|-------|------|-----------|
| Size        | Price | Caliper     |       | Size | High/Wide |
|             |       | Size        | Price | Size | Price     |
| 72-200/tray | 0.31  |             |       |      |           |
| 37-71/tray  | 0.47  |             |       |      |           |
| <3"-36/tray | 0.65  |             |       |      |           |
| Pot         | 0.80  |             |       |      |           |
| 1 Qt.       | 1.20  |             |       |      |           |
| 2 Qt.       | 1.80  |             |       |      |           |
| 1 Gal.      | 3.10  |             |       |      |           |
| 2 Gal.      | 5.50  |             |       |      |           |
| 3 Gal.      | 7.80  |             |       |      |           |
| 5 Gal. & up | 11.50 |             |       |      |           |

\* Equivalence    72-200/tray    qualified liners < 2" diameter, square side, or longest rectangular side  
                    37-71/tray    2" to < 2-3/8" diameter, square side, or longest rectangular side  
                    <3"-36/tray    2-3/8" to < 3" diameter, square side, or longest rectangular side

**Base Price Table - Coniferous Evergreen Trees (CE)**

The Base Price Tables are used to calculate the maximum insurable prices as described in the Insurance Price Calculation section.

Insurable prices for liners in individual cells are determined using the measurement method by which they are listed and priced in the insured's wholesale catalog or price list; i.e., size of the cell or cells per tray. Size of the cell is based on the inch diameter for round cells or the inch dimension of the longest side for square or rectangular cells. If both the inch and cells per tray measurement methods are listed and priced in the catalog, the inch measurement method will take precedence. An equivalency table for the two measurement methods is shown below.

| <b>Container</b> |              | <b>Caliper</b> |              | <b>Field Grown</b> |              |

**Base Price Table - Deciduous Trees (DT)**

The Base Price Tables are used to calculate the maximum insurable prices as described in the Insurance Price Calculation section.

Insurable prices for liners in individual cells are determined using the measurement method by which they are listed and priced in the insured's wholesale catalog or price list; i.e., size of the cell or cells per tray. Size of the cell is based on the inch diameter for round cells or the inch dimension of the longest side for square or rectangular cells. If both the inch and cells per tray measurement methods are listed and priced in the catalog, the inch measurement method will take precedence. An equivalency table for the two measurement methods is shown below.

| Container   |        | Caliper    |        | Field Grown |        |
|-------------|--------|------------|--------|-------------|--------|
| Size        | Price  | Size       | Price  | Size        | Price  |
| 72-200/tray | 0.62   | 7/16 in.   | 7.60   | Seedling    | 0.36   |
| 37-71/tray  | 0.72   | 1/2 in.    | 9.20   | 18 in.      | 8.30   |
| <3"-36/tray | 0.96   | 5/8 in.    | 11.00  | 21 in.      | 10.50  |

**Base Price Table - Ground Cover and Vines (GC)**

The Base Price Tables are used to calculate the maximum insurable prices as described in the Insurance Price Calculation section.

Insurable prices for liners in individual cells are determined using the measurement method by which they are listed and priced in the insured's wholesale catalog or price list; i.e., size of the cell or cells per tray. Size of the cell is based on the inch diameter for round cells or the inch dimension of the longest side for square or rectangular cells. If both the inch and cells per tray measurement methods are listed and priced in the catalog, the inch measurement method will take precedence. An equivalency table for the two measurement methods is shown below.

| Container   |       | Caliper |       | Field Grown |       |
|-------------|-------|---------|-------|-------------|-------|
| Size        | Price | Size    | Price | Size        | Price |
| 72-200/tray | 0.48  |         |       | 6 in.       | 5.80  |
| 37-71/tray  | 0.72  |         |       | 8 in.       | 6.30  |
