CROP PROVISIONS - COTTON

FEDERAL CROP INSURANCE CORPORATION

CROP PROVISIONS - COTTON

1. Definitions

Harvest - Removal of the seed cotton from the stalk.
NASS yield - The yield calculated by dividing the NASS estimate of the production of cotton in the county by the NASS estimate of the acres of cotton, for each type and practice contained in the Actuarial Table. The Actuarial Table states whether harvested or planted acres of cotton are used to establish the expected county yield and calculate indemnities.
Planted acreage - Land in which the cotton seed has been placed by a machine appropriate for the insured crop and planting method, at the correct depth, into a seedbed that has been properly prepared for the planting method and production practice.

2. Crop Insured

The insured crop will be all cotton:
 (a) Grown on insurable acreage in the county or counties listed in the accepted application;
 (b) Properly planted and reported by the acreage reporting date;
 (c) Planted with the intent to be harvested; and
 (d) Not colored lint cotton planted into an established grass or legume, interplanted with another spring planted crop, grown on acreage where hay was harvested in the same calendar year unless irrigated, grown on acreage where a small grain crop reached the heading stage unless irrigated.

3. Payment

(a) A payment will not be made unless your trigger yield is less than the payment yield for the insured crop year.
 (b) Payment yields will be determined prior to July 16 following the crop year.
 (c) We will issue any payment to you prior to the August 16 immediately following our determination of the payment yield.
 (d) The payment is equal to the payment calculation factor multiplied by your policy protection for each insured crop practice and type specified in the Actuarial Table.
 (e) The payment will not be revised even though the NASS yield may be subsequently revised.

4. Program Dates

STATE AND COUNTY	CANCELLATION AND TERMINATION DATES	CONTRACT CHANGE DATE
