2009 COMMODITY INSURANCE FACT SHEET

Potatoes

Wisconsin

Crop Insured

The crop insured will be all the potatoes you have in the county planted with certified seed on insurable acreage, for which premium rates are provided, in which you have a share, and planted for harvest as certified seed or human consumption. Specialty types, such as fingerlings, and other potatoes are not insurable unless a written agreement provides for such insurance.

Counties Available

Potatoes are insurable in 17 counties in Wisconsin. In counties where premium rates are not published, potatoes may be insurable by written agreement.

Causes of Loss

Adverse weather conditions¹
Failure of irrigation water supply²
Fire³
Insects⁴
Plant disease⁴
Wildlife

¹Including hail, frost, freeze, drought, and excess precipitation. ²If caused by an insured cause of loss. ³If due to natural causes. ⁴But not damage due to insufficient or improper application of pest or disease control measures.

Insurance Period

Insurance coverage will begin on the later of the date we accept your application or the date when the potatoes are planted, and will end at the earliest of: (1) total destruction of the crop, (2) harvest of the unit, (3) final adjustment of a loss, (4) October 15, 2009 or, (5) abandonment of the crop.

Reporting Requirements

Acreage Report — You must give a report of all your potato acreage in the county by the acreage reporting date.

Important Dates

| | |
|---------------------------------------|-----------|
| Sales Closing/Cancellation Date | March 15 |
| Final Planting Date (North) | June 5 |
| Final Planting Date (Central) | May 25 |
| Final Planting Date (South) | June 10 |
| Acreage Reporting Date | July 15 |
| Premium Billing Date | October 1 |
| Production Reporting Date | April 29 |

Definitions

APH Yield — Actual production history (APH) yield used to determine the production guarantee. The APH yield is based on up to 10 years of actual and/or assigned yields.

Unit — The insurable acreage used to determine the APH yield, the production guarantee, and any indemnity (loss payment).

Production Guarantee — Number of hundredweight (cwt.) guaranteed per unit. Multiply your APH yield per acre \times the coverage level percentage you select \times the number of acres in the unit.

Coverage Levels and Premium Subsidies

Potatoes may be insured at the coverage levels shown in the table below. Crop insurance premiums are subsidized as shown. For example if you select the 75-percent coverage level, your coverage will be 75 percent of your approved APH yield, the premium subsidy is 55 percent, and your premium share is 45 percent of the base premium. Catastrophic coverage (CAT) is available at 50 percent of your APH yield and 55 percent of the established price election. The total cost for CAT coverage will be an administrative fee of \$300 per crop per county, regardless of the acreage. Administrative fees, in addition to premium costs, for coverage levels above CAT are \$30 per crop per county.

| Item | Percent | | | | | |
|--------------------|---------|----|----|----|----|----|
| Coverage Level | 50 | 55 | 60 | 65 | 70 | 75 |
| Premium Subsidy | 67 | 64 | 64 | 59 | 59 | 55 |
| Your Premium Share | 33 | 36 | 36 | 41 | 41 | 45 |

Price Elections

Price of compensation per cwt. in case of loss:
Established price: \$7.65 per hundredweight (cwt.)

Insurance Units

Basic Unit: A basic unit includes all of your insurable potato acreage in the county by share arrangement. Premiums are reduced 10 percent for a basic unit.

Optional Unit: If a basic unit consists of two or more sections of land, and certain record keeping requirements are met, you may apply for optional units by section. The 10-percent premium discount will not apply.

Plans of Insurance

APH is the only plan of insurance available for potatoes. The production guarantee is based on your individual yield history.

Late and Prevented Planting

These provisions provide protection on acreage that is planted after the final planting date or that cannot be planted. Please consult a crop insurance agent for details.

Options

- Available under the Northern Potato Crop Provisions
- Not available under catastrophic coverage

Quality Endorsement: Provides supplemental coverage for potatoes in the event they grade less than U.S. No. 2.*

Certified Seed Endorsement: Provides supplemental coverage for potatoes in the event they do not pass certification.*

Storage Coverage Endorsement: Provides supplemental coverage for 60 days for potatoes in storage. Only production to count as determined under the terms of the northern potato crop provisions and storage coverage endorsement, if applicable, is used for APH.*

Processing Quality Endorsement: Provides supplemental coverage for potatoes that are rejected by the processor. The quality endorsement and a processor contract must be in effect before this endorsement can be purchased.*

*Additional premium is charged if this endorsement is selected.

Loss Example

A loss occurs when the hundredweight of potatoes produced for the unit falls below the production guarantee as a result of damage from a covered cause of loss. This example assumes a 400 cwt. per acre APH yield, 65-percent coverage level, 100 percent of the established price, irrigated practice and basic unit coverage.

$$\begin{array}{r}
 400 \text{ cwt. per acre APH yield} \\
 \times .65 \text{ coverage level} \\
 \hline
 260 \text{ cwt. guarantee*} \\
 - 100 \text{ cwt. per acre actually produced} \\
 \hline
 160 \text{ cwt. per acre loss} \\
 \times \$7.65 \text{ price election} \\
 \hline
 \$1224.00 \text{ gross indemnity*} \\
 - \$40.00 \text{ estimated premium per acre (varies)} \\
 \hline
 \textbf{\$1184.00 net indemnity*}
 \end{array}$$

* Figures shown on a per acre basis; guarantees and losses paid are on a unit basis. See policy provisions.
