Processors of Green Peas and Sweet Corn

Subject: Green Pea and Sweet Corn Variety Lists for 2006

We have updated and enclosed the green pea and sweet corn variety lists for 2006 that are used in providing crop insurance for these crops in Iowa, Minnesota, and Wisconsin. These lists are also available on the St. Paul Regional Office page of the RMA website at: www.rma.usda.gov/aboutrma/fields/mn_rso

Before we updated the lists this year, we contacted the processors of these crops and asked them to add new varieties they intend to grow for 2006 and to delete any varieties that are no longer being grown. The 2006 lists have been updated based on the responses we received from the processors.

In addition to adding and deleting varieties, one green pea variety and two sweet corn varieties have been moved from one type to another type. This was done based on information received from the processors. The varieties affected are:

Green Peas

<u>Variety</u>	<u>2005 Type</u>	<u>2006 Type</u>
Citation	614 Mid-Season	615 Late Season

Sweet Corn

<u>Variety</u>	<u>2005 Type</u>	<u>2006 Type</u>
Dynamo	Type 082	Type 081
Prelude	Type 082	Type 081

For the classification of varieties not found on these lists, contact the St. Paul Regional Office at 651/290-3304.
