April 2010

2010 COMMODITY INSURANCE FACT SHEET

Grain Sorghum

California

Crop Insured

The crop insured will be combine-type hybrid grain sorghum (grown for hybrid seed) and grain sorghum planted for harvest as grain. Coverage for dual-purpose grain sorghum may be insurable by written agreement only.

Counties Available

Grain sorghum is insurable in Glenn, Sacramento, Sutter, Tulare and Yolo counties. Grain sorghum in other counties may be insurable by written agreement if specific criteria are met. Contact an agent for more details.

Causes of Loss

Adverse weather conditions¹
Failure of irrigation water supply²
Fire
Insects³
Plant disease³
Wildlife

¹Natural perils such as hail, frost, freeze, wind, drought, and excess moisture.

²If caused by an insured peril during the insurance period.

³But not damage due to insufficient or improper application of control measures.

Insurance Period

Growers must apply for coverage on their crop with an insurance agent by February 28. Coverage on your grain sorghum crop begins immediately following planting and ends the earliest of:

- Total destruction of the crop on a unit
- Harvest of the crop
- Final adjustment of a loss on a unit
- Calendar date for the end of insurance on December 10th

Important Dates

Sales Closing February 28
Final Planting Date June 30
Acreage Report Due July 15

Coverage Levels and Premium Subsidies

Individual amounts of insurance are based on a grower's production history. Each grower's approved average yield is calculated from 4 to 10 years of production records provided to an insurance agent. Producers can select a level of coverage ranging from 50 to 75 percent of their approved average yield and 55 to 100 percent of a price announced by USDA, or Catastrophic (CAT) coverage based on 50 percent of their approved yield and 55 percent of the price.

Price Election: Price used to calculate your premium and indemnity: **\$3.47 per bushel**

Cost of Crop Insurance

The Agricultural Risk Protection Act of 2000 raised the subsidies for federal crop insurance premiums substantially. For CAT coverage, growers pay an application fee of \$300 with 100 percent of the premiums being subsidized. Higher coverage levels are subsidized at lower rates; USDA pays at least 50 percent of the premium. For more detailed information about the amounts of coverage and premiums, please contact a crop insurance agent or your local county Farm Service Agency office for an agent listing.

Loss Example

Based on actual production history (APH) yield of 100 bushels per acre, 75-percent coverage level, 100-percent share.

100	Bushel per acre average yield (APH)
<u>x .75</u>	Coverage level percentage
75	Bushel per acre guarantee
<u>- 59</u>	Bushel per acre actually produced
16	Bushel per acre loss
<u>x \$3.47</u>	Price election
\$55.52	Indemnity per acre

Where to Purchase Crop Insurance

All multi-peril crop insurance, including CAT coverage insurance policies, are available from private insurance agents. A list of crop insurance agents is available on the RMA Web site at:
