The following table contains the elements included in the Cause of Loss Summary of Business files for crop years 1989-2000 that are available for download via the RMA Public Web Sit. The files are created in a comma delimited format.

The Format column specifies the maximum length and data type for each of the elements. A format of 9 indicates that the value can only be numeric, while a format of X can be alpha-numeric values. Decimal formats will include a V with the number of places to the right of the decimal specified to the left of the V, while the decimal precision is specified to the right of the V (e.g. 9(08)V9(02) would be 00000000.00). An S as the first character in the specification of format, indicates that the value in that element can contain negatives when applicable.
