

Topeka Regional Office — Topeka, KS

Revised September 2014

Wheat

Kansas

Crop Insured

Wheat is insurable if:

- It is all the wheat grown in the county on insurable acreage;
- Premium rates and program dates are provided;
- You have a share; and
- It is planted for harvest as grain under the Common Crop Insurance Policy.

Wheat may not be insured if:

- It is interplanted with another crop;
- Planted into a grass or legume, unless excepted; or
- Planted as a nurse crop.

Counties Available

Winter wheat is insurable in all Kansas counties.

Causes of Loss

You are protected against the following:

- Adverse weather conditions, including natural perils such as hail, frost, freeze, wind, drought, and excess moisture;
- Failure of irrigation water supply, if caused by an insured peril during the insurance year;
- Fire, if caused by an insured peril during the insurance year;
- Insect damage, but not damage due to insufficient or improper application of control measures;
- Plant disease, but not damage due to insufficient or improper application of control measures; or
- Wildlife.

Insurance Period

Insurance coverage begins on the later of:

- Date your application is accepted; or
- Date when the wheat is planted by the final planting date designated.

Insurance coverage ends with the earliest occurrence of one of the following:

- Total destruction of the crop;
- Harvest of the unit;
- Final adjustment of a loss on the unit;
- Abandonment of the crop; or
- October 31.

Important Dates

Sales Closing Date.....September 30, 2014
 Cancellation Date.....September 30, 2014
 Final Planting Date.....Varies by County
 Contact your agent or for more information see:
www.rma.usda.gov/aboutrma/fields/ks_rso/.
 Acreage Report Date.....December 15, 2014
 Premium Billing Date.....July 1, 2015
 End of Insurance.....October 31, 2015

Reporting Requirements

Acreage Report - You must report all of your wheat acreage in the county by the acreage reporting date.

Special Provisions of Insurance

Insurance restrictions apply to acreage that has been planted using broadcast seeding methods. Insurance is available for wheat produced using organic farming practices.

Definitions

Actual Production History (APH) Yield - APH yield is used to determine the production guarantee. The APH yield is based on up to 10 years of actual assigned yields and adjusted and/or unadjusted transitional yields.

Coverage Levels

Wheat may be insured at the coverage levels shown in the table. Crop insurance premiums are subsidized as shown. The Whole Farm Unit is not available for the Yield Protection Plan.

If you choose the 75-percent coverage level and Enterprise Units, your coverage is 75 percent of your approved APH yield, the premium subsidy is 77 percent, and your premium share is 23 percent of the base premium.

Coverage Level		0.50	0.55	0.60	0.65	0.70	0.75	0.80	0.85
Subsidy Factors	Enterprise Unit	0.800	0.800	0.800	0.800	0.800	0.770	0.680	0.530
	Basic Unit	0.670	0.640	0.640	0.590	0.590	0.550	0.480	0.380
	Optional unit	0.670	0.640	0.640	0.590	0.590	0.550	0.480	0.380
	Whole Farm Unit	0.800	0.800	0.800	0.800	0.800	0.800	0.710	0.560

For coverage levels above the Catastrophic Risk Protection (CAT) level, in addition to premium costs, administrative fees are \$30 per crop, per county.

CAT coverage is available at 50 percent of your APH yield and 55 percent of the projected price. The total cost for CAT coverage is an administrative fee of \$300 per crop, per county regardless of the acreage. CAT is available for the Yield Protection Plan only.

Price Elections

Prices are calculated according to the Commodity Exchange Price Provisions. Kansas winter wheat prices are based on the July futures market price for wheat. The projected price discovery period is August 15 through September 14. The harvest price discovery period is June 1 through June 30. These prices are released no later than 3 business days following the end of the price discovery period. Depending on the insurance plan, these prices are used for compensation per bushel in case of loss. Contact your agent or for more information see:

www.rma.usda.gov/tools/pricediscovery.html.

The contract price is only available for certified organic wheat. See the Contract Price Addendum for details.

Insurance Units

Basic Unit - A basic unit includes all of your insurable wheat acreage in the county by share arrangement. Premiums are reduced 10 percent for a basic unit.

Optional Unit - If a basic unit consists of two or more sections of land and certain recordkeeping requirements are met, you may apply for optional units by section. The 10 percent premium discount will not apply.

