Reporting Requirements

Coverage Levels and Premium Subsidies

Catastrophic Risk Protection (CAT) coverage is 50 percent of your average yield and 55 percent of the price election. The cost for CAT coverage is an administrative fee of \$300, regardless of the acreage. There is no additional premium for CAT. For insurance coverage above 50 percent (buy up), a \$30 administrative fee is charged per crop per county. Additional premium applies. Premium is discounted for all units except optional units.

Item	Percent					
Coverage Level	50	55	60	65	70	75
	Premium Subsidy					
Basic/Optional Unit	67	64	64	59	59	55
Enterprise Unit	80	80	80	80	80	77
Whole Farm Unit	80	80	80	80	80	80
Whole Farm Units are only available with revenue protection						

For example, at the 75-percent coverage level, an average yield of 40 bushels per acre would result in a guarantee of 30 bushels per acre and a producer paid premium of 33 percent of the base premium with an enterprise unit.

Price Elections

The price basis will be according to the Commodity Exchange Price Provisions (CEPP) and is published in the actuarial documents. The CEPP can be found

on the RMA public web site under the Common Crop Insurance Policy.
Contract pricing options are available for certified organic crops grown under guaranteed contracts.

Insurance Plans Available

Yield Protection - Provides protection against a production loss only. Guarantee is based on individual yield history multiplied by projected price.

Revenue Protection - Provides protection against loss of revenue due to a production loss, price decline or increase, or a combination. Guarantee is determined by multiplying the production guarantee by the greater of the projected price or harvest price.

Revenue Protection with Harvest Price

Exclusion - Provides protection against loss of revenue due to a production loss and/or price decline. Guarantee is determined by multiplying the production guarantee by projected price. A request to change insurance plans must be made to your agent no later than the sales closing date.

Additional Coverage Options

Actual Production History (APH) Yield

Exclusion - Allows eligible producers to exclude yields in exceptionally bad years from their production history to result in a higher approved yield. Only available in select counties.

Trend Adjusted Yield - Allows producers to increase their yield guarantee based on the county's historical yield trend. Only available in select counties for select types and practices.

Duties in the Event of Damage or Loss

You must perform the following duties in the event of damage or loss:

- Protect the crop from further damage by providing sufficient care;
- Notify your agent within 72 hours of your initial discovery of damage (but not later than 15 days after the end of the insurance period); and
- You cannot destroy or put the crop to another use without prior approval.

Loss Example

This example assumes an actual production history average yield of 40 bushels per acre, 75-percent coverage level, one basic unit, and 100 percent share in the crop.

	40	Bushels per acre APH yield
x	0.75	Coverage level
	30	Bushel per acre guarantee
-	15	Bushels per acre actual yield
	15	Bushels per acre loss

x	\$4.45	Projected price (estimated)
	\$66.75	Indemnity per acre

Revenue Protection Example:

	30	Bushel per acre guarantee
x	\$4.45	Projected price (estimated)
	\$133.50	Guarantee per acre
	15	Bushels per acre actual yield
x	\$4.05	Harvest price (estimated)
	\$60.75	Revenue to count per acre
