

Valdosta Regional Office — Valdosta, GA

Revised January 2018

Grain Sorghum

Alabama, Florida, Georgia, and South Carolina

Crop Insured

All of your grain sorghum is insurable by yield or revenue protection plans in the county if:

- The actuarial documents provide premium rates;
- It is a combine-type hybrid (from hybrid seed);
- It is not a dual-purpose type of grain sorghum used for both grain and forage (unless allowed through a written agreement);
- It is not planted into an established grass or legume unless the grass or legume is terminated before emergence of the grain sorghum;
- Adapted to the area, based on days to maturity, and compatible with agronomic and weather conditions in the area;
- Planted for harvest as grain; and
- You have a share in the crop.

Counties Available

See actuarial documents at webapp.rma.usda.gov/apps/ActuarialInformationBrowser/Default.aspx for insurable counties. The crop may be insurable in other counties by written agreement if specific criteria are met. Talk to your crop insurance agent for more details.

Causes of Loss

You are protected against the following:

- Adverse weather conditions;
- Earthquake;
- Failure of irrigation water supply, if caused by an insured peril during the insurance period;
- Fire;
- Insects or plant disease, but not damage due to insufficient or improper application of control measures;
- Price change (for revenue protection);
- Volcanic eruption; or
- Wildlife.

Insurance Period

Coverage begins when the crop is planted and ends with the earliest occurrence of one of the following:

- Total destruction of the crop;
- Harvest;
- Final adjustment of a loss;
- Abandonment of the crop; or
- December 10.

Important Dates

Sales Closing/Cancellation	February 28, 2018
Final Planting	June 20, 2018
Acreage Reporting	July 15, 2018
Premium Billing	August 15, 2018
Termination	February 28, 2019

Reporting Requirements

Acreage Report - You must report all acres of the crop, in which you have a share in the county, to your crop insurance agent by the acreage reporting date.

Duties in the Event of Damage or Loss

You must perform the following duties in the event of damage or loss:

- Notify your crop insurance agent within 72 hours of your initial discovery of damage or loss of production, but not later than 15 days after the end of the insurance period.
- Representative samples of the unharvested crop must not be destroyed or harvested until inspected by the insurance company or 15 days after harvest of the balance of the unit is completed, whichever is earlier, and written notice of loss is provided.

Insurance Plans

One policy provides the choice of three plans.

Yield Protection - Insurance coverage providing protection only against a production loss.

Revenue Protection - Insurance coverage providing protection against loss of revenue due to a

production loss, price decline/increase, or combination of both.

Revenue Protection with Harvest Price

Exclusion - Insurance coverage providing protection only against loss of revenue due to a production loss, price decline, or a combination of both. The harvest price is not excluded for determining the value of production for loss determination.

Definitions

Approved Yield - The average of the actual production history (APH) yields, assigned or adjusted yields, or unadjusted transitional yields that your insurance company calculates and approves.

Commodity Exchange Price Provisions - Contains information necessary to set the projected and harvest prices for the insured crop.

Harvest Price - Determined from the Chicago Board of Trade average daily settlement price of the December corn futures contract for August 1 – August 31 according to the Commodity Exchange Price Provisions.

Projected Price - Determined from the Chicago Board of Trade average daily settlement price of the December corn futures contract for January 15 – February 14 according to the Commodity Exchange Price Provisions. The projected price is used to calculate your premium and any prevented planting payment. For more information talk to your crop insurance agent or see webapp.rma.usda.gov/apps/ActuarialInformationBrowser/Default.aspx.

Production Guarantee - Number of bushels guaranteed, determined by multiplying your approved yield per acre by the coverage level percentage you choose.

Revenue Protection Guarantee - For revenue protection only, amount determined by multiplying the production guarantee by the greater of the projected price or the harvest price. If you choose the harvest price exclusion, the production guarantee is only multiplied by the projected price.

Coverage Levels and Premium Subsidies

Coverage levels range from 50 to 85 percent of your approved yield. You may choose one coverage level for all your irrigated acreage in the county and a different coverage level for all your non-irrigated acreage. Crop insurance premiums are subsidized as shown in the following table (for basic or optional units). Your share of the premium is 100 percent minus the subsidy amount. For example, if you choose the 75-percent coverage level, your coverage will be

based on 75 percent of your approved yield and the premium subsidy is 55 percent if you have basic or optional units. Your premium share is 45 percent of the base premium (100 - 55 = 45). Talk to your crop insurance agent for enterprise or whole-farm unit subsidies.

