

Topeka Regional Office — Topeka, KS

Revised February 2017

Dry Peas

Nebraska

Crop Insured

Dry peas are insurable if:

- They are all the dry peas types grown in the county on insurable acreage;
- Premium rates are provided;
- You have a share;
- They are planted for harvesting once maturity is reached as dry peas or contract seed peas, if the processor/seed company contract is executed on or before the acreage reporting date; and
- They are planted under the Dry Peas Crop Provisions and the Common Crop Insurance Policy.

Dry peas are not insurable unless insurance is allowed by the special provisions or a written agreement, if they are:

- Interplanted with another crop;
- Planted into an established grass or legume;
- Planted as a nurse crop;
- Planted to plow down, graze, harvest as hay or otherwise not harvest as a mature dry peas crop; or
- Spring smooth green or yellow type dry peas that are planted on acreage that does not meet the rotation requirements contained in the special provisions.

Dry peas are not insurable if they follow a cover crop that does not meet the criteria outlined in the Insurance Availability section of the special provisions. Contact a crop insurance agent for details.

Counties Available

Dry peas are insurable in Banner, Box Butte, Cheyenne, Dawes, Deuel, Garden, Keith, Kimball, Morrill, Perkins, Scotts Bluff, Sheridan, and Sioux counties. Coverage in other counties may also be available by individual written agreement if certain criteria are met. Contact your crop insurance agent

for details on requesting a written agreement.

Causes of Loss

You are protected against the following:

- Adverse weather conditions;
- Earthquake;
- Failure of irrigation water supply, if caused by an insured peril during the insurance year;
- Fire;
- Insect damage, but not damage due to insufficient or improper application of control measures;
- Plant disease, but not damage due to insufficient or improper application of control measures;
- Volcanic eruption; or
- Wildlife.

Insurance Period

Insurance coverage begins on the later of:

- Date your application is accepted; or
- Date when the dry peas are planted by the final planting date designated.

Insurance coverage ends with the earliest occurrence of one of the following:

- Total destruction of the crop;
- Harvest of the unit;
- Final adjustment of a loss on the unit;
- Abandonment of the crop; or
- September 30.

Important Dates

Sales Closing Date.....	March 15, 2017
Cancellation Date.....	March 15, 2017
Earliest Planting Date	March 15, 2017
Final Planting Date	April 30, 2017
Acreage Report Date.....	July 15, 2017
Premium Billing Date.....	August 15, 2017
End of Insurance.....	September 30, 2017

Reporting Requirements

Acreage Report - You must give a report to your crop insurance agent of all your dry pea acreage in the county by the acreage reporting date.

Coverage Levels and Premium Subsidies

Dry peas may be insured at the coverage levels shown. Crop insurance premiums are subsidized as shown. For example, if you have basic units and you choose the 75-percent coverage level, the premium subsidy is 55 percent and your premium share is 45 percent of the base premium.

Coverage Level	.50	.55	.60	.65	.70	.75	.80	.85
Subsidy Factors								
Enterprise Unit	.80	.80	.80	.80	.80	.77	.68	.53
Basic Unit	.67	.64	.64	.59	.59	.55	.48	.38
Optional unit	.67	.64	.64	.59	.59	.55	.48	.38

For coverage levels above the Catastrophic Risk Protection (CAT) level, in addition to premium costs, administrative fees are \$30 per crop per county.

Catastrophic Coverage

CAT is available at 50 percent of your APH yield and 55 percent of the price election. The total cost for CAT coverage will be an administrative fee of \$300 per crop per county, regardless of the acreage.

Price Elections

The established price of compensation per pound in case of loss for smooth green or yellow is \$0.10 per pound. The contract price is only available for certified organic dry peas. See the Contract Price Addendum for details.

Insurance Units

Basic Unit - A basic unit includes all of your insurable dry peas in the county by share arrangement. Premiums discounts may apply.

Optional Unit - If a basic unit consists of two or more sections of land and certain record keeping requirements are met, you may apply for optional units by section.

Enterprise Unit (EU) - Generally, all insured crop acreage in a county. Separate EUs for irrigated and non-irrigated acreage are allowed in counties where irrigated and non-irrigated practices are insurable and EUs are available. Premium discounts

may apply.

Plans of Insurance

APH is the only plan of insurance available for dry peas. The production guarantee is based on your individual yield history.

Coverage Level by Practice

If you produce a crop on both irrigated and non-irrigated land, you can choose a different coverage level for each production practice. The election is available for additional coverage policies only when the actuarial documents provide separate coverage by irrigated and non-irrigated practices. Even if you have an additional coverage level policy, purchasing the CAT endorsement is not allowed as one of the separate coverage levels.

Supplemental Coverage Option (SCO)

SCO is a new crop insurance option that provides additional coverage for a portion of your underlying crop insurance policy deductible. The amount of SCO coverage depends on the liability, coverage level, and approved yield of your underlying policy. SCO may not be available in every county. For more information visit the SCO fact sheet at www.rma.usda.gov/pubs/rme/fctsht.html.

Replant Provisions

Replant provisions are available. The maximum amount of the replanting payment per acre will be the lesser of 20 percent of the production guarantee or 200 pounds, multiplied by your price election, multiplied by your share. Please see Dry Pea Crop Provisions for a full list of replant provisions.

Late and Prevented Planting

A late planting period is applicable. The Dry Peas Crop Provisions provide protection on acreage that is planted after the final planting date. As per the special provisions, the late planting period begins the day after the final planting date for the insured crop and ends 15 days after the final planting date.

Your prevented planting coverage will be 60 percent of your production guarantee for timely planted acreage. If you have additional coverage, you may pay an additional premium and increase your prevented planting coverage to a higher level

specified in the actuarial documents. Please consult a crop insurance agent for details.

Loss Example

A loss occurs when the pounds of dry peas produced for the unit fall below the production guarantee as a result of damage from a covered cause of loss. This example assumes a 1,460 pounds per acre APH yield for smooth green type dry peas, 65-percent coverage level, 100 percent of the established price, and basic unit coverage.

1,460	Pounds per acre APH yield
<u>x 0.65</u>	Coverage level
949	Pounds guarantee
<u>- 249</u>	Pounds per acre actually produced
700	Pounds loss
<u>x 0.10</u>	Price election
\$70.00	Indemnity

Figures shown are per acre. Guarantees and losses are paid on a unit basis. See policy provisions.

Where to Buy Crop Insurance

All multi-peril crop insurance, including CAT policies, are available from private crop insurance agents. A list of crop insurance agents is available at all USDA service centers and on the RMA website at www.rma.usda.gov/tools/agent.html.