Enterprise Unit - Generally, all the insured crop acreage in a county. Premium discounts apply.

Whole Farm Unit - Generally, all the insured crops in the county that are covered by the insurance plan. Premium discounts apply.

Insurance Plans

Common Crop Insurance Policy Basic Provisions - Yield Protection Plan is an insurance plan that only provides protection against a production loss and is available only for crops for which revenue protection is available.

Revenue Protection Plan is an insurance plan that provides protection against revenue loss due to a production loss, price decline or increase, or a combination of both.

Harvest Price Exclusion provides revenue protection, though the use of the harvest price is excluded when determining your revenue protection guarantee. This election is continuous unless canceled by the cancellation date.

Trend-Adjusted APH Yield Option

The Trend-Adjusted APH Yield Option adjusts yields in APH databases to reflect increases in yields through time in the county. Trend adjustments are made on each eligible yield within a qualifying APH database based on the county's historical yield trend, which is provided in the county actuarial documents. The approved APH yield is calculated using trend-adjusted yields and any other applicable yields within the APH database. It may not be available for all practices and the factor may vary by practice. This option is not available under CAT or with ARPI insurance plans.

Area Risk Protection Insurance (ARPI) Basic Provisions

ARPI may not be available in every county. Some of the information on this fact sheet does not apply. For more information see the ARPI fact sheet at: www.rma.usda.gov/pubs/rme/arpi.pdf.

Supplemental Coverage Option

The Supplemental Coverage Option (SCO) is a new crop insurance option that provides additional coverage for a portion of your underlying crop insurance policy deductible. The amount of SCO coverage depends on the liability, coverage level, and approved yield of your underlying policy. SCO may not be available in every county. For further

information visit the SCO Fact Sheet at:
www.rma.usda.gov/news/currentissues/farmbill/2014NationalSupplementalCoverageOption.pdf

Late and Prevented Planting

These provisions provide protection on acreage planted after the final planting date or that cannot be planted. Please contact a crop insurance agent for details.

Loss Example

Under yield protection a loss occurs when the bushels of wheat produced for the unit fall below the production guarantee due to damage from a covered cause of loss. Under revenue protection a loss occurs when the value of production-to-count is less than the revenue protection guarantee due to a production loss and/or a revenue loss. Assume a 40 bushels per acre APH yield, 75-percent coverage level, \$6.30 winter projected price, \$6.00 harvest price, and basic unit coverage.

Yield Protection Example

40	APH yield bushels/acre
x 0.75	Coverage level
30	Bushel guarantee
x \$6.30	Projected price
\$189.00	Insurance guarantee
10	Bushels per acre produced
x \$6.30	Projected price
\$63.00	Value of production
\$189.00	Insurance guarantee
- \$63.00	Value of production
\$126.00	Gross indemnity (per acre)

Revenue Protection Example

40	APH yield bushels/acre
x 0.75	Coverage level
30	Bushel guarantee
x \$6.30	(Higher of Projected Price or Harvest Price)
\$189.00	Insurance guarantee
10	Bushels per acre produced
x \$6.00	Harvested price
\$60.00	Value of production
\$189.00	Insurance guarantee
- \$60.00	Value of production
\$129.00	Gross indemnity (per acre)

The price used to determine value in the revenue protection example above is the higher of the projected price or the harvest price. Figures are shown per acre. Guarantees and losses are paid by unit. See policy provisions or ask your crop insurance agent for more information.

Where to Buy Crop Insurance

All multi-peril crop insurance, including CAT policies, are available from private insurance agents. A list of crop insurance agents is available at all USDA service centers and on the RMA website at: www3.rma.usda.gov/apps/agents/.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or a part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at 202-720-2600 (voice and TDD).

To file a complaint of discrimination, complete, sign and mail a program discrimination complaint form, (available at any USDA office location or online at www.ascr.usda.gov), to: United States Department of Agriculture; Office of the Assistant Secretary for Civil Rights; 1400 Independence Ave., SW; Washington, DC 20250-9410. Or call toll free at (866) 632-9992 (voice) to obtain additional information, the appropriate office or to request documents. Individuals who are deaf, hard of hearing, or have speech disabilities may contact USDA through the Federal Relay service at (800) 877-8339 or (800) 845-6136.
