INFORMATIONAL MEMORANDUM: PM-11-046

TO: All Approved Insurance Providers
All Risk Management Agency Field Offices
All Other Interested Parties

FROM: Tim B. Witt /s/ *Rodger M. Matthews Sr., for.*
Deputy Administrator

SUBJECT: Trend-Adjusted Actual Production History (APH)

BACKGROUND:

The Federal Crop Insurance Corporation (FCIC) Board of Directors approved Trend-Adjusted APH on May 19, 2011. The Illinois Corn Marketing Board and integrated Financial Analytics and Research submitted Trend-Adjusted APH under section 522(b) of the Federal Crop Insurance Act (Act) in February 2010, which was subsequently developed and submitted under section 508(h) of the Act. The Trend-Adjusted APH adjusts eligible yields, in qualifying APH databases, to reflect long term increases in the county's historical yield. The county's yield trend factor will be provided in the actuarial documents.

ACTION:

Trend-Adjusted APH is available beginning for the 2012 crop year for corn and soybeans for specific counties in Colorado, Illinois, Indiana, Iowa, Kansas, Kentucky, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin. (See attached map.)

The attached procedures have been approved for administering Trend-Adjusted APH. Interested producers should contact a crop insurance agent for further information. A list of agents can be found on the Risk Management Agency website: <http://www.rma.usda.gov>.

DISPOSAL:

December 31, 2011.
