The prices are based on the Commodity Exchange Price Provisions (CEPP) and are published in the actuarial documents. See the CEPP on the RMA website at www.rma.usda.gov/policies/cepp.html.

Unit Division

Basic Unit (BU) - A basic unit includes all of your insurable corn acreage in the county by share arrangement. Premium discounts apply.

Optional Unit (OU) - If a basic unit consists of land in two or more sections, and certain recordkeeping requirements are met, you may apply for optional units by section.

Enterprise Unit (EU) - Generally, all the insured crop acreage in a county. Premium discounts apply.

Whole Farm Unit (WU) - Generally, all the insured crops in the county that are covered by the insurance plan. Premium discounts apply.

Insurance Plans

Yield Protection - Protects against a production loss. The harvest price is not used.

Revenue Protection - Protects against loss of revenue due to a production loss, change in price, or a combination of both.

Revenue Protection with Harvest Price Exclusion - Protects against loss of revenue due to a production loss, price decline, or a combination of both.

Catastrophic Coverage (CAT) - Covers 50 percent of your APH yield and 55 percent of the projected price.

Endorsements and Options

Trend-Adjusted APH Yield Option - allows you to increase your APH yield based on the county's historical yield trend. This option is not available under CAT coverage or for specialty types.

Supplemental Coverage Option (SCO) - provides additional coverage for a portion of your underlying crop insurance policy deductible.

APH Yield Exclusion Option - allows you to exclude actual yields from your APH for select counties, and contiguous counties, in years that had an average county yield of at least 50 percent below the average county yield of the ten previous crop years. Available with CAT or buy-up policies.

Replant Provisions

You may receive a replant payment if:

- It is practical to replant;
- The appraisal does not exceed 90 percent of your guarantee; and
- You replant at least 20 acres or 20 percent of the unit.

It will be considered practical to replant within or prior to the late planting period unless the insurance company determines otherwise. Replant payments are not available on acreage initially planted before the earliest planting date or on CAT policies.

Late and Prevented Planting

Late Planting Period - If you plant after the final planting date, the insurance guarantee is reduced by one percent for each day after the final planting date. After 25 days, your prevented planting coverage will be 55 percent of your production guarantee for timely planted acreage. You may increase your prevented planting coverage for an additional premium to a level specified in the actuarial documents.

Prevented Planting - You may receive a prevented planting payment if you are unable to plant on or before the final planting date or within any applicable late planting period because of an insurable cause. Additional levels of prevented planting coverage are not available on CAT policies.
