

## Topeka Regional Office — Topeka, KS

Revised November 2014

# Grapes

## Missouri

### Crop Insured

Grapes are insurable if:

- They are insurable types listed in the Special Provisions;
- Premium rates are provided;
- You have a share;
- Grown for wine, juice, raisins, or canning (if such grapes are put to another use, such as table grapes, they will be counted as production-to-count);
- Grown in a vineyard that, if inspected, is considered acceptable by us;
- They have reached the fourth growing season after being set out for Concord or fifth growing season after being set out for all other varieties; and
- They have produced an average of at least two tons of grapes per acre in at least 1 of the 3 crop years immediately preceding the insured crop year, unless we inspect and allow insurance on acreage that has not produced this amount.

### Counties Available

Grapes are insurable in Phelps County. Coverage in other counties may also be available by written agreement if certain criteria are met, including records for at least 3 years of production history.

### Causes of Loss

You are protected against the following:

- Adverse weather conditions;
- Earthquake;
- Failure of irrigation water supply, if caused by an insured peril during the insurance period;
- Fire, unless weeds and other forms of undergrowth have not been controlled or pruning debris has not been removed from the orchard;
- Insects, but not damage due to insufficient or

improper application of pest control measures, and Phylloxera, regardless of cause;

- Plant disease, but not damage due to insufficient or improper application of disease control measures;
- Volcanic eruption;
- Wildlife; or
- All other natural causes of loss that cannot be prevented.

### Insurance Period

For the year of application, coverage begins on:

- November 21; or
- The day immediately following the end of the insurance period for the prior crop year, for each subsequent crop year that the policy remains continuously in force.

Coverage ends with the earliest occurrence of one of the following conditions:

- Total destruction of the insured crop;
- Harvest of the insured crop;
- Final adjustment of a loss on a unit;
- November 20; or
- Abandonment of the insured crop.

### Important Dates

Sales Closing ..... November 20, 2014  
Cancellation Date ..... November 20, 2014  
Production Reporting Date ..... January 15, 2015  
Acreage Report Date ..... January 15, 2015  
Premium Billing ..... August 15, 2015  
End of Insurance ..... November 20, 2015

### Reporting Requirements

**Acreage Report** - A report of all your grape acreage, by type, in the county is due to your crop insurance agent by the Acreage Reporting Date.

## Definitions

**Type** – A category of grapes designated in the Special Provisions.

**Variety** – A kind of grape that is distinguished from any other by unique characteristics such as, but not limited to, size, color, skin thickness, acidity, flavors, and aromas. Insurable Varieties:

- Group A: Buffalo, Catawba, Clinton, Concord, Fredonia, Ives, Niagara, Starkstar and Steuben.
- Group B: Delaware, Diamond, Dutchess, Elvira, French/American Hybrids, Isabella, Missouri Riesling, and Norton (Cynthiana).

## Coverage Levels and Premium Subsidies

You may choose only one coverage level and price election for each grape type in the county. The coverage level you choose for each grape type is not required to have the same percentage relationship.

The price elections you choose for each type is not required to have the same percentage relationship to the maximum price election we offer for each type. For example, if you choose the 75-percent coverage level and 100 percent of the maximum price election for one type, you may choose the 65-percent coverage level and 75 percent of the maximum price election for another type. If you choose the Catastrophic Risk Protection (CAT) insurance level for any grape type, the CAT coverage level will be applicable to all insured grape acreage in the county.

The grapes policy guarantees a certain amount of production, depending on the level of coverage chosen. Crop insurance premiums are subsidized as shown in the table. For example, if you choose the 75-percent coverage level, the premium subsidy is 55 percent and your premium share is 45 percent of the base premium. For coverage levels above the CAT level, in addition to premium costs, administrative fees are \$30 per crop, per county.

Subsidy Factor	Percent								
Coverage Level	CAT	0.50	0.55	0.60	0.65	0.70	0.75	0.80	0.85
Basic Unit	1.000	0.670	0.640	0.640	0.590	0.590	0.550	0.480	0.380
Optional Unit		0.670	0.640	0.640	0.590	0.590	0.550	0.480	0.380

## Catastrophic Coverage

If you choose the CAT insurance level for any grape type, the CAT coverage level will be applicable to all insured grape acreage in the county. CAT coverage is available at 50 percent of your actual production history (APH) yield and 55 percent of the established

price election. The total cost for CAT coverage is an administrative fee of \$300 per crop, per county regardless of the acreage.

## Price Elections

The price at which you are compensated, per ton, in the event of a loss, based on the percentage of the established price you have chosen. Price election percentage choices for this crop year are 55 percent to 100 percent of the prices shown below. The established price for grapes in Missouri is:

Group A ..... \$730 per ton  
Group B ..... \$930 per ton

The price used to determine your indemnity on un-harvested acreage is the price election minus the harvest cost (\$100 per ton).

## Insurance Units

**Basic Unit** - A basic unit includes all of your insurable grapes acreage in the county by share arrangement. Premiums are reduced 10 percent for a basic unit.

**Optional Unit** - A basic unit may be divided into optional units if each optional unit is:

- Located on non-contiguous land; or
- By type.

## Insurance Plans

**Actual Production History (APH)** - Production guarantee based on individual yield history. Protection is for yield loss only.

## Loss Example

A loss occurs when the crop production falls below the guaranteed tonnage amount because of damage from a covered cause of loss.

This example assumes a mature grape loss at the 65-percent coverage level, a 100 percent price election for Group A of \$730.00, and an approved APH yield of 2.2 tons per acre.

2.2	Tons/acre APH yield
x 0.65	Coverage level
1.43	Tons/acre guarantee
x 10.0	Acres
14.3	Ton/acre unit guarantee
- 10.0	Tons harvested production
4.3	Tons loss
x \$730.00	Price election
\$3,139.50	Unit indemnity
x 1.000	Share
\$3,139.00	Final unit indemnity

Guarantees and losses are paid by unit. See policy provisions or ask your crop insurance agent for more information.

### **Where to Buy Crop Insurance**

All multi-peril crop insurance, including CAT policies, are available from private insurance agents. A list of crop insurance agents is available at all USDA service centers and on the RMA website at: [www3.rma.usda.gov/apps/agents/](http://www3.rma.usda.gov/apps/agents/).
