## 2010 COMMODITY INSURANCE FACT SHEET

# Grain Sorghum

## Missouri

### Crop Insured

The crop insured will be all the grain sorghum grown in the county on insurable acreage, for which premium rates are provided, in which you have a share, and planted for harvest as grain. Contact a crop insurance agent for more details.

### Counties Available

Grain sorghum insurance is available in 92 counties throughout Missouri.

Coverage in other counties may also be available by individual written agreement if certain criteria are met, including records for at least three years of production history. Contact your crop insurance agent for details on requesting a written agreement

### Causes of Loss

Adverse weather conditions<sup>1</sup>  
Failure of irrigation water supply<sup>2</sup>  
Fire<sup>3</sup>  
Insects<sup>4</sup>  
Plant disease<sup>4</sup>  
Wildlife

<sup>1</sup>Such as hail, freeze, excess wind, excess rain, and drought.

<sup>2</sup>If due to an insured cause of loss within the insurance period.

<sup>3</sup>If due to natural causes.

<sup>4</sup>Only if effective control measures do not exist for such infestation.

### Insurance Period

Coverage begins when the grain sorghum is planted and ends the earliest of: (1) total destruction of the crop, (2) abandonment of the crop, (3) completion of harvest, (4) final adjustment of a loss, (5) December 10.

### Reporting Requirements

**Acreage Report**—You must give a report of all your grain sorghum acreage in the county by the acreage reporting date.

### Important Dates

Sales Closing/Cancellation Date ..... March 15, 2010  
Earliest Planting Date<sup>1</sup> ..... April 21, 2010  
Final Planting Date<sup>1</sup> ..... June 20, 2010  
Final Planting Date<sup>2</sup> ..... June 25, 2010  
Acreage Report Date ..... July 15, 2010  
Premium Billing ..... October 1, 2010  
End of Insurance ..... December 10, 2010

<sup>1</sup>Excludes the following counties: Butler, Dunklin, Mississippi, New Madrid, Pemiscot, Ripley, Scott, and Stoddard, which have an Earliest Planting Date of April 11, and a Final Planting Date of June 10.

### Coverage Levels and Premium Subsidies

Grain sorghum may be insured at the coverage levels shown in the table below. Crop insurance premiums are subsidized as shown.

Item	Percent								
Coverage Level	50	55	60	65	70	75	80*	85*	90*
Premium Subsidy**	67	64	64	59	59	55	48	38	na
Your Premium Share**	33	36	36	41	41	45	52	62	na

\*Where applicable.

\*\*Applies to all plans of insurance except GRP and GRIP.

For example, if you select the 75-percent coverage level, the premium subsidy is 55 percent and your premium share is 45 percent of the base premium

Catastrophic coverage (CAT) is available at 50 percent of your APH yield and 55 percent of the price election. The total cost for CAT coverage will be an administrative fee of \$300 per crop per county, regardless of the acreage. Administrative fees, in addition to premium costs, for coverage levels above CAT are \$30 per crop per county.

## Price Elections

Price of compensation per bushel in case of loss:  
Established price is \$3.47/bushel.

## Insurance Units

**Basic Unit:** A basic unit includes all of your insurable grain sorghum acreage in the county by share arrangement. Premiums are reduced 10 percent for a basic unit.

**Optional Unit:** If a basic unit consists of two or more sections of land, and certain record keeping requirements are met, you may apply for optional units by section. The 10-percent premium discount will not apply.

**Enterprise Unit:** Generally, all the insured crop acreage in a county. Premium discounts apply. (CRC only)

## Plans of Insurance

**Actual Production History (APH)** — Production guarantee based on individual yield history. Optional, basic, and enterprise units are available.

**Crop Revenue Coverage (CRC)** — APH plus price protection with optional, basic and enterprise units.

## Replant Provisions (not available under catastrophic coverage)

A replanting payment is allowed only if the crop is damaged by a covered cause of loss to the extent that the remaining stand will not produce at least 90 percent of your bushel guarantee and it is practical to replant. The maximum replanting payment will be the lesser of 20 percent of the bushel guarantee; or 7 bushels times the base price times your insured share.

## Late and Prevented Planting

These provisions provide protection on acreage that is planted after the final planting date or that cannot be planted at all. Not applicable for GRP and GRIP plans of insurance. Please consult a crop insurance agent for details.

## Loss Example

A loss occurs when the bushels of grain sorghum produced for the unit fall below the production guarantee as a result of damage from a covered cause of loss. This example assumes a 80 bushel per acre APH yield, 75-percent coverage level, 100 percent of the established price, and basic unit coverage.

### APH Example

$$\begin{array}{r} 80 \text{ bushels per acre APH yield} \\ \times .75 \text{ coverage level} \\ \hline 60.0 \text{ bushel guarantee*} \\ - 30.0 \text{ bushels per acre actually produced} \\ \hline 30.0 \text{ bushels per acre loss} \\ \times 3.47 \text{ price election} \\ \hline \text{\$104.00 gross indemnity*} \end{array}$$

\*Figures shown are on a per acre basis; guarantees and losses paid are on a unit basis. See policy provisions.
