Coverage Levels and Premium Subsidies

Crop insurance premiums are subsidized as shown in the following table. Subsidy levels shown are the lowest available. Levels will vary based on individual policy selections. For example, if you select the 75-percent coverage level, the premium subsidy is 55 percent and your premium share is 45 percent of the base premium.

Coverage Level	50	55	60	65	70	75
Premium Subsidy	67	64	64	59	59	55
Your Share	33	36	36	41	41	45

Price Elections

A price election is the price you are paid per ton if you have a loss. This is based on the percentage of the established price you chose. For the 2015 crop year, you may choose 55 to 100 percent of the established price.

Coverage Options

Actual Production History (APH) - The only plan of insurance available for processing sweet corn. You choose the amount of your average yield you wish to insure (50-85 percent) and the percent of the RMA

established price (from 55-100 percent). If your production falls below the yield insured, you are paid a loss.

Replanting and Prevented Planting

Replanting - Replant payments are not available for processing sweet corn.

Prevented Planting - You may receive a prevented planting payment if you are unable to plant on or before the final planting date because of an insurable cause.

Loss Example

A loss occurs when crop production falls below your guaranteed tonnage. This example assumes 65-percent coverage level, a price election of \$99.00, an average yield of 10 tons per acre with 0.667 share, and production of 40 tons.

10	Ton APH yield
x 0.65	Coverage level
6.5	Ton per acre guarantee
x 10	Acres
65	Ton unit guarantee
- 40	Ton production
25	Ton loss
x \$99	Price election
\$2,475	Unit payment
x 0.667	Share
\$1,651	Final payment
