If any total premium is less than $1, round to $1. For Peanuts, if field #45 is greater than zero, this field must be greater than zero. For CAT policies, do not include experience factor in the total premium calculation.
63	Subsidy	356	10	9(10)	Required; enter dollar amount of subsidy for the crop and insurance plan. If less than $1.00 round to $1.00. For CAT, subsidy must equal Total Premium. For Peanuts, if field #45 is greater than zero, this field must be greater than zero.
64	Additional Subsidy Flag	366	1	X(01)	Must be a space.
65	Additional Subsidy	367	10	9(10)	Zero fill.
66	State/Private Subsidy Flag	377	1	X(01)	Reserved. Must be a space.
67	State/Private Subsidy	378	10	9(10)	Reserved. Zero fill.
68	Producer Premium	388	10	9(10)	Edit according to producer premium calculations for the crop and insurance plan. This field is based on the CEO coverage level if elected. Cat coverage policies zero fill. For Peanuts, if field #45 is greater than zero, this field must be greater than zero.
69	Private Policy Code	398	3	X(03)	First three letters of a valid acronym for the type of reinsured private policy. Not applicable for Cat coverage policies. See Exhibit 11-14 for list of valid codes.

70	Zero Acre Flag	401	1	X(01)	A = Number of Florida Fruit Trees uninsurable for ACC coverage. I = Total Insurable Acres of Pasture, Rangeland and Forage (PRF) for the crop in the county in which the insured has a share, by plan code, crop code and type code. This should be very similar to a zero acreage report. Z = Zero County Acres – insured crop not planted in the entire county (only one T-11 for the crop/county) X = Zero Unit Acres – insured crop not planted in an entire unit (only one T-11 for the crop/county/unit; can have planted acres on different units) U = Uninsured Acres – planted to the insured crop, but not insurable (can have records with planted acres), or Number of uninsurable Florida Fruit Trees (can have records with insurable Florida Fruit Trees) N = No History Acres – never planted Blanks = This is a regular acreage report. See Exhibit 11-1 (pg.6) for Reporting Requirements.
71	Seed Company Code	402	3	9(03)	If the crop is Hybrid Sorghum Seed (0050) or Hybrid Corn Seed (0062), edit with the seed company table; Otherwise, zero fill.
72	Rate State	405	2	9(02)	Edit with the FIPS State table. See Notes.
73	Rate County	407	3	9(03)	Edit with the FIPS County table. See Notes.
74	Farm Serial Number	410	7	X(07)	Required for Peanuts, Burley Tobacco (0231) Plan 90 (with coverage flag of A, and Flu cured Tobacco (0229) Plan 90 in state 37 where the EU option is used. For Burley Tobacco each FSN must have a unique unit number. For all other crops and states this field is optional. If greater than spaces, must be left justified with no special characters or imbedded spaces. Must be spaces if no FSN is submitted.
75	Number of Sections	417	2	9(02)	Required for Revenue Assurance when Unit Option Code = EU(Enterprise Unit) or WU (Whole Farm). Enter the number of sections for the entire unit. Otherwise, zero fill.
76	Seed Cycle Code	419	1	X(01)	Internal Use. Companies must leave blank. DAS will determine the seed cycle for RMA reporting. Must be used to sum unit liability.
77	Insured's Acreage Report Signature Date	420	8	9(08)	Required. Format = MMDDCCYY. This date cannot be less than the Reinsurance Year – 1 or greater than the submission date.

78	Filler	428	2	X(02)	Must be spaces.
79	CEO Coverage Level	430	5	9(01)V9(04)	If CEO coverage is elected, enter CEO coverage level; must be greater than Coverage Level (field 34) . Used to determine premium. Zero fill if CEO option does not apply.
80	Agent's Signature Date	435	8	9(08)	Required. Format = MMDDCCYY. This date cannot be less than the Reinsurance Year – 1 or greater than the submission date.
81	Filler	443	5	X(05)	Must be spaces.
82	Proration Factor	448	3	9(01)V9(02)	For 2008 Florida Fruit Trees, the applicable proration factor for 2008 crop year by sub type, option code and map area, if applicable. See calculations in Exhibit 11-11. For 2008 crop year contracts, factor = factor for signature date + 45 days.
83	Filler	451	3	X(03)	Must be spaces.
84	Peanut Processing Flag	454	1	X(01)	Required for all peanut records except those using a single established price by unit/type/practice. For all other peanuts only must be: 'S' = single contract price by unit/type/practice 'M' = multiple prices by unit/type/practice If a UNIT has ALL non-contract peanuts (established price of $.19), then ALL records for that unit must have a "blank" flag. If a UNIT has ALL contracted peanuts with ONE contract price (NO non-contracted peanuts and total guarantee must equal contracted pounds), then ALL records for that unit must have an "S" flag. If a UNIT has MORE THAN ONE PRICE (non-contracted peanuts and one contract price or two contract prices, etc.), then ALL records for that unit must have an "M" flag. Else space

