Coverage Levels and Premium Subsidies

Crop insurance premiums are subsidized as shown in the following table. For example, if you select the 75-percent coverage level for an Enterprise Unit, the premium subsidy is 77 percent and your premium share is 23 percent of the base premium.

	Coverage Level (percent)	50	55	60	65	70	75	80	85
Subsidy Factors	Enterprise Unit	80	80	80	80	80	77	68	53
	Basic Unit	67	64	64	59	59	55	48	38
	Optional Unit	67	64	64	59	59	55	48	38

Price Elections

A price election is the price you are paid per pound if you have a loss.

Prices for types with true revenue coverage -

Projected and harvest prices for black, dark red kidney, navy, pinto, and small red types will be determined as shown in Section 7(e) of the dry bean revenue endorsement. Contact your insurance agent for established prices for dry bean varieties.

Prices for all other types - Harvest price will be equal to the projected price for all dry bean types not covered by the dry bean revenue endorsement.

Coverage Options

Yield Protection - Protects against a production loss.

Revenue Protection - Protects against loss of revenue due to a production loss, change in price, or a combination of both.

Revenue Protection with Harvest Price

Exclusion - Protects against loss of revenue due to a production loss, price decline, or a combination of both.

Catastrophic Risk Protection Coverage (CAT) - Available only with yield protection. Pays 50 percent of your average yield and 55 percent of the projected price. CAT has no premium but does have a \$300 administrative fee per crop per county.

Replanting and Prevented Planting

Practical to Replant - Your company will determine if it is practical to replant. The processor must agree, in writing, that it will accept production from replanted acreage.

Replant Provisions

You may receive a replant payment if:

- It is practical to replant; and
- The appraisal does not exceed 90 percent of your production guarantee.

Replant payments are not available on CAT coverage.

Late Planting Period - If you choose to plant after the final planting date, the insurance guarantee is reduced by one percent for each day after the final planting date. After 25 days, the guarantee is 60 percent.

Prevented Planting - You may receive a prevented planting payment if you are unable to plant on or before the final planting date because of an insurable cause.

Loss Example

Yield Protection Example - This example assumes 1,600 pounds per acre APH yield for navy type, 65-percent coverage level, and basic unit coverage.

$$\begin{array}{r} 1,600 \text{ pounds/acre APH yield} \\ \times 0.65 \text{ coverage level} \\ \hline 1,040 \text{ pound guarantee} \\ - 700 \text{ pounds/acre produced} \\ \hline 340 \text{ pounds/acre loss} \\ \times \$0.25 \text{ projected price} \\ \hline \mathbf{\$85.00 \text{ Final Payment per acre}} \end{array}$$

Revenue Protection Example:

$$\begin{array}{r} 1040 \text{ pound guarantee} \\ \times \$0.25 \text{ projected price} \\ \hline \$260.00 \text{ guarantee per acre} \end{array}$$
$$\begin{array}{r} 700 \text{ pounds/acre produced} \\ \times \$0.23 \text{ harvest price} \\ \hline \$161.00 \text{ revenue per acre} \end{array}$$
$$\begin{array}{r} 260.00 \text{ guarantee per acre} \\ - 161.00 \text{ revenue per acre} \\ \hline \mathbf{\$99.00 \text{ Final Payment per acre}} \end{array}$$
