INDEMNITY

“INDEMNITY” is the title of this section. It identifies the opening and closing of this xml section. This document provides additional reporting requirements of data under this section.

Crop Policy precedes Indemnity.

The process flag and/or change flag submitted for this section will be inherited unless otherwise indicated. Example: <Indemnity process flag = “2”>.

Reporting of Indemnity Detail information required for AGR-L (plan 61) and optional for AGR (plan 63).

CHANGE_FLAG (ATTRIBUTE)

If Process Flag = 2 or 5 certain data will be allowed to change after initial acceptance. Tags have been identified by flags below. Flag of ‘1’ will only be allowed to change data identified by ‘1’. Flag of ‘2’ will be allowed to change data identified by ‘1 or 2’. Flag of ‘3’ will be allowed to change any data.

Valid flags:
1 = general
2 = company approval
3 = RMA approval

Change flag will default to 2 unless otherwise indicated.

PROCESS_FLAG (ATTRIBUTE)

Valid flags:
1 = original
2 = modify
3 = delete
4 = validate (original)
5 = validate (modify)
6 = quote (only applicable for premium)
7 = retrieve
8 = cancel (not applicable for AGR/AGR-L)
9 = delete of a policy (& crop, if applicable) if no premium

Process flag will default to 1 unless otherwise indicated.

** <INDEMNITY_DETAIL> **

**End of commodity information at a detail level.**

Notes: Information regarding column headers:

1) ‘Tag’ identifies the naming convention used in creation of XML.
2) ‘Key’ identifies the tags that are key to the validation/storage of data.
3) ‘Level of Change’ identifies the data that’s allowed to change and at what level according to Change Flag.
4) ‘IN/OUT’ identifies the direction of data, IN for input and OUT for output with flags ‘N’ (NO) and ‘Y’ (YES).
5) ‘REQ/OPT/CON’ identifies if the data is required (REQ), optional (OPT), or conditional (CON), if optional or conditional and there’s no data to report the tag is not used.
6) ‘Max Size’ is the maximum size of data allowed for that tag.
7) ‘Picture’ identifies the type of data expected. If field identified with (+/-) then it’s a signed field. If negative symbol (-) is applicable it will appear at the beginning of the value. Example: 23.24 (value as positive) and -23.24 (value as negative).
8) ‘Description/Edit’ gives additional information.

On an update, only the key fields that define the sections are required plus any changed fields or new sections.