85	Rate Yield	455	10	9(08)V9(02)	Required. Continuous rating insurance plans 25, 44, 90, 92 and 96 rate yield will be used to determine base premium rate and must match rate yield on the record type 15. Rate yield does not have to match yield (field 31). Rate yield can be greater than zero or "zero". A rate yield of "zero" will be used to determine base premium rate, resulting in a higher rate (lower the yield, higher the rate). For Cotton and ELS Cotton, this must be the skip-row rate yield and match the converted rate yield on the record type 15 (record type 15, Rate Yield * skip-row factor). Non-continuous rating insurance plans 41, 42, 45, 46 and 86 – rate yield must match rate yield on the T15 record. Insurance plan 55, rate yield must match yield (field 31). Non-continuous rating insurance plans 12, 13, 14, 40, 50, 51 and 73 – zero fill rate yield and yield (field 31). For Peanuts, if field #45 is greater than zero, this field must be greater than zero.
86	Residual Factor	465	4	9(01)V9(003)	Internal. DAS will store the residual factor used in calculation of total premium for plans 25 (RA), 44 (CRC) and 90 (APH). Company will not submit a value.
87	Land Location ID Type	469	1	X(01)	Required. Use "L" for Legal Description, "F" for FSA Farm Serial Number, "C" for Common Land Unit or "O" for Other. Not required for plan codes 12, 13, 14 and 73. "H" for Legal Descriptions within a high risk area designation. "V" for verified standard areas in partial high risk sections. Must be "H" if field 23 is not spaces.

Field No.	Field Name	Begin Pos	Size	Picture	Field Edits
88	Land Location	470	18	X(18)	If ID Type = "L", must be a valid Legal Description for the state/county with a format of SSS-TTTD-RRRD. Must be left justified with trailing spaces. If ID Type = "H"or "V", must be a valid Legal Description for the state/county with a format of SSS-TTTD-RRRD. Must be left justified with trailing spaces. If ID Type = "F", must be a valid FSA Farm Serial Number and left justified with trailing spaces. If ID Type = "C", must be a valid Common Land Unit number based on a valid FSA Farm Serial Number, Tract Number and Field Number. FSA FSN and Tract Number are both 7 bytes and must include leading zeros (i.e. 00015460000134); Field Number must be 4 bytes and include leading zeros if applicable and/or alpha-characters at the end, if applicable. if ID Type = "O", must be left justified with trailing spaces. If a legal description is within a section that contains a high risk land designation and field 23 is spaces, and field 87 is not a "V", a warning message will be issued unless field 26 is "HR" or "UC" and field 27 contains a valid written agreement number. See Exhibit 11-8 for High Risk Land Validation edits. See State/County Cross Reference File for reporting requirements for Legal Descriptions, Farm Serial Numbers, Common Land Units and Others. Not required for plan codes 12, 13, 14 and 73.

