2011 COMMODITY INSURANCE FACT SHEET

Cotton (ELS)

Arizona

Crop Insured

All the acres of lint cotton planted in a county by an insured grower must be insured. However, insuring one type of cotton does not require insuring all types. A producer may decide to insure all pima cotton acreage and none of the upland acreage. Colored cotton lint is not insurable unless allowed by the special provisions or by individual written agreement.

Counties Available

Cotton (ELS) is available for insurance in the following counties: Cochise, Graham, La Paz, Maricopa, Pima, Pinal and Yuma counties. Cotton may be insurable in other counties by written agreement if specific criteria are met. Contact an agent for more details.

Causes of Loss

Adverse weather conditions¹
Failure of irrigation water supply²
Fire
Insects³
Plant disease³
Wildlife⁴

¹Natural perils such as hail, frost, freeze, wind, drought, and excess moisture.

²If caused by an insured peril during the insurance period.

³But not damage due to insufficient or improper application of control measures.

⁴Unless wildlife control measures have not been taken.

Insurance Period

Coverage usually begins when the crop is planted and ends at the earliest of:

- Total destruction of the crop
- Abandonment of the crop
- January 31

Important Dates

Sales Closing	*February 28
Final Planting.....	*April 30
Acreage Report Due	*July 15

*Dates may vary by county; consult your local crop insurance agent for details.

Coverage Levels and Premium Subsidies

The guarantee is production, measured in pounds of cotton. Individual amounts of insurance are based on a grower's production history. Each grower's approved-average yield is calculated from 4 to 10 years of production records provided to an insurance agent. Producers can select a level of coverage ranging from 50 to 85 percent of their approved average yield and 50 to 100 percent of a price announced by USDA, or Catastrophic Risk Protection (CAT) coverage based on 50 percent of their approved yield and 55 percent of the price. Cotton may be insurable in other counties if specific criteria are met.

Prevented Planting

These provisions provide reduced protection on acreage that cannot be planted by the final planting date. Consult a crop insurance agent for more details.

Definitions

APH Yield— Your actual production history (APH) yield used to determine the production guarantee. The APH yield is based on up to 10 years of actual and/or assigned yields.

Price Election— The price used to calculate your premium or indemnity. Only one price election may be selected for all your cotton in a county. Please talk to your crop insurance agent for specific prices available.

Production Guarantee— Number of pounds guaranteed that is determined by multiplying your average APH yield times the coverage level percentage you elect times your planted acres.

Loss Example

A claim can be filed whenever production falls short of the guarantee selected by the insured. The amount of a loss is determined by multiplying the production shortfall by the pre-selected price.

(Based on actual production history (APH) yield of 1,500 pounds per acre, 75-percent coverage level on 100 acres of cotton, selected price of \$1.15 per pound, and one basic unit, 100-percent share.)

1500	Pounds per acre average yield (APH)
<u>x .75</u>	Coverage level
1125	Pounds per acre guarantee
<u>- 500</u>	Pounds per acre actually produced
625	Pounds per acre loss
<u>x \$1.15</u>	Price election**
\$718.75	Indemnity per acre paid to insured

**** Price used above is an example only. Contact your crop insurance agent for more information.**

Optional Cottonseed Endorsement

The Cottonseed Pilot Endorsement offers yield coverage for cottonseed as an optional endorsement applicable to cotton policies at coverage levels other than CAT. It is designed to integrate seamlessly with the cotton lint program rules and procedures, with the cottonseed guarantee set as a ratio of the cotton lint guarantee on the policy. Please contact your crop insurance agent for more details.

Where to Purchase Crop Insurance

All multi-peril crop insurance, including CAT coverage insurance policies, are available from private insurance agents. A list of crop insurance agents is available on the RMA Web site at: <http://www3.rma.usda.gov/tools/agents/>
