1 - 25 DAYS LATE = 1% per day

## MALTING BARLEY DAS EDIT REQUIREMENTS

Malting Barley is NOT eligible for the 60% (YA option code) yield adjustment

Malting Barley T11 records must have an option code of "MA" or "MB" in the Common Option Codes (field 49) for all plan codes except 42 (IP). For 42 (IP), "MA" or "MB" must be in the Rate Class Option Codes (field 50).

### **"MA" option code**

DISCONTINUE reporting duplicated Feed Barley databases for Malting Barley with an Option Code of "MA". ALL Type 15 Barley (0091) records submitted with an Option Code of "MA" must contain actual Malting Barley production data for option "A" only. If the insured must use his Feed Barley approved yield for his Malting Barley, option A approved yield, then the "T15 Record Number", field 19, on the T11 record MUST reference the CORRECT T15 Feed Barley record.

The yield on the Malting Barley T-11 record must be equal to the Approved yield on the corresponding T-15 record ("T-15 Record Number", field 19 on T-11 record).

Malt Barley must have at least one Feed Barley T-11 and one Feed Barley T-15 record.

The 'MA' option code goes in the Common Option Code field; except for IP (plan 42), it is a Rate Class Option

The 'MA' option requires a T-11 record with a corresponding T-15 record

The "MA" option must have at least 4 years of actual yields to qualify for the option.

There are no yield limitations on the T-15 record with the "MA" option (no cups, floors or substitutions)

The yield limitation flag must be a '4' with the "MA" option

The approved yield on the Malt Barley T-15 must be equal to or less than the Approved yield on the Feed Barley T-15.

The yield on the Malt Barley T-11 record must be equal to or less than the Approved yield on the corresponding Malt Barley T-15 record.

Malt Barley T-15 records will have a lag year (database will have at least 2007, 2006, 2005 and 2004 and prior).

Do NOT duplicate Feed Barley T-15 records for Malt Barley if the Malt Barley approved yield is greater than the Feed Barley approved yield. On the T-11 Malt Barley record, refer back to the applicable feed barley record.

**“MB” option code**

The “MB” option has a T-11 record but does not have a corresponding T-15 record with the “MB” option.

The Malt Barley T-11 record must contain the T-15 record number of a corresponding Feed Barley T-15 record.

The yield on the ‘MB’ Malt Barley T-11 record must be equal to or less than the Approved yield on the corresponding Feed Barley T-15.

**Summer Fallow/Continuous Cropping Rule**

**DISCONTINUE reporting duplicated Continuous Cropping (004) databases with a Summer Fallow (005) practice (SF/CC Rule). ALL Type 15 records submitted with a SF (005) practice must contain actual Summer Fallow data only. If the insured qualifies to use his CC (004) approved yield for his SF (005) practice, then the “T15 Record Number”, field 19, on the T11 record MUST reference the CORRECT T15 CC (004) record. T-yields, yield limitations and substitutions will apply appropriately by practice.**

If the Practice (field 12) on the Type 11 record is 005 (Summer Fallow), then do NOT match Unit Number, Type or Practice on the Type 15 record (Type 15 Record Number-field 19).