Item	Percent							
Coverage Level	50	55	60	65	70	75	80	85
Premium Subsidy	67	64	64	59	59	55	48	38
Your Premium Share	33	36	36	41	41	45	52	62

Catastrophic Risk Protection (CAT) coverage is fixed at 50 percent of your approved yield and 55 percent of the price election. CAT is 100-percent subsidized with no premium cost to you. There is an administrative fee of \$300 per crop per county, regardless of the acreage.

Insurance Units

Basic Units - A basic insurance unit includes all your insurable grain sorghum acreage in the county in which you have 100-percent share and includes any cash-rented land. If you also grew grain sorghum on shares with another entity, that acreage would be a separate basic unit. A premium discount applies.

Optional Units - A basic unit may be divided into two or more optional units by Farm Service Agency Farm Serial Number, irrigated and non-irrigated acreage, or organic practice. No premium discount applies.

Enterprise Unit - All insurable grain sorghum in the county in which you have a share. Enterprise units are allowed by irrigated or non-irrigated practice. To qualify for an enterprise unit, you must have:

- Yield or revenue protection insurance; and
- At least two farm serial numbers, each having the lesser of 20 acres or 20 percent of the insured crop acreage in the enterprise unit; or
- One farm serial number with at least 660 planted acres.

A variable premium discount and increased premium subsidy apply.

Whole-Farm Unit - Available only for Revenue Protection policies with two or more crops. A variable premium discount and increased premium subsidy apply. A separate administrative fee is required for each crop included in the whole-farm unit. Talk to your crop insurance agent for more details.

Prevented Planting

Prevented planting coverage is 60 percent of your production guarantee for timely planted acreage. If you pay an additional premium, you may increase your prevented planting coverage. Talk to your crop insurance agent for more details.

Replant Provision

You may receive a replanting payment if your grain sorghum is damaged by an insurable cause of loss so that the remaining stand does not produce at least 90 percent of the production guarantee and it is practical to replant. The amount of the replanting payment per acre is the lesser of 20 percent of the production guarantee or seven bushels, multiplied by:

- The projected price for your grain sorghum crop; and
- Your percent share.

The production guarantee is applied separately to each crop replanted if a whole farm unit is applicable.

Supplemental Coverage Option (SCO)

This policy endorsement provides additional coverage for a part of your grain sorghum policy deductible up to the 86-percent coverage level. SCO may be added to individual yield or revenue plans. The coverage is based on your expected crop value. The trigger for a loss is based on an area loss in yield or revenue. Talk to your crop insurance agent for county availability and detailed information on this endorsement.

Loss Example

A yield protection loss occurs when grain sorghum production for the unit falls below the production guarantee because of damage from a covered cause of loss.

A revenue protection loss occurs when the value of production-to-count is less than the revenue protection guarantee due to a production loss and/or a revenue loss.

Assume non-irrigated grain sorghum with an approved yield of 40 bushels per acre, 70-percent coverage level, 100-percent share, and a one-acre basic unit. The projected price is \$3.21 and the harvest price is \$3.75. Due to an insurable cause of loss, the production-to-count is 20 bushels. The Revenue Protection Insurance Guarantee (initially based on the Projected Price until the Harvest Price is

established) is equal to the Production Guarantee multiplied by the greater of the Projected Price or the Harvest Price. In the Revenue Protection example, the Insurance Guarantee increased to \$105.00 (28 Bushels per Acre Guarantee x \$3.75 Harvest Price, rounded).

The Revenue Protection Production-to-Count Value is equal to the Production-to-Count multiplied by the Harvest Price (20 Bushels Produced x \$3.75 per bushel Harvest Price = \$75.00).

Yield Protection		Revenue Protection	
40	Bushels/Acre APH yield	40	
x 0.70	Coverage Level	x 0.70	
28	Bushels/Acre Guarantee	28	
x \$3.21	Projected Price	x \$3.21	
\$89.88	Insurance Guarantee	\$89.88	
20	Bushels Produced	20	
x \$3.21	Projected Price	—	
—	Harvest Price	x \$3.75	
\$64.20	Production to Count Value	\$75.00	
\$89.88	Insurance Guarantee	\$105.00	
- \$64.20	Production-to-Count Value	- \$75.00	
\$25.68	Indemnity/Acre	\$30.00	

Where to Buy Crop Insurance

All multi-peril crop insurance, including CAT policies, are available from private crop insurance agents. A list of crop insurance agents is available at all USDA service centers and on the RMA website at www.rma.usda.gov/tools/agent.html.
