

## Davis Regional Office — Davis, CA

Revised October 2015

# Actual Revenue History Navels California

### Crop Insured

All types of navel oranges are insurable in the county if:

- They are adapted to the area;
- They are sold as fresh packed use only;
- They are irrigated; and
- Where trees have reached at least the sixth growing season after being set out.

You must insure all your navel orange acreage in the county at the same coverage level.

### Counties Available

Navel oranges are insurable in Fresno, Kern, Madera and Tulare counties.

### Causes of Loss

You are protected against the following:

- Adverse weather conditions;
- Earthquake;
- Failure of irrigation water supply, if caused by an insured peril during the insurance year;
- Fire;
- Inadequate market price;
- Insects or plant disease, but not damage due to insufficient or improper application of control measures;
- Volcanic eruption; or
- Wildlife.

### Insurance Period

Coverage begins on November 21, 2016. Coverage ends August 31, 2017.

### Important Dates

Sales Closing/Cancellation.....November 20, 2015  
Acreage Reporting.....January 15, 2016  
Premium Billing.....August 15, 2016  
Termination.....November 20, 2016

### Coverage Levels and Premium Subsidies

Your approved average revenue is based from 4 to 10 years of revenue records. Coverage levels range from 50 to 75 percent of your approved revenue. Crop insurance premiums are subsidized as shown in the following table. For example, if you choose the 65-percent coverage level, your premium share would be 41 percent of the base premium.

| Item               | Percent |    |    |    |    |    |
|--------------------|---------|----|----|----|----|----|
| Coverage Level     | 50      | 55 | 60 | 65 | 70 | 75 |
| Premium Subsidy    | 67      | 64 | 64 | 59 | 59 | 55 |
| Your Premium Share | 33      | 36 | 36 | 41 | 41 | 45 |

Catastrophic Risk Protection (CAT) risk coverage is unavailable. If you choose a payment factor ranging from 0.67 to 1.0 it reduces the amount of insurance without changing the point at which indemnities trigger; and it reduces the premium and indemnity amount you pay.

### Insurance Plans

Navels are insured under an Actual Revenue History (ARH) policy, which protects you from losses from low yields, low prices, low quality, or any combination of these events. Your coverage is based on your own net revenue history. The crop's revenue is determined after harvest at the point of first delivery.

### Loss Example

Assume an approved revenue of \$3,200. You choose a 75-percent coverage level and a payment factor of 1.0. You have a 100 percent share in your operation. You market 400 cartons of fresh navel oranges per acre and receive \$5.00 per carton.

|   |              |                           |
|---|--------------|---------------------------|
|   | \$3200       | Approved revenue          |
| x | 0.75         | Coverage level            |
| x | 1.00         | Payment factor            |
|   | \$2,400      | Amount of insurance       |
|   | 400          | Cartons                   |
| x | \$5.00       | Per carton net price      |
|   | \$2,000      | Revenue to count          |
|   | \$2,400      | Amount of insurance       |
| - | \$2,000      | Revenue to count          |
|   | \$400        |                           |
| x | 1.0          | Payment factor            |
|   | <b>\$400</b> | <b>Indemnity per acre</b> |

Price used above is for example only. Contact a crop insurance agent for current information.

### Where to Buy Crop Insurance

All multi-peril crop insurance, including CAT policies, are available from private insurance agents. A list of crop insurance agents is available at all USDA service centers and on the RMA website at: [www.rma.usda.gov/tools/agent.html](http://www.rma.usda.gov/tools/agent.html).