96	Modified Acreage Record Flag	502	2	9(02)	Required. This is to implement the 2005 Basic Provisions concerning allowable reasons to change the acreage report for a policy. If the reported unit total liability is more than $250 different than the value recorded 60 days after the acreage reporting date, a value greater than 00, representing the reason for the modification is required. If the unit total liability changes by any amount prior to 60 days after the acreage report date or if it changes by less than $250 after 60 days after acreage report date, this may be 00. 00 – Not Applicable 01 – Approved Modified Acreage record 02 – Liability Adjustment Factor (LAF) applies 03 – Misreported Information Factor (MIF) applies 04 – Both LAF and MIF apply 06 – Processing Correction 07 - Estimated Tonnage - Raisins 08 - Fall/Spring Unit
97	Unit Liability	504	10	9(10)	Required. This field contains the sum of the amounts reported in the Liability, (field 42), for the unit, reported in the transmission. If there are multiple T11 records for the unit with more than one seed cycle (Fall vs. Spring), this Total must be the same on all T11s for the unit with the same seed cycle. This Total will be used in the validation of the modified acreage record flag, (field 96). Seed cycle is identified for some crops by type (fall and spring) and for some crops by practice (fall, winter, spring, summer). If a crop has a fall and winter practice or type, they should be summed together or a spring and summer practice or type, they should be summed together.
98	Written Agreement Multi Year Flag	514	1	X(01)	Internal Use. Must be a space. Will be populated with Y, N or a space if there is no Written agreement.

116	FCIC Initially Accepted Batch	595	4	9(04)	RMA Internal Use. The sequential number identifying the file that was initially submitted by the AIP to FCIC/RMA and accepted by DAS.
117	Filler	599	1	X(01)	Internal Use.

* Data elements that must be accepted to meet timely reporting of an eligible crop insurance contract.

Notes:
The Type 11 record must contain a corresponding Type 15 record number (in field 16) if a yield record is required for the crop. The corresponding Type 15 record must match to the Type 11 on:
    Fields 2 thru 13, field 31 and field 82.

A matching Insurance in Force Record (Type 14) must exist for each crop policy.

Acreage will not be accepted by DAS more than 60 days prior to the earliest final planting date for the crop/type/practice in the county. This does not apply to California Sugar Beets (except counties 025, 035, 049, 089 & 093). This does not apply to Wheat and Barley in Idaho, Oregon and Washington.

Notes con't

Does not apply to Wheat if the type code = 011 or 997.

Rate State and Rate County can only be different from Location State and County if a written agreement is in effect.

If a producer has a Sheller contract, Peanut records will be reported for 2 primary reasons, 1) to report and calculate the Total Guarantee for the Unit, and 2) to report and calculate the Liability by price and Premium by rate for the Unit. These primary reasons will require the submission of two type 11 records, these are referred to as the total guarantee record and the liability/premium record. If there are variable conditions within the unit that require additional records, (ie late planting, prevented planting, type, practice or share), they will need a total guarantee and liability/premium record.

Total Premium for Peanuts is based on the Total Guarantee for Timely Planted Acres (not reduced for late or prevented planting). For Late and Prevented Planting situations, companies must report the appropriate amount of Contracted Pounds on the Liability/Premium records for the Timely Planted Total Guarantee so Total Premium can be calculated correctly. However, do not report contracted pounds that exceed the total guarantee for timely planted acres.
The above reporting requirements may apply to records with a peanut processing flag of "S" or "M".

1) For the Total Guarantee records, the companies will submit data for field numbers, 1-13, 18, 19, 20, 29, 30, 31, 34, 35, 36, 37, 38, 41, 58, 59, 74, 77, 80, 87, 88, 96, 97 and any other field that will affect the total guarantee. Even though Insured Share will not affect the total guarantee, if the share is different, it must be reported with the different acres for the share. All other fields must be "zero filled" or left "blank" on the total guarantee record.

2) For the Liability and Premium records, the companies will submit data for field numbers, 1-13, 18, 19, 23, 26, 27, 28, 33, 34, 38(for non-contracted pounds, if applicable), 39, 40(for contract pounds only), 41, 42, 43, 45, 46, 48, 49, 51, 52, 57, 62, 63, 68, 72, 73, 85, 89, 96, 97, and any other field that will affect the liability or premium. All other fields must be "zero filled" or left "blank" on the liability/premium record.

Organic Option
If crop is being insured as Organic by a Written Agreement do not report the organic code in the common option field.

If crop is being insured as Organic and does not need a written agreement, then report the applicable Common Option code (OT = Organic Transitional acreage and OC = Organic Certified acreage).

CIMS Process
This option will provide the current year's (2007 only) crop and acreage information, all crop and acreage information from FSA Compliance database which matches the CLU information identified on the RMA DAS acreage Type 11 record, and all crop and acreage information that matches the insured crop and county identified on the RMA DAS acreage Type 11 record.
