Reporting Requirements

You must report all of your potato acreage, production, and any losses, when evident, to your insurance agent.

Coverage Levels and Premium Subsidies

Crop insurance premiums are subsidized as shown in the following table. Subsidy levels shown are the lowest available. Levels will vary based on individual policy selections. For example, if you select the 75-percent coverage level, the premium subsidy is 55 percent and your premium share is 45 percent of the base premium.

Item	Percent							
Coverage Level	50	55	60	65	70	75	80	85
Premium Subsidy	67	64	64	59	59	55	48	38
Your Share	33	36	36	41	41	45	52	62

Price Elections

A price election is the price you are paid per hundredweight if you have a loss. This is based on the percentage of the established price you chose.

Coverage Options

Actual Production History (APH) - You choose the amount of your average yield you wish to insure (50-75 percent) and the percent of the RMA predicted price (from 55-100 percent). If your production falls below your insured yield, you are paid for the insured loss.

Catastrophic Risk Protection (CAT) Coverage - Pays 50 percent of your average yield and 55 percent of the projected price.

Replanting and Prevented Planting

Replanting - Replant payments are not available for potatoes.

Late Planting - If you choose to plant after the final planting date, the insurance guarantee is reduced by one percent for each day after the final planting date. After 25 days, the guarantee is 25 percent.

Prevented Planting - You may receive a prevented planting payment if you are unable to plant on or before the final planting date because of an insurable cause.

Loss Example

You have a loss when crop production falls below the guaranteed hundredweight (cwt.) amount. This example assumes 65-percent coverage level, a price election of \$8.65 and an average yield of 250 cwt. per acre with 0.667 share.

250	Average yield cwt.
x 0.65	Coverage level
163	Cwt. per acre guarantee
x 100	Acres
16,300	Cwt. unit guarantee
- 3,400	Cwt. production
12,900	Cwt. loss
x \$8.65	Price election
\$111,585	Loss payment
x 0.667	Share
\$74,427	Final payment
