Crop Insured
All storage white and yellow type onions are insurable if:
- They are contracted for dehydration and processing only; and
- Premium rates have been established in the county.
White, red, and yellow onions are insurable if:
- They are for fresh use; and
- Premium rates have been established in the county.

Insurance Period
Coverage begins when the crop is planted and ends with the earliest occurrence of one of the following:
- Removal of the onions from the field;
- 14 days after lifting or digging;
- November 7 for all storage onions in Modoc and Siskiyou counties;
- October 15 for all storage onions in all other counties; or
- August 31 for all non-storage onions.

This fact sheet gives only a general overview of the crop insurance program and is not a complete policy. For further information and an evaluation of your risk management needs, contact a crop insurance agent.
Coverage Levels and Premium Subsidies
Individual insurance amounts are based on your past production and planted acres. Coverage levels range from 50 to 75 percent of your approved yield. Crop insurance premiums are subsidized as shown. For example, if you choose the 65-percent coverage level, your premium share would be 41 percent of the base premium.

Loss Example
Assume 75-percent coverage, 100-percent price election of $8.70 per cwt., an average yield of 400 cwt., and 100-percent share.

\[
\begin{align*}
\text{400 Cwt. per acre average yield} \\
\text{\times 0.75 Coverage level} \\
\text{- 300 Cwt. per acre guarantee} \\
\text{100 Cwt. per acre actually produced} \\
\text{\times 8.70 Price election} \\
\text{\$870 Gross indemnity per acre}
\end{align*}
\]

Price used above is for example only. Contact a crop insurance agent for current information.

Where to Buy Crop Insurance
All multi-peril crop insurance, including CAT policies, are available from private insurance agents. A list of crop insurance agents is available at all USDA service centers and on the RMA website at www.rma.usda.gov/tools/agent.html.
