

United States Department of Agriculture Risk Management Agency

March 2011

2011 COMMODITY INSURANCE FACT SHEET

Oats Illinois Indiana

Michigan

Ohio

Crop Insured

The crop insured will be oats planted for harvest as grain. Oats are covered in the Small Grains Crop Provisions.

Counties Available

See your crop insurance agent for a listing of eligible counties. In counties where premium rates are not provided by an actuarial table, the crop may be insurable by written agreement if specific criteria are met.

Causes of Loss

Adverse weather conditions Earthquake Failure of irrigation water supply, if applicable, due to an unavoidable cause of loss occurring within the insurance period Fire Insects* Plant disease* Volcanic eruption Wildlife

All specified causes of loss must be due to a naturally occurring event. *But not damage due to insufficient or improper application of pest or disease control measures.

Insurance Period

Coverage begins at the time of planting and ends the earliest of: (1) total destruction of the crop; (2) harvest of the unit; (3) final adjustment of a loss; (4) abandonment of the crop; or (5) October 31.

Reporting Requirements

Acreage Report—You must report to your insurance provider all acreage of the insured crop in the county in which you have a share, the practice, and your share at the time of planting.

Important Dates

| Sales Closing | March 15 |
|----------------|------------------|
| Final Planting | Varies by county |
| Acreage Report | May 31 |
| Cancellation | March 15 |
| | |

Definitions

Production Guarantees - Number of bushels guaranteed per acre determined by multiplying your approved yield per acre times the coverage level percentage you elect. Yields are based on actual production history (APH) records reported to your insurance provider.

Coverage Levels and Premium Subsidies

The oat policy guarantees a certain amount of production, depending on the level of coverage selected. Crop insurance premiums are subsidized as shown below. For example, if you select the 75-percent coverage level, the premium subsidy is 55 percent and your premium share is 45 percent of the base premium.

| Item | Percent | | | | | |
|-----------------|---------|----|----|----|----|----|
| Coverage Level | 50 | 55 | 60 | 65 | 70 | 75 |
| Premium Subsidy | 67 | 64 | 64 | 59 | 59 | 55 |
| Your Share | 33 | 36 | 36 | 41 | 41 | 45 |

The total cost for CAT coverage will be an administrative fee of \$300 per crop per county, regardless of the acreage. All other coverage levels require a \$30.00 administrative fee.

Price Elections

Price at which you are compensated per bushel in the event of a loss, based on the percentage of established price you have selected. Price election percentage choices for this crop year are 55 percent to 100 percent of the price shown below.

Established Price:

\$2.60

Additional Price: \$2.75

Insurance Units

Basic Unit: A basic unit includes all of your insurable oat acreage in the county by share arrangement. Premiums are reduced 10 percent for a basic unit.

Optional Unit: If a basic unit consists of two or more sections of land, and certain record keeping requirements are met, you may apply for optional units by section. The 10-percent premium discount will not apply.

Replant Provisions

A replanting payment is available if we determine it is practical to replant on a unit and our appraisal does not exceed 90 percent of your guarantee and you replant at least 20 acres or 20 percent of the unit. The replanting payment will be the lesser of 20 percent of the bushel guarantee or 5 bushels times your price election, multiplied by your share. Replant payments are **not available** on the catastrophic risk protection endorsement.

Late and Prevented Planting

These provisions provide protection on eligible acreage that is planted late or that cannot be planted by the final planting date or within the 25 day lateplanting period. Please consult your crop insurance provider for further details.

Loss Example

A loss occurs when crop production falls below the guaranteed bushel amount as a result of damage from a covered cause of loss. This example assumes 75-percent coverage level and a price election of \$2.60 and an average yield of 60 bushels per acre with .667 share.

APH yield x coverage level x unit acres production x price election x share

- 60 Bushels APH yield
- <u>x .75</u> Coverage level
- 45 Bushels per acre guarantee
- <u>x 10</u> Acres
 - 450 Bushels unit guarantee
- 200 Bushels production
- 250 Bushels loss
- x \$2.60 Price election
 - \$650 Unit indemnity
- <u>x .667</u> Share
 - \$434 Final indemnity
