Crop insurance premiums are subsidized as shown in the following table. For example, if you select the 75-percent coverage level, your premium share would be 45 percent of the base premium:

Optional Units: In addition to, or instead of, establishing optional units by section, section equivalent, and by irrigated and non-irrigated acreage as provided in the unit division provisions contained in the basic provisions, a separate optional unit may be established for each pea type listed in section 1 of the dry pea crop provisions. The 10-percent discount will not apply.
