2010 COMMODITY INSURANCE FACT SHEET

Millet

Nebraska

Crop Insured

The crop insured will be all Proso millet grown in the county on insurable acreage, for which premium rates are provided, in which you have a share, and planted for harvest as grain to be used primarily as bird and livestock feed. Non-irrigated millet planted following a crop that has reached the headed (or budded) stage or a perennial hay crop is not insurable.

Counties Available

Insurance for millet is available in the following Nebraska counties: Banner, Box Butte, Chase, Cheyenne, Dawes, Deuel, Garden, Keith, Kimball, Morrill, Perkins, Scotts Bluff, and Sheridan.

Coverage in other counties may also be available by individual written agreement if certain criteria are met, including records for at least three years of production history.

Causes of Loss

Adverse weather conditions¹
Failure of irrigation water supply²
Fire⁴
Insects³
Plant disease³
Wildlife

¹Including hail, frost, freeze, excess precipitation and drought.

²If due to an insured cause of loss within the insurance period.

³But not damage due to insufficient or improper application of pest or disease control measures.

⁴If due to natural causes.

Insurance Period

Coverage begins when the millet is planted and ends the earliest of: (1) total destruction of the crop, (2) abandonment of the crop, (3) completion of harvest, (4) final adjustment of a loss, or (5) October 31, 2010.

Reporting Requirements

Acreage Report—You must give a report of all your millet acreage in the county by the acreage reporting date.

Important Dates

Sales Closing/Cancellation Date March 15, 2010
Final Planting Date..... June 25, 2010
Acreage Report Date June 30, 2010
Premium Billing Date October 1, 2010
End of Insurance October 31, 2010

Definitions

APH Yield — Actual Production History (APH) yield used to determine the production guarantee. The APH yield is based on up to 10 years of actual, assigned yields, adjusted and/or unadjusted transitional yields.

Unit — The insurable acreage used to determine the APH yield, the production guarantee, and any indemnity.

Production Guarantee — Number of bushels guaranteed per unit. Multiply your APH yield per acre times the coverage level percentage you select times the number of acres in the unit.

Late Planting Period — The period that begins the day after the final planting date and ends 20 days after the final planting date.

Swathed — Severance of the stem and grain head from the ground without removal of the seed from the head and placing into a row.

Coverage Levels and Premium Subsidies

Millet may be insured at the coverage levels shown in the table below. Crop insurance premiums are subsidized as shown.

Item	Percent					
Coverage Level	50	55	60	65	70	75
Premium Subsidy	67	64	64	59	59	55
Your Premium Share	33	36	36	41	41	45

For example, if you select the 75-percent coverage level, the premium subsidy is 55 percent and your premium share is 45 percent of the base premium. Catastrophic coverage (CAT) is available at 50 percent of your APH yield and 55 percent of the established price election. the total cost for CAT coverage will be an administrative fee of \$300 per crop per county, regardless of the acreage. Administrative fees, in addition to premium costs, for coverage levels above CAT are \$30 per crop per county.

Price Elections

Price of compensation per bushel in case of loss:
Established price is \$3.35 per bushel.

Insurance Units

Basic Unit: A basic unit includes all of your insurable millet acreage in the county by share arrangement. Premiums are reduced 10 percent for a basic unit.

Optional Unit: If a basic unit consists of two or more sections of land, and certain record keeping requirements are met, you may apply for optional units by section. The 10 percent premium discount will not apply.

Plans of Insurance

APH is the only plan of insurance available for millet. The production guarantee is based on individual yield history. Optional and basic units are available.

Replant Provisions

No replant payment is available for millet.

Late and Prevented Planting

A late planting period is applicable. Your prevented planting coverage will be 60 percent of your production guarantee for timely planted acreage. These provisions provide protection on acreage that is planted after the final planting date or that cannot be planted. Please consult a crop insurance agent for details.

Loss Example

A loss occurs when the bushels of millet produced for the unit fall below the production guarantee as a result of damage from a covered cause of loss. This example assumes a 40 bushel per acre APH yield, 75 percent coverage level, 100 percent of the established price, and basic unit coverage.

$$\begin{array}{r} 40 \text{ bushels per acre APH yield} \\ \times .75 \text{ coverage level} \\ \hline 30 \text{ bushel guarantee*} \\ - 10 \text{ bushels per acre actually produced} \\ \hline 20 \text{ bushels} \\ \times \$3.35 \text{ price election} \\ \hline \text{\$67.00 gross indemnity*} \end{array}$$

*Figures shown on a per acre basis; guarantees and losses are paid on a unit basis. See policy provisions.
