

St. Paul Regional Office — St. Paul, MN

Revised February 2018

Sunflowers

Minnesota

Crop Insured

You can insure oil and confectionery sunflowers if:

- They are grown on insurable acreage;
- Premium rates are provided;
- You have a share; and
- They are planted for harvest as sunflower seed.

Earliest Planting	April 21, 2018
Final Planting	June 10, 2018
End of Late Planting Period	July 5, 2018
Acreage Reporting	July 15, 2018
Premium Billing	August 15, 2018
Production Reporting	April 29, 2019

Counties Available

See counties available in the actuarial documents at webapp.rma.usda.gov/apps/actuarialinformationbrowser2018/CropCriteria.aspx. The crop may be insurable in other counties by written agreement if specific criteria are met. Contact an insurance agent for more details.

Reporting Requirements

Acreage Report - You must report all of your sunflower acreage in the county by the acreage reporting date.

Causes of Loss

You are protected against the following:

- Adverse weather conditions such as hail, frost, freeze, wind, drought, and excess moisture;
- Failure of irrigation water supply, if caused by an insured cause of loss during the insurance period;
- Fire, if due to natural causes;
- Insects and plant disease, but not damage due to insufficient or improper application of pest or disease control measures; or
- Wildlife.

Coverage Levels and Premium Subsidies

Crop insurance premiums are subsidized as shown in the following table. For example if you select the 75-percent coverage level for an Enterprise Unit, the premium subsidy is 77 percent, and your premium share is 23 percent of the base premium.

Coverage Level (percent)		50	55	60	65	70	75	80	85
Subsidy Factor	Enterprise Unit	80	80	80	80	80	77	68	53
	Basic Unit	67	64	64	59	59	55	48	38
	Optional Unit	67	64	64	59	59	55	48	38
	Whole Farm Unit	80	80	80	80	80	80	71	56

Insurance Period

Insurance coverage begins on the later of:

- Date we accept your application; or
- Date when the sunflowers are planted.

Insurance coverage ends at the earliest of:

- Total destruction of the crop;
- Harvest of the unit;
- Final adjustment of a loss;
- Abandonment of the crop; or
- November 30, 2018.

Projected and Harvest Price

The prices are based on the Commodity Exchange Price Provisions (CEPP) and are published in the actuarial documents. See the CEPP on the RMA website at www.rma.usda.gov/policies/cepp.html.

Important Dates

Sales Closing/CancellationMarch 15, 2018

Unit Division

Basic Unit (BU) - A basic unit includes all of your insurable sunflower acreage in the county by share arrangement. Premium discounts apply.

Optional Unit (OU) - If a basic unit consists of land in two or more sections, and certain recordkeeping requirements are met, you may apply for optional units by section and by type.

This fact sheet gives only a general overview of the crop insurance program and is not a complete policy. For further information and an evaluation of your risk management needs, contact a crop insurance agent.

Enterprise Unit (EU) - All insurable acreage of the same insured crop or all insurable irrigated or non-irrigated acreage of the same insured crop in the county. Premium discounts apply.

Whole Farm Unit (WU) - Generally, all the insured crops in the county that are covered by the insurance plan. Premium discounts apply.

Insurance Plans

Yield Protection - Protects against a production loss. The harvest price is not used.

Revenue Protection - Protects against loss of revenue due to a production loss, change in price, or a combination of both.

Revenue Protection with Harvest Price Exclusion - Protects against loss of revenue due to a production loss, price decline, or a combination of both.

Catastrophic Coverage (CAT) - Covers 50 percent of your APH yield and 55 percent of the projected price.

Endorsements and Options

Trend-Adjusted APH Yield Option - Allows you to increase your APH yield based on the county's historical yield trend. This option is not available under CAT coverage or for specialty types. Available in select counties.

Supplemental Coverage Option (SCO) - Provides additional coverage for a portion of your underlying crop insurance policy deductible.

APH Yield Exclusion Option - Allows you to exclude actual yields from your APH for select counties, and contiguous counties, in years that had an average county yield of at least 50 percent below the average county yield of the ten previous crop years. Available with CAT or buy-up policies.

Yield Cup Option - Prevents your approved APH yield from decreasing by more than 10 percent from the prior year's approved APH yield. A cup will apply to an APH database when your approved APH yield, calculated using other yield measures, is less than 90 percent of the prior year's approved APH yield. It only applies to APH databases with at least one actual or assigned yield and is only available for carryover policies. Beginning with the 2018 crop year, this option is available for an additional premium and will automatically apply to your policy for the 2018 crop year, unless you cancel the option by the crop's cancellation date. This option is continuous and remains in effect unless cancelled. Not available with CAT policies.

Replant Provisions

You may receive a replanting payment if:

- It is practical to replant;
- The appraisal does not exceed 90 percent of your guarantee; and

- You replant at least 20 acres or 20 percent of the unit.

It will be considered practical to replant on or before the tenth day after the final planting date unless the insurance company determines otherwise. Replanting payments are not available on acreage initially planted before the earliest planting date or on CAT policies.

Late and Prevented Planting

Late Planting Period - Begins the day after the final planting date and ends 25 days after the final planting date. Your insurance guarantee will be reduced by one percent per day for each day planted after the final planting date. After 25 days, your prevented planting coverage will be 60 percent of your insurance guarantee for timely planted acreage. You may purchase additional prevented planting coverage.

Prevented Planting - You may receive a prevented planting payment if you are unable to plant on or before the final planting date or within any applicable late planting period because of an insurable cause. Additional prevented planting coverage is not available on CAT policies.

Loss Example

The examples assume a 1,400 pounds per acre APH yield, 70-percent coverage level, and basic unit coverage.

Yield Protection Example (Oil Type)

1,400	Pounds per acre APH yield
x 0.70	Coverage level
980	Pound guarantee
- 800	Actual pounds per acre produced
180	Pounds per acre loss
x \$0.182	Projected price (est.-announced in Mar.)
\$32.76	Indemnity

Revenue Protection Example (Oil Type)

980	Pounds (see yield example)
x \$0.182	Projected price (est.-announced in Mar.)
\$178.36	Guarantee
800	Actual pounds per acre produced
x \$0.179	Harvest price (est.-announced in Nov.)
\$143.20	Revenue
\$178.36	Guarantee
- \$143.20	Revenue
\$35.16	Indemnity

Figures shown on a per acre basis. Guarantees and losses paid are on a unit basis. Your premium will be deducted from any indemnity payment. See policy provisions.

Where to Buy Crop Insurance

All multi-peril crop insurance, including CAT policies, are available from private insurance agents. A list of crop insurance agents is available at all USDA service centers and on the RMA website at www.rma.usda.gov/tools/agent.html.