## DAS 'ZERO Acreage Reporting Requirements'

- A** You must submit a T-10, T-11, T-14 and T-17. Number of Florida Fruit Trees uninsurable for ACC coverage. Submit required data for fields 2 thru 10, 15, 18, 33 (number of trees) and 70 on the T-11 record. The T-11 record will match to the T-14 on fields 2 thru 9. Data is required for the following fields; field 20 (Agent SSN), field 77 (Insured's Signature Date), field 80 (Agent Signature Date), field 87(Land Location ID Type), field 88 (Land Location), and fields 90 thru 95 (Common Information data). There can be multiple 'A' records for the Crop/County by Block or Unit. An 'A' record can have 'insurable tree' records with it for the Crop/County.
- C** You must submit a T-10, T-11 and T-14. Nationwide Total Insurable Colonies for Apiculture by plan code (13 or 14) in which the insured has a share. **Only allowable for crop 1191.** Submit data for fields 2 thru 11 and fields 18, 20(Agent SSN), 37 (reported colonies) & 70 on the T-11. Unit number must be zeros. **Grid ID must be zero filled.** The T-11 will match to the T-14 on fields 2 thru 9 and 11.
- I** You must submit a T-10, T-11 and T-14. Total Insurable Acres of Pasture, Rangeland and Forage (PRF) for the crop in the county in which the insured has a share, by plan code, crop code and type code. Submit data for fields 2 thru 11 and fields 16, 18, 20(Agent SSN), 37 (reported acres) & 70 on the T-11. Unit number must be zeros. The T-11 will match to the T-14 on fields 2 thru 9 and 11.
- OR**  
You must submit a T-10, T-11 and T-14. Total Insurable Colonies for Apiculture for the crop in the county in which the insured has a share, by plan code, crop code and type code. Submit data for fields 2 thru 11 and fields 16, 18, 20(Agent SSN), 37 (reported colonies) & 70 on the T-11. Unit number must be zeros. The T-11 will match to the T-14 on fields 2 thru 9 and 11.
- Z** You must submit a T-10, T-11, T-14, T-15 and T-17. Submit data for fields 2 thru 9 and fields 18, 37 (reported acres) & 70 on the T-11 (type & practice are required for CA & AZ Grapes and they must match the T-14) The T-11 will match to the T-14 on fields 2 thru 9. Data is required for the following fields; field 20 (Agent SSN), field 77 (Insured's Signature Date), field 80 (Agent Signature Date). Only one 'Z' record for the Crop/County is allowed (no planted acres allowed with a 'Z' record). For Grapes (CA & AZ) there can be one 'Z' record for each T-14 (by type). The following fields are allowed if there is a Written Agreement (WA) on zero acreage: field 26 (WA type), field 27 (WA number), field 28 (WA flag), field 72 (Rate State) and field 73 (Rate County). For Oysters (0115), only one 'Z' record for the Crop/County.
- X** You must submit a T-10, T-11, T-14, T-15 (as required) and T-17. Submit data in fields 2 thru 10, 18, 19 (if a T-15 is required), 37 (reported acres) & 70 Type & Practice are optional, but if submitted must match to the T-14. Match the T-11 to the T-14 on fields 2 thru 9, and Type/Practice if submitted. Data is required for the following fields; field 20 (Agent SSN), field 77(Insured's Signature Date), field 80 (Agent Signature Date). Only one "X" record is allowed for the Crop/County/Unit. (No planted acres for the unit allowed with an "X" record – Other units may have planted acres) If the Crop = 0053 or 0052 (in CA & AZ) there can be "X" records for units for different T-14 types. For Dry Beans (0047) & Dry Peas (0067), if there are multiple T-14 records for a crop/county by type, there can be "X" records by unit for each type. If the Plan code = 12, 40, 50 (for Nursery 0073 only), 51, 55 or 73 then fields 2 thru 10 will contain data and field 19 will contain zeros. No T-15 is required for these plans. If the Plan code = 12, 50 (for Nursery 0073 only), 43, or 73 do not look for a T-17 record. The following fields are allowed if there is a Written Agreement (WA) on zero acreage: field 26 (WA type), field 27 (WA number), field 28 (WA flag), field 72 (Rate State) and field 73 (Rate County).

**DAS 'ZERO Acreage Reporting Requirements'(continued)**

- U** You must submit a T-10, T-14, T-11. A T-15 and a T-17 record as required.  
Submit required data for fields 2 thru 10, 18, 19 (if a T15 is required), 37 (reported acres) & 70 on the T-11 record.  
The T-11 record will match to the T-14 on fields 2 thru 9.  
Data is required for the following fields; field 20 (Agent SSN), field 29 (Date Planted), field 77 (Insured's Signature Date), field 80 (Agent Signature Date), field 87(Land Location ID Type), field 88 (Land Location), and fields 90 thru 95 (Common Information data)  
There can be multiple 'U' records for the Crop/County by Unit.  
A 'U' record can have planted acre records with it for the Crop/County.
- OR**
- You must submit a T-10, T-14, T-11.  
Submit required data for fields 2 thru 10, 18, 37 (reported acres) & 70 on the T-11 record.  
The T-11 record will match to the T-14 on fields 2 thru 9.  
Data is required for the following fields; field 20 (Agent SSN), field 29 (Date Planted), field 77 (Insured's Signature Date), field 80 (Agent Signature Date), field 87(Land Location ID Type), field 88 (Land Location), and fields 90 thru 95 (Common Information data)
- N** You must submit a T-10, T-11, and T-14.  
You must submit data for fields 2 thru 10, 20 (Agent SSN), 37 (reported acres), & 70 on the T-11.  
The T-11 will match to the T-14 on fields 2 thru 9.  
No planted acres records are allowed with an 'N' record.  
The following fields are allowed if there is a Written Agreement (WA) on zero acreage: field 26 (WA type), field 27 (WA number), field 28 (WA flag), field 72 (Rate State) and field 73 (Rate County).

