I request information from annual individual crop insurance filings since the year 1998 until the most recent available, but at the minimum through 2012. I understand that crop insurance is filed for the 'unit' level, which is sometimes a CLU or group of CLUs. Specifically, on each minimum unit, we request: • Exact crop Yield for the unit for a year • Unit of measure of crop (bushel, etc) • Exact acreage for the unit for a year • Unit of measure of the acreage (acres, etc) • Crop grown on that unit that year • County the unit is in • State the unit is in • Year that the crop on the unit with the yield and acreage was grown • Unit ID for the unit for a year I request this information for every unit in every county in the states of Michigan, Illinois, Indiana, and Ohio. As As per 5 U.S.C. 552(a)(3)(B) that allows transmission of the data in the format requested by the user, if available, I request that the data be provided in the form of a CSV or similar electronic file, with labels for the data in the form of headers or otherwise.
