Risk Management Agency

December 2010

2011 COMMODITY INSURANCE FACT SHEET

Safflower

California

Crop Insured

All types of safflower planted for harvest as safflower seed can be insured. Both irrigated and non-irrigated production practices are insurable. Safflower planted on land on which safflower, sunflowers, beans, mustard, lentils, or rapeseed were grown the preceding crop year is not insurable.

Counties Available

Safflower is insurable in Butte, Colusa, Fresno, Kings, Sacramento, San Benito, San Joaquin, Santa Clara, Solano, Sutter, Tehama, Tulare, Yolo and Yuba counties. Safflower in other counties may be insurable by written agreement if specific criteria are met. Contact an agent for more details.

Causes of Loss

Adverse weather conditions¹
Failure of irrigation water supply²
Fire³
Insects⁴
Plant disease⁴
Volcanic eruption
Wildlife⁵

¹Natural perils such as hail, frost, freeze, wind, drought, and excess moisture.

²If caused by an insured peril during the insurance period.

³unless weeds and other forms of undergrowth have not been controlled or pruning debris has not been removed.

⁴But not damage due to insufficient or improper application of control measures.

⁵Unless wildlife control measures have not been taken.

Insurance Period

Producers must contact a crop insurance agent to apply for coverage or change their coverage before December 31 to insure the safflower they intend to plant in the spring. Insurance coverage begins when the crop is planted and ends no later than October 31 immediately following planting.

Important Dates

Sales Closing December 31
Final Planting Date March 1
.....Fresno, Kings, & Tulare
Final Planting Date April 30
Butte, Colusa, Sacramento, San Benito, San Joaquin,
Santa Clara, Solano, Sutter, Tehama, Yolo & Yuba
Acreage Report Due July 15

Coverage Levels and Premium Subsidies

The insurance guarantee is production measured in pounds of safflower. Individual amounts of insurance are based on a grower's production history. An insurance agent calculates each grower's approved average yield from 4 to 10 years of production records. Producers can select a level of coverage ranging from 50 to 75 percent of their approved average yield and 55 to 100 percent of a price announced by USDA, or catastrophic (CAT) coverage based on 50 percent of their approved yield and 55 percent of the price.

Price Election: Price used to calculate your premium and indemnity.

2011 Price: \$0.171 per pound

Cost of Crop Insurance

The Agricultural Risk Protection Act of 2000 raised the subsidies for federal crop insurance premiums substantially. For CAT coverage, growers pay an application fee of \$300 with 100 percent of the premiums being subsidized. Higher coverage levels are subsidized at lower rates; USDA pays at least 50 percent of the premium. For more detailed information about the amounts of coverage and premiums, please contact a crop insurance agent or your local county FSA office for an agent listing.

Loss Example

Example assumes 75-percent coverage, 100-percent price election of \$0.171 per pound., an average yield of 800 pounds per acre, and 100-percent share.

800	Pounds per acre average yield (APH)
<u>x .75</u>	Coverage level percentage
600	Pounds per acre guarantee
<u>- 200</u>	Pounds per acre actually produced
400	Pounds per acre loss
<u>x \$.171</u>	Price election
\$ 68.40	Gross indemnity per acre

Where to Purchase Crop Insurance

All multi-peril crop insurance, including CAT coverage insurance policies, are available from private insurance agents. A list of crop insurance agents is available on the RMA Web site at:
