

United States Department of Agriculture Risk Management Agency

December 2010

2011 COMMODITY INSURANCE FACT SHEET

Small Grains

Arizona

Crop Insured

Barley and Wheat

- Grown for the production of grain, not forage.
- Only irrigated production practices are insurable in the counties.
- Additional coverage endorsements are available for winter wheat.
- Coverage for all types of small grains may not be available in all counties.
- Producers must insure all or none of their acreage of each type of small grain in the county but do not have to insure all types of small grain.
 - For example, a producer may insure all of his wheat and none of his planted barley.
- The insurance coverage on one type of small grain can differ from coverage on another small grain insured by the same producer.

Programs Available

Yield Protection (01)

The yield protection guarantee will be determined by multiplying the production guarantee by the projected price.

Revenue Protection (02)

The revenue protection guarantee will be determined by multiplying the production guarantee by the greater of the projected price or the harvest price. (Not applicable to Oats)

Revenue Protection with Harvest Price Exclusion (03)

The revenue protection guarantee will be determined by multiplying the production guarantee by the projected price. (Not applicable to Oats)

Counties Available

Barley is insurable in Cochise, Graham, Maricopa Pinal and Yuma Counties. Wheat is insurable in Cochise, Graham, Greenlee, La Paz, Maricopa, Mohave, Navajo, Pima, Pinal, Yavapai and Yuma counties. Barley and wheat in other counties may be insurable by written agreement if specific criteria are met. Contact an agent for more details.

Causes of Loss

Adverse weather conditions¹
Failure of irrigation water supply²
Fire³
Insects⁴
Plant disease⁴
Wildlife⁵

¹Natural perils such as hail, frost, freeze, wind, drought, and excess moisture.

²If caused by an insured peril during the insurance period.

³Unless weeds and undergrowth are not controlled or unmulched pruning debris is not removed.

⁴But not damage due to insufficient or improper application of control measures.

⁵Unless wildlife control measures have not been taken.

Insurance Period

Producers must contact a crop insurance agent to apply for coverage or change their coverage by October 31 to insure the small grains they intend to plant. Insurance coverage begins when the crop is planted and ends no later than the following July 31.

Important Dates*

Barley:

Sales Closing	October 31
Final Planting Date	January 31*
Acreage Report Due	March 15
Wheat:	
Sales Closing	October 31
Final Planting Date	January 31*
Acreage Report Due	March 15

*See an agent for actual dates in your area.

Coverage Levels and Premium Subsidies

The insurance guarantee is production measured in bushels of grain. Individual amounts of insurance are based on the grower's production history. An insurance agent calculates each grower's approved average yield from 4-10 years of production records. Producers can select a level of coverage ranging from 50 to 75 percent of their approved average yield and 55 to 100 percent of a price announced by USDA, or catastrophic (CAT) coverage based on 50 percent of their approved yield and 55 percent of the price.

Price Election Coverage

The price below is used to calculate your premium or indemnity:

Barley	\$4 . 54
Wheat	
Durum	\$8.79

Harvest Price for Plan 02

Barley **To be announced****Wheat **To be announced****

**See your crop insurance agent for the 2011 price elections.

Cost of Crop Insurance

The Agricultural Risk Protection Act of 2000 raised the subsidies for federal crop insurance premiums substantially. For CAT coverage, growers pay an application fee of \$300 per county with 100 percent of the premiums being subsidized. Higher coverage levels are subsidized at lower rates; USDA pays at least 50 percent of the premium. For more detailed information about the amounts of coverage and premiums, please contact a crop insurance agent or your local county FSA office for an agent listing.

Loss Example

A claim can be filed whenever production falls short of the guarantee selected by the insured. The amount of a loss is determined by multiplying the production shortfall by the pre-selected price.

Wheat Indemnity

Based on a Yield Protection plan guarantee, an insured assumes a basic unit with 65-percent coverage level, 100-percent price election, and yield of 80 bushels per acre, 100-percent share.

	\$282.00	Gross indemnity per acre
X	\$7.42	Price election
	38	Bushels per acre loss
	- 14	Bushels per acre actually produced
	52	Bushels per acre guarantee
_	x .65	Coverage level percentage
	80	Bushels per acre average yield (APH)

Where to Purchase Crop Insurance

All multi-peril crop insurance, including CAT coverage insurance policies are available from private insurance agents. A list of crop insurance agents is available on the RMA Web site at: http://www3.rma.usda.gov/tools/agents/
