The guarantee is production, measured in pounds of dried figs. Individual insurance amounts are based on your production history. Your approved average yield is calculated from 4 to 10 years of production records you give to an insurance agent. You can select a level of coverage from 50 to 75 percent of your approved average yield and 50 to 100 percent of a price announced by USDA. Catastrophic Risk Protection (CAT) coverage is also available and is based on 50 percent of your approved yield and 55 percent of the price.

### Price Election

The price used to calculate a claim. Price elections vary by type and county. Please talk to a crop insurance agent for current prices and more information.

### Cost of Crop Insurance

CAT coverage has an application fee of \$300 with 100 percent of the premiums being subsidized. Higher coverage levels are subsidized at lower rates though USDA pays at least 50 percent of the premium. For more detailed information about coverage and premium amounts, please contact a crop insurance agent or your local county Farm Service Agency office for an agent listing.
