### Coverage Levels and Premium Subsidies

Catastrophic Risk Protection (CAT) coverage is 50 percent of your average yield and 55 percent of the price election. The cost for CAT coverage is an administrative fee of \$300, regardless of the acreage. There is no additional premium for CAT. For insurance coverage above 50 percent (buy up), a \$30 administrative fee is charged per crop per county. Additional premium applies. Premium is discounted for all units except optional units. Optional units are available by type.

| Item                | Percent         |    |    |    |    |    |    |    |
|---------------------|-----------------|----|----|----|----|----|----|----|
| Coverage Level      | 50              | 55 | 60 | 65 | 70 | 75 | 80 | 85 |
|                     | Premium Subsidy |    |    |    |    |    |    |    |
| Basic/Optional Unit | 67              | 64 | 64 | 59 | 59 | 55 | 48 | 38 |
| Enterprise Unit     | 80              | 80 | 80 | 80 | 80 | 77 | 68 | 53 |
| Whole Farm Unit     | 80              | 80 | 80 | 80 | 80 | 80 | 71 | 56 |

Whole Farm Units are only available with revenue protection

For example, at the 75-percent coverage level, an average yield of 1200 pounds per acre would result in a guarantee of 900 pounds per acre and a producer paid premium of 33 percent of the base premium with an enterprise unit.

## Price Elections

The price is based on the Commodity Exchange Price Provisions (CEPP) and is published in the actuarial documents. The CEPP is on RMA's website at [www.rma.usda.gov/policies/cepp.html](http://www.rma.usda.gov/policies/cepp.html). Organic production has a separate established price and contract pricing options are available for certified organic crops grown under guaranteed contracts.

## Duties in the Event of Damage or Loss

You must perform the following duties in the event of damage or loss:

- Protect the crop from further damage by providing sufficient care;
- Notify your crop insurance agent within 72 hours of your initial discovery of damage (but not later than 15 days after the end of the insurance period); and
- You cannot destroy or put the crop to another use without prior approval.

## Insurance Plans Available

**Yield Protection** - Provides protection against a production loss only. The guarantee is based on individual yield history multiplied by the projected price.

**Revenue Protection** - Provides protection against loss of revenue due to a production loss, price decline or increase, or a combination. The guarantee is determined by multiplying the production guarantee by the greater of the projected price or the harvest price.

**Revenue Protection with Harvest Price Exclusion** - Provides protection against loss of revenue due to a production loss and/or price decline. The guarantee is determined by multiplying the production guarantee by the projected price.

## Additional Coverage Options

### Actual Production History (APH) Yield Exclusion

- You may choose to improve your average APH yield by excluding an actual yield from your production history in eligible crop years. Eligible crop years are listed in the actuarial documents.

**Supplemental Coverage Option (SCO)** - Provides additional coverage (up to 86 percent) to your underlying policy. Any loss is determined by the area's overall performance for a given year. SCO is only available in select counties.

**Trend Adjusted Yield** - You can increase your yield guarantee based on the county's historical yield trend. Trend Adjusted Yield is only available in select

counties for select types and practices. Contact your crop insurance agent for more information.

## Rotation Requirements

Rotation requirements apply. See actuarial documents.
