September 2016

# Avocado Fruit

# **Crop Insured**

All of your commercially grown avocado types are insurable if:

- The actuarial documents provide premium rates;
- They are grown for harvest as avocados;
- They are grown on trees that have reached at least the fourth growing season after setout;
- They are grown on acreage that has produced a minimum of 50 bushels of avocados per acre in 1 of the 3 previous crop years; and
- You have a share in the crop.

Talk to your crop insurance agent for more information.

## **Counties Available**

Avocados are insurable in Miami-Dade County.

### **Causes of Loss**

You are protected against the following:

- Adverse weather conditions;
- Earthquake;
- Failure of irrigation water supply, if caused by an insured peril during the insurance year;
- Fire;
- Insects or plant disease, but not damage due to insufficient or improper application of control measures;
- Volcanic eruption; or
- Wildlife.

### **Insurance Period**

Coverage begins:

- December 1 for existing policies;
- For new policies, if your application is received between November 21 and December 1, insurance attaches on the tenth day after your insurance company receives your properly completed application unless an inspection during the 10-day period determines that the acreage does not meet the policy requirements for insurability. You must provide the company any information required to determine the condition of the grove to be insured.

Insurance coverage ends:

- For early avocados, November 30 of the first year after coverage starts; or
- For late avocados, the second March 31 after coverage starts.

### **Important Dates**

Sales Closing/Cancellation .	November 30, 2016
Acreage Reporting	January 15, 2017
Premium Billing	August 15, 2017
Termination	November 30, 2017

### **Reporting Requirements**

Acreage Report - You must report all acres of the crop, in which you have a share in the county, to your crop insurance agent by the acreage reporting date.

**Production Report -** A production report, by type, is required by the production reporting date. You must report:

- The number of bearing trees on insurable and uninsurable acreage;
- Any change that may adversely impact yield potential (i.e., tree damage or removal, or changes in practices);
- The age of the trees; and
- The planting pattern.

### Duties in the Event of Damage or Loss

You must perform the following duties in the event of damage or loss:

• You must notify your crop insurance agent at least 15 days before any production from any unit will be sold by direct marketing. Failure to give timely notice that production will be sold by direct marketing will result in an appraised amount of production-to-count of not less than the production guarantee per acre if such failure results in an inability to make an accurate appraisal. Talk to your crop insurance agent for additional requirements and details.

## Definitions

**Approved Yield -** The average of the actual production history (APH) yields, assigned or adjusted yields, or unadjusted transitional yields that are calculated and

This fact sheet gives only a general overview of the crop insurance program and is not a complete policy. For further information and an evaluation of your risk management needs, contact a crop insurance agent.

approved by your insurance company. There is a 1-year lag cost to you. There is an administrative fee of \$300 per crop period in reporting production. The latest APH crop year reported is determined by subtracting 2 years from the current crop year. For example, production reports through the 2013 production year are required for determining the 2015 crop year approved APH.

Buckhorn - To prune any limb at a diameter of at least four inches.

Bushel - A unit of measure equal to 55 pounds of avocados.

Crop Year - A period beginning with the date insurance attaches to the avocado crop and extending through the normal harvest time. The crop year is designated by the calendar year after insurance attaches.

Direct Marketing - Sale of the insured crop directly to consumers without the intervention of an intermediary such as a wholesaler, retailer, packer, processor, shipper, or buyer. Examples of direct marketing include selling through an on-farm or roadside stand, farmer's market, and permitting the general public to enter the fields to pick all or a portion of the crop.

Early Variety - 232, Arue, Bassage, Bernecker, Beta, Biondo, Black Prince, Blair, Booth 5, Booth 7, Booth 8, Brooks 1978, Catalina, Christina, Collinson, Donnie, Dr. Dupuis, Fuchs, Gorham, Hardee, Hickson, K-5, K-9, Lisa, Loretta, Marcus, Miguel, Nadir, Nesbitt, Peterson, Pinelli, Pollock, Rue, Ruehle, Simmonds, Simpson, Tonnage, Tower 2, Trapp, and Waldin.

Late Variety - All other varieties not listed as an early variety.

Price Election - The value per bushel used to determine premium and indemnity under the policy. Prices can be found at webapp.rma.usda.gov/apps/ actuarialinformationbrowser/.

#### **Coverage Levels and Premium Subsidies**

Coverage level options range from 50 to 75 percent of your approved APH yield. For example, an approved yield of 200 bushels per acre results in a guarantee of 130 bushels per acre at the 65-percent coverage level. Crop insurance premiums are subsidized as shown in the following table. If you choose the 65-percent coverage level, your premium share would be 41 percent of the base premium.

Item	Percent					
Coverage Level	50	55	60	65	70	75
Premium Subsidy	67	64	64	59	59	55
Your Premium Share	33	36	36	41	41	45

Catastrophic Risk Protection (CAT) coverage is fixed at 50 percent of your approved yield and 55 percent of the price election. CAT is 100-percent subsidized with no premium

per county, regardless of the acreage.

### Loss Example

Assume an approved yield of 200 bushels per acre, 65percent coverage level, 100-percent price election of \$17.50 per bushel, 100-percent share, a one acre basic unit, and 50 bushels of production-to-count due to an insurable cause of loss.

200	Bushels/acre approved yield
<u>x 0.65</u>	Coverage level percentage
130	Bushels guarantee
- 50	Bushels production
80	Bushels loss
<u>x \$17.50</u>	Price election
\$1,400	Indemnity per acre

#### Where to Buy Crop Insurance

All multi-peril crop insurance, including CAT policies, are available from private crop insurance agents. A list of crop insurance agents is available at all USDA service centers and on the RMA website at www.rma.usda.gov/ tools/agent.html.