**WRITTEN AGREEMENT EDITS & DAS VALIDATIONS****A. WRITTEN AGREEMENT PROCESSING FLAGS****VALUES = H, P, R, W, 3, RC, RT, NC, NT**

**R** IF THE WRITTEN AGREEMENT FLAG EQUALS 'R' DAS WILL VALIDATE 'RATES', 'DATES' AND 'PRICES' WITH THE ADM FOR THE RATE STATE/COUNTY. THE RATE STATE/COUNTY MUST BE THE REFERENCE COUNTY ON THE WRITTEN AGREEMENT. For purposes of Late Sales Reduction and Fund Designation, DAS will use the later of the company submitted written agreement date (for RMA Issued Written Agreements only) or the ADM date to determine cutoff dates.

**P** WRITTEN AGREEMENT FOR MACADAMIA TREES TO ALLOW FOR AN INCREASE IN THE DOLLAR AMOUNT OF INSURANCE. SEE GENERAL STATEMENT ON FCI-35 FOR SPECIFIC DETAILS. The crop code must be equal to macadamia trees. For purposes of Late Sales Reduction and Fund Designation, DAS will use the later of the company submitted written agreement date (for RMA Issued Written Agreements only) or the ADM date to determine cutoff dates.

**W** IF THE WRITTEN AGREEMENT FLAG EQUALS 'W' DAS WILL ACCEPT THE DATA SUBMITTED ON THE TYPE 11 RECORD FOR 'DATES', 'PRICES', AND 'RATES'. THE RMA Regional Office WILL BE ASKED TO VALIDATE THE USE OF THIS CODE. DAS will perform an ADM lookup for Dates for SRA requirements for both the location state/county and rate state/county. If a match is found, DAS will use the later of the written agreement date or the date found in the lookup to establish the applicable cutoff dates for FD, and LSR.

**3** A flag of "3" does not represent an RMA or company issued written agreement. This flag should be transmitted if the FCI-33 (rules page, map, supplement) provides a rate. IF THE WRITTEN AGREEMENTFLAG EQUALS '3' DAS WILL ACCEPT THE BASE PREMIUM RATE SUBMITTED ON THE TYPE 11 RECORD AND USE IT TO CALCULATE THE PREMIUM. The written agreement type must equal "33" and the written agreement date must equal zeros. DAS has an exception for plan 25 (RA), see B1(next page).

**H** For High Risk Land. Use with Type "HR". The Written Agreement changes the rate/factor. For all plan codes. For purposes of LSR and FD for RMA Issued Written Agreements , DAS will use the later of the company submitted written agreement date or the ADM date to determine cutoff dates.

**RC** For Certified Organic Acreage with a location or reference county. Written Agreement Type must equal "OC". For purposes of LSR and FD for RMA Issued Written Agreements, DAS will use the later of the company submitted written agreement date or the ADM date to determine cutoff dates.

**RT** For Transitional Acreage with a location or reference county. Written Agreement Type must equal "OC". For purposes of LSR and FD for RMA Issued Written Agreements, DAS will use the later of the company submitted written agreement date or the ADM date to determine cutoff dates.

**NC** For Certified Organic Acreage with no reference county. Written Agreement Type must equal "OC". DAS will perform an ADM lookup for Dates for SRA requirements for both the location state/county and rate state/county. If a match is found, DAS will use the later of the written agreement date or the date found in the lookup to establish the applicable cutoff dates for FD, and LSR.

