

# Topeka Regional Office — Topeka, KS

Revised February 2014

## **Crop Insured**

Rye is insurable if:

- It is all the rye grown in the county on insurable acreage;
- Premium rates are provided;
- You have a share; and
- It is planted for harvest as grain under the Small Grains Crop Provisions and the Common Crop Insurance Policy.

Rye is not insurable (unless insurance is allowed by a written agreement) if it is:

- Interplanted with another crop;
- Planted into a grass or legume, unless excepted by the Natural Resources Conservation Service's <u>cover crop</u> guidelines; or
- Planted as a nurse crop, unless planted as a nurse crop for new forage seeding, but only if seeded at a normal rate and intended for harvest as grain.

#### **Counties Available**

Rye insurance is available in Antelope, Pierce, and Sheridan counties. Coverage in other counties may also be available by individual written agreement if certain criteria are met, including records for at least 3 years of production history. Contact your crop insurance agent for details on requesting a written agreement.

## **Causes of Loss**

You are protected against the following:

- Adverse weather conditions, including natural perils such as hail, frost, freeze, wind, drought, and excess moisture;
- Failure of irrigation water supply, if caused by an insured peril during the insurance year;
- Fire, if due to natural causes;
- Insect damage, but not damage due to insufficient or improper application of control measures;
- Plant disease, but not damage due to insufficient or improper application of control measures; or
- Wildlife.

## **Insurance Period**

Insurance coverage begins on the later of:

- Date we accept your application; or
- Date when the rye is planted by the final planting date designated.

Insurance coverage ends with the earliest occurrence of one of the following:

- Total destruction of the crop;
- Harvest of the unit;
- Final adjustment of a loss on the unit;
- Abandonment of the crop; or
- October 31.

Any acreage of rye damaged before the final planting date, to the extent that producers in the area would not normally further care for the crop, must be replanted to an appropriate type of rye unless the insurance provider agrees that replanting is not practical.

### **Important Dates**

Sales Closing Date	September 30, 2013
Cancellation Date	September 30, 2013
Final Planting Date	September 30, 2013
Acreage Report Date	November 15, 2013
Premium Billing Date	July 1, 2014
End of Insurance	October 31, 2014

## **Reporting Requirements**

**Acreage Report** - You must give a report to your crop insurance agent of all your rye acreage in the county by the acreage reporting date.

#### **Coverage Levels and Premium Subsidies**

Rye may be insured at the coverage levels shown. Crop insurance premiums are subsidized as shown.

For example, if you select the 75-percent coverage level, the premium subsidy is 55 percent and your premium share is 45 percent of the base premium.

For coverage levels above the Catastrophic Risk Protection (CAT) level, in addition to premium costs, administrative fees are \$30 per crop per county.

## **Catastrophic Coverage**

CAT is available at 50 percent of your actual production history (APH) yield and 55 percent of the price election. The total cost for CAT coverage is an administrative fee of \$300 per crop, per county regardless of the acreage.

Subsidy Factor	Percent						
Coverage Level	CAT	0.50	0.55	0.60	0.65	0.70	0.75
Basic Unit	1.000	0.67	0.64	0.64	0.59	0.59	0.55
Optional Unit		0.67	0.64	0.64	0.59	0.59	0.55

#### **Price Elections**

Price of compensation per bushel in case of loss. The contract price is only available for certified organic rye. See the Contract Price Addendum for details.

Established price	\$6.85	per	bushel
CAT price	\$3.77	per	bushel

#### **Insurance Units**

**Basic Unit** - A basic unit includes all of your insurable rye in the county by share arrangement. Premiums are reduced 10 percent for a basic unit.

**Optional Unit** - If a basic unit consists of two or more sections of land and certain recordkeeping requirements are met, you may apply for optional units by section. The 10-percent premium discount will not apply.

#### **Insurance Plans**

APH is the only insurance plan available for rye. The production guarantee is based on your individual yield history.

#### **Replant Provisions**

No replanting payment is available in counties where rye is insurable.

#### Late and Prevented Planting

A late planting period is applicable. Your prevented planting coverage is 60 percent of your production guarantee for timely planted acreage. If you have additional coverage, you may pay an additional premium and increase your prevented planting coverage to a higher level. These provisions provide protection on acreage that is planted after the final planting date or that cannot be planted. Please consult a crop insurance agent for details.

#### **Loss Example**

A loss occurs when the bushels of rye produced for the unit fall below the production guarantee as a result of damage from a covered cause of loss. Assume a 22 bushel per acre APH yield, 65-percent coverage level, 100 percent of the established price, and basic unit coverage.

22 Bushels per acre APH yield

Coverage level 14.3 Bushel guarantee

7.0 Bushels per acre actually produced

7.3 Bushels loss x 6.85 Price election

\$50.00 Net indemnity

Figures shown are by acre basis. Guarantees and losses are paid by unit. See policy provisions for more information.

## Where to Buy Crop Insurance

All multi-peril crop insurance, including CAT policies, are available from private insurance agents. A list of crop insurance agents is available on the RMA website at: www3.rma.usda.gov/apps/agents/.
