INFORMATIONAL MEMORANDUM

TO: All Approved Insurance Providers Writing in the State of Missouri

FROM: Rebecca Davis /s/ *Rebecca Davis*
Director

SUBJECT: Actuarial Rates Resulting from Breached Levees in Holt County,
Missouri – *Update of June 4, 2012 memo for spring planted crops to
account for repair of breached levee*

I. BACKGROUND

Due to the 2011 flood event, levees along the Missouri River and tributaries in Holt County, Missouri were breached. The following is a 2013 crop year policy provision in the Special Provisions for spring crops in Holt County:

“Land flooded due to a breach in a levee resulting from prior year(s) flooding is insurable. The applicable rate will be assigned based on conditions of the levee and soils on the latter of the sales closing date or earliest planting date. If, by that date, the levee has not been repaired to prior specifications, or if damaged soil (if any) has not been restored to at least the same crop yield potential as prior to the flood event, the land will be classified as high risk and will have the highest rate classification in the county. However, if the levee has been repaired to prior specifications and the soil has at least the same crop yield potential as before the flood, the land will be classified as shown on the current crop year Actuarial Map.”

II. STATUS OF BREACHED LEVEES AFFECTING HOLT COUNTY MISSOURI

A. Repaired to Prior Specifications:

The following breached levee(s) have been repaired to prior specifications:
