**SUBJECT:** Dairy Revenue Protection Plan of Insurance - 2019 and Succeeding Crop  
Years

**BACKGROUND:**

The Federal Crop Insurance Corporation Board of Directors approved the Dairy Revenue Protection (DRP) Plan of Insurance on February 13, 2018. DRP is a privately developed product that was approved under section 508(h) of the Federal Crop Insurance Act.

DRP is designed to insure against unexpected declines in the quarterly revenue from milk sales relative to a guaranteed coverage level. The expected revenue is based on futures prices for milk and dairy commodities and the amount of covered milk production elected by the dairy producer. The covered milk production is indexed to the state or region where the dairy producer is located. DRP is approved for sale in all 50 states. Daily sales will begin on Tuesday, October 9, 2018, with the first available coverage starting the first quarter of 2019.
