**Notes:**

Key field is: Crop Commodity Code (field 1), Insurance Plan Code (field 2).

Key fields with Level of Change = 2 requiring a change to that field, company will use an administrative screen to identify this change. eDAS will use this information to verify the data when submitted.

Information regarding column headers:

1) ‘Tag’ identifies the naming convention used in creation of XML.
2) ‘Key’ identifies the tags that are key to the validation/storage of data.
3) ‘Level of Change’ identifies the data that’s allowed to change and at what level according to Change Flag.
4) ‘IN/OUT’ identifies the direction of data, IN for input and OUT for output with flags ‘N’ (NO) and ‘Y’ (YES).
5) ‘REQ/OPT/CON’ identifies if the data is required (REQ), optional (OPT), or conditional (CON), if optional or conditional and there’s no data to report the tag is not used.
6) ‘Max Size’ is the maximum size of data allowed for that tag.
7) ‘Picture’ identifies the type of data expected.
8) ‘Description/Edit’ gives additional information.

On an update, only the key fields that define the sections are required plus any changed fields or new sections.
