2006 COMMODITY INSURANCE FACT SHEET

Blueberries

Michigan

Crop Insured

Blueberries that are grown in the county on insurable acreage and of an insurable type, which have produced the minimum of 1000 pounds per acre within the base period, and have been inspected and considered acceptable by us.

Counties Available

Blueberry insurance is available for the 2006 crop year in the following counties: Allegan, Berrien, Muskegon, Ottawa and Van Buren.

Causes of Loss

Adverse weather conditions
Earthquake
Failure of irrigation water supply, if applicable, due to an unavoidable cause of loss occurring within the insurance period
Fire
Insects*
Insufficient number of chilling hours to break dormancy
Plant disease*
Volcanic eruption
Wildlife

All specified causes of loss must be due to a naturally occurring event.
*But not damage due to insufficient or improper application of pest or disease control measures.

Excluded Causes of Loss

Failure to install and maintain a proper drainage system
Inability to market blueberries (due to quarantine, boycott, or refusal of any entity to accept production)
Mechanical damage
Untimely harvest

Insurance Period

Coverage begins on the date we accept your application, or November 21 of the calendar year prior to the year the insured crop normally blooms, and ends the earliest of: (1) total destruction of the crop; (2) harvest of the unit; (3) final adjustment of loss; (4) September 30; or (5) agreement on appraisal of insured acreage you wish to abandon.

Reporting Requirements

Acreage Report—You must report to your insurance provider all acreage of the insured crop in the county in which you have a share.

Important Dates

Sales Closing November 20
Acreage and Production Report..... January 15
Cancellation..... November 20

Definitions

Production Guarantees - Number of pounds guaranteed per acre, determined by multiplying your average yield per acre times the coverage level percentage you elect. Yields are based on actual production history (APH) records reported to your insurance provider.

Coverage Levels and Premium Subsidies

The blueberry policy guarantees a certain amount of production, depending on the level of coverage selected. Crop insurance premiums are subsidized as shown below. For example, if you select the 75-percent coverage level, the premium subsidy is 55 percent and your premium share is 45 percent of the base premium.

Item	Percent					
Coverage Level	50	55	60	65	70	75
Premium Subsidy	67	64	64	59	59	55
Your Share	33	36	36	41	41	45

The total cost for CAT coverage will be an administrative fee of \$100 per crop per county, regardless of the acreage. All other coverage levels require a \$30.00 administrative fee

Price Elections

Price at which you are compensated per pound in the event of a loss, based on the percentage of established price you have selected. Price election percentage choices for this crop year are 55 percent to 100 percent of the price shown below.

Established Price:

\$0.64 per pound

Loss Example

A loss occurs when crop production falls below the guaranteed amount of pounds as a result of damage from a covered cause of loss. This example assumes 65-percent coverage level, a 100-percent price election of \$0.64, and an approved APH yield of 4,000 pounds per acre with .667 share.

APH yield x coverage level x unit acres x price election - production (multiply total production-to-count by price election) x share

4,000	Pound approved APH yield
x <u>.65</u>	Coverage level
2,600	Pound per acre guarantee
x <u>2</u>	Acres
5,200	Pound unit guarantee
x <u>\$.64</u>	Price election
\$3,328	Unit guarantee
- <u>\$640</u>	1,000 lbs production x \$0.64
\$2,688	Unit indemnity
x <u>.667</u>	Share
\$1,793	Final indemnity
