

2011 COLORADO ACTUARIAL DOCUMENTS CHANGES

11/30 FILING

EXPANSION: None

DELETIONS: None

DATES: No Change

STATEMENTS: For **Dry Beans** in Crowley and Pueblo Counties – statement removed that read, “Acreage of the designated crop/type/practice not located in the specified FCI-33 Map Area and/or Transitional Yield Locator Map area shall have the yield/yield factor shown on the Transitional Yield Table.” For **Dry Beans** in all counties, - statement removed that read, “Other type or classes of Beans will be insurable only by written agreement.” The High Risk area statement has been modified for **all crops** in all counties with a high risk map to reflect changes to ITM. The organic farming practice and organic rate factor statements have been removed from **all crops** in all counties. The organic APH (database) statement has been modified for **all crops** in all counties as new practices have been created for organics. For **Onions**, the settlement of claim statement has been shortened, but the percent of damage referenced in Section 13(d) of the onion crop provisions continues to be 40 percent. The **Oats** date statement in Elbert County has been deleted. For **Potatoes** in Alamosa, Conejos, Costilla, Rio Grande, and Saguache – statement removed that read. “Potato acreage is insured under the basic coverage excluding options.” For **Soybeans** and **Corn**, a new organic price statement has been added. For **Sunflowers** in Baca, Kiowa, and Prowers County – statement removed that read, “Classification 001 is applicable to all irrigated producers.” For **Corn**, there are two statements that have been removed. The first deals with the settlement of claim statement dealing with acreage that you intend to harvest in a manner other than you reported it for coverage. The second deals with the insured crop statement that allows for insurance on high-oil blends and commercial varieties of high-protein hybrids without a written agreement. The last paragraph of the skip-row **Corn** statement has been modified. The language regarding the 75 percent planting population has been replaced with, “In addition, skip row corn must be seeded at a rate to produce at least the yield used to determine the production guarantee.” New falling number discount table located in the Quality Statement for **Wheat**. Quality Factors have been updated.

PRACTICES/TYPES: Organic (certified) and Organic (transitional) are new practices for **all 11/30 crops**.

MAPS: Refer to attached Summary of Change Log. A new Final Plant Date map for Oats was created for Elbert County. The date map replaces the date statement that had been on the **Elbert County** Special Provisions.

TRANSITIONAL YIELDS: Transitional Yields were reviewed for Barley.

REFERENCE RATES AND YIELDS: Reference Rates and Yields were reviewed for **Barley** in **Adams, Alamosa, Arapahoe, Boulder, Conejos, Costilla, Delta, Jefferson, La Plata, Larimer, Logan, Mesa, Moffat, Montezuma, Montrose, Morgan, Phillips, Rio Blanco, Rio Grande, Routt, Saguache, Sedgwick, Washington, Weld, and Yuma Counties**.

OTHER: Biotech Endorsement (BE) for **Corn** – the option rates for BE are now found on the rates tab under the Optional Coverage Rate(s) heading. Coverage level for **Sunflowers** now includes the 80-85 percent.

NOTE: *This is not an official document. For all official changes, refer to the 2011 Crop Year State Summary of Changes that will be issued by the Actuarial Division.*
