Coverage Levels and Premium Subsidies
The guarantee is production in pounds of dried figs. Individual insurance amounts are based on your approved yield. You will be asked to provide 4 to 10 years of actual yield. Coverage levels range from 50 to 85 percent of your approved yield. Crop insurance premiums are subsidized as shown in the following table. For example, if you choose the 65-percent coverage level, your premium share would be 41 percent of the base premium.

Catastrophic Risk Protection (CAT) coverage is fixed at 50 percent of your approved yield and 55 percent of the price election. CAT is 100-percent subsidized with no premium cost to you. There is, however, an administrative fee of $300 per crop per county, regardless of the acreage.

**Price Election**
The price used to calculate a claim. Price elections vary by type and county. Contact your crop insurance agent for price election changes for the current crop year.

**Loss Example**

\[
\begin{align*}
1500 & \quad \text{Pounds per acre average yield (APH)} \\
\times \ 0.50 & \quad \text{Coverage level} \\
750 & \quad \text{Pounds per acre guarantee} \\
- \ 500 & \quad \text{Pounds per acre actually produced} \\
250 & \quad \text{Pounds per acre loss} \\
\times \ 0.85 & \quad \text{Price election} \\