**NT** For Transitional Acreage with no reference county. Written Agreement Type must equal "OC". DAS will perform an ADM lookup for Dates for SRA requirements for both the location state/county and rate state/county. If a match is found, DAS will use the later of the written agreement date or the date found in the lookup to establish the applicable cutoff dates for FD, and LSR.

## **B. Written Agreement Processing Notes**

1. For **Revenue Assurance** (RA) only written agreement for "rate" is allowed. Crop/type/practice must be offered in the state and county of insurance. Current flags of 'H, R & 3' are used with exceptions. Valid combinations are: flag = 3 and types = 33, HR, NB, SM & UC; flag = R and types = HR, NB, SM & UC; flag = H and type = HR. The rate is used for the APH part of the RA calculation and the Regional Office should NOT issue a written agreement for actual RA rate. Not applicable for Record 21. A Written Agreement flag of "W" may be used in processing the Record 15.

2. N/A

3. **DAS WILL VALIDATE TO THE RMA REGIONAL OFFICE WRITTEN AGREEMENT DATABASE/ISAM** For the following fields: Insurance Provider, Location State, Location County, Crop, Written Agreement Number, Written Agreement Type, and Written Agreement Date.

4. **Written Agreement Date.** The company transmitted written agreement date should reflect the RMA print date for written agreements with no insured signature required. For written agreements requiring the insured's signature (ie. Acceptance of the written agreement), companies should transmit the date of the insured's signature. DAS will validate the company transmitted written agreement date to the RMA Regional office database. The RMA Regional Office database will contain a flag identifying those written agreements requiring an insured's signature. (signature flag equal "Y") If a signature is required, DAS will edit to ensure that the company transmitted written agreement date is less than or equal to the RMA Regional Office written agreement expiration date. If the RMA Regional Office database contains a flag stating that NO insured signature is required (signature flag equal "N"), DAS will edit the company transmitted written agreement date to the RMA Regional office database print date, if the dates do not match, the company transmitted record & related records will be rejected.

5. **RMA Regional Office Issued Written Agreement Numbers:** The first 3 digits of the written agreement number represent the applicable RMA regional office that issued the written agreement. DAS will ensure that the code transmitted by the company begins with 001 through 010.

001 - Raleigh, NC  
 002 - Valdosta, GA  
 003 - Jackson, MS  
 004 - Springfield, IL  
 005 - St. Paul, MN  
 006 - Billings, MT  
 007 - Topeka, KS  
 008 - Oklahoma City, OK  
 009 - Davis, CA  
 010 - Spokane, WA

DAS will edit to ensure that the first 3 digits indicating the RMA Regional office are valid for the location state/county of the written agreement.

001 - Valid States: CT, DE, ME, MD, MA, NH, NJ, NY, NC, PA, RI, VT, VA,  
 WV  
 002 - Valid States: AL, FL, GA, SC  
 003 - Valid States: AR, KY, LA, MS, TN  
 004 - Valid States: IL, IN, MI, OH  
 005 - Valid States: IA, MN, WI  
 006 - Valid States: MT, ND, SD, WY  
 007 - Valid States: CO, KS, MO, NE  
 008 - Valid States: NM, OK, TX  
 009 - Valid States: AZ, CA, HI, NV, UT  
 010 - Valid States: AK, ID, OR, WA

6. **Written Agreement Types** must be valid in accordance with the Crop Insurance Handbook (CIH). DAS will edit the company transmitted written agreement type to ensure it is valid. Below are the valid written agreement types for DAS processing and associated edits:

**DAS Reporting Codes by Type of Written Agreement (written agreement type):**

- (a) **(GP)** Group Risk Plan Insurance (GRP/GRIP) Used for Hybrid Grain Sorghum, Hybrid Corn Seed, Popcorn, Sweet Corn and any other specialty Corn or Grain Sorghum. **Plan code must be 12 or 73.**
- (b) **(HR)** High-Risk Land. Use to change the rate on high-risk land.
- (c) **(NB)** New Ground Breaking. Use for land that has not been planted and harvested in one of the three previous crop years.
- (d) **(NL)** Nursery Plant List. Use for unrated Nursery plant materials. Crop code must equal nursery **(0073)**, **plan code 50.**
- (e) **(OC)** Organic Written Agreement
- (f) **(OP)** Unrated Rate Class Option
- (g) **(PE)** Policy Amendments. Use code whenever a written agreement amends the terms of insurance provided in the insurance policy if specifically permitted by the crop policy, endorsement, or crop provision.

