Coverage Levels and Premium Subsidies

Crop insurance premiums are subsidized as shown in the following table. For example, if you select the 75-percent coverage level for an Enterprise Unit, the premium subsidy is 77 percent and your premium share is 23 percent of the base premium.

	Coverage Level (percent)	50	55	60	65	70	75	80	85
Subsidy Factors	Enterprise Unit	80	80	80	80	80	77	68	53
	Basic Unit	67	64	64	59	59	55	48	38
	Optional Unit	67	64	64	59	59	55	48	38

Projected and Harvest Prices

Projected Price - Based on the Chicago Board of Trade November Futures Contract from January 15, 2017, to February 14, 2017.

Harvest Price - Based on the Chicago Board of Trade December Futures Contract from October 1, 2017, to October 31, 2017. Protects you when fall prices are above the projected price.

Endorsements

Downed Rice Endorsement - Compensates you for the additional costs from harvesting downed rice.

Replanting and Prevented Planting

Replanting - You may receive a replant payment if:

- Damage is from a covered cause of loss;
- The appraisal does not exceed 90 percent of your guarantee; and
- It is practical to replant.

Late Planting Period - If you choose to plant after the final planting date, your insurance guarantee is reduced by one percent for each day after the final planting date. After 25 days, your guarantee is 55 percent.

Prevented Planting - You may receive a prevented planting payment if you are unable to plant on or before the final planting date because of an insurable cause.

Loss Example

Under yield protection, a loss occurs when the total production (in pounds) of rice falls below the production guarantee.

Under revenue protection, a loss occurs when the value of production is less than the revenue protection guarantee because of a production loss and/or a loss of revenue.

Assume a 5,000 pound per acre APH yield, 75-percent coverage level, 100-percent price election, \$0.147 Projected Price, \$0.15 Harvest Price, and basic unit coverage. Higher of projected price or harvest price will be used to determine value.

Yield Protection Example

5,000	APH yield pounds/acre
<u>x 0.75</u>	Coverage level
3,750	Pound guarantee
<u>x \$0.147</u>	Projected price
\$551.25	Insurance guarantee
2,000	Pounds per acre produced
<u>x \$0.147</u>	Projected Price
\$294	Value of production
\$551.25	Insurance guarantee
<u>- \$294.00</u>	Value of production
\$257.00	Final payment

Revenue Protection Example

5,000	APH yield pounds/acre
<u>x 0.75</u>	Coverage level
3,750	Pound guarantee
<u>x \$0.15</u>	Price used to determine value
\$562.20	Insurance guarantee

2,000	Pounds per acre produced
<u>x \$0.15</u>	Harvested Price
\$300.00	Value of production
\$562.20	Insurance guarantee
<u>- \$300.00</u>	Value of production
\$262.00	Final payment