**6. Written Agreement Types (continued)**

- (h) **(RE)** Rotation Exceptions. Use code where provided for by the Special Provisions.
- (i) **(SC)** Special Purpose Corn. Crop code must equal corn **(0041)**.
- (j) **(SG)** Small Grains or crops where provided for in the Crop Provisions.
- (k) **(SM)** Strip Mined Land.
- (l) **(SP)** Seed Potato. Use code when seed potato acreage is greater than 125% of past average acres. Crop code must equal potatoes **(0084)**.
- (m) **(TC)** Crop code must equal corn **(0041)**. Non-irrigated Corn Grain in counties that have only irrigated Corn.
- (n) **(TD)** Dry Beans, crop code must be **0047. Undesignated insurance classes (types) of Dry Beans on ADM.**
- (o) **(TP)** Unrated practice, type or variety.
- (p) **(UA)** Written Unit Agreement.
- (q) **(UC)** Unrated land. Acreage designated unrated, unclassified, or uninsurable. Use code to classify the land as either high risk or standard APH.
- (r) **(XC)** County with no actuarial documents for the crop. Use code when there is a crop program available, but no rates are published in the county.

## HIGH RISK LAND VALIDATION EDIT

### METHODOLOGY

The High Risk Land Validation Edit file, (HRLAND09.ZIP), is used to validate the Map Area's on the Digital FCI-33 Actuarial Maps by reported legal descriptions. The Edit uses State & County FIPS, Crop/Type/Practice codes, Insurance Plan codes, Land Id's and a Status Code. The Edit is created by taking all the Shapefiles that have been filed for the 2009 crop year that are in areas with Public Land Survey Sections (PLSS) and Merging those files together. The merged shapefile now has a 100-foot buffer applied to each polygon to extend the outside of the polygon by 100 feet. A buffer is used because if the RMA Shapefile does not follow the PLSS lines exactly, then the section will not be considered 'Completely' within the polygon from the RMA Shapefile. The GIS program then uses information from the Map Rules Page database (Sup33) to determine what Crop/Type/Practices apply to each map. The FCI-33 Supplement database is also used to determine which legal descriptions are on the FCI-33 supplement for this map. The program uses all of this information then goes through each polygon on the Merged RMA Shapefile and determines if the sections are 'Completely' or 'Partially' in the Map Area.

Standard Rate areas (For counties with Maps) are represented in the High Risk Land Validation Edit File as a "blank or null value" in the Map Area field. T-Yield, Rate Areas, and Crush Districts are also available in the validation file.

Also for the 2009 reinsurance year is the Map Rules file, 2009\_MapRules.txt. This contains information on what Crops, Types, Practices apply to each of the 2009 Reinsurance Year Shapefiles.

Based on the land id reported by the producer, the Map area Id field, on the acreage report can be validated in the following manner;

- 1) If the Status Code is a 'C' (land\_id is completely in a map area) the Map Area (field 23) on the T11 acreage report must match the Map Area on the Edit file. In this condition DAS will flag the record with a warning message.
- 2) If the Status Code is a 'P' (land\_id is partially in a map area) and the Map Area (field 23) on the T11 is spaces, the location of the acreage will need to be manually reviewed, and, a warning message will be issued by DAS for this condition.

#### Additional Notes:

- Unrated land is also included in this file; Unrated Areas are designated with URA as the map area.
- All records in the Edit File with Insurance plan '90' (APH) need to be applied to plans '25' (RA) & '44' (CRC).

### FALSE POSITIVES

Due to RMA’s Digitizing standards (digitizing Maps to CLU), in any circumstance when the CLU is more than 100 feet off the PLSS section line, this will create a False Positive ‘P’ for the section, when in reality this section should be 100% Completely in a standard rate map area. There SHOULD not be any false positives flagged with a ‘C’ status code.

In addition, any errors with the PLSS layer RMA uses could replicate some false positives. Again, we would only expect to see False Positives ‘P’ partially in the section, none coded as ‘C’ Completely in the section. The PLSS layer used for this edit is the PLSS layer available on the AIP Server.
