

Billings Regional Office — Billings, MT

Revised January 2018

Grain Sorghum

North Dakota and South Dakota

Crop Insured

Grain Sorghum is insurable if:

- Premium rates are provided by the actuarial table; and
- It is grown on insurable acreage for harvest as grain.

Counties Available

North Dakota - Sargent County.

South Dakota - All counties except Harding, Lawrence, Lincoln, Marshall, Moody, Roberts, and Shannon.

Grain Sorghum in counties with no actuarial documents may be insurable by written agreement.

Causes of Loss

You are protected against the following:

- Adverse weather conditions;
- Change in harvest price from the projected price (Revenue Protection Plans only);
- Failure of irrigation water supply, if caused by an insured peril occurring during the insurance period;
- Fire;
- Insects and plant diseases, but not damage due to insufficient or improper application of pest or disease control measures; or
- Wildlife.

Insurance Period

Insurance coverage begins on the later of:

- The date your application is accepted; or
- The date the insured crop is planted.

Insurance coverage ends with the earliest occurrence of one of the following:

- Total destruction of the crop;
- December 10;
- Harvest;
- Abandonment of the crop; or
- Final adjustment of a loss.

Important Dates

Sales Closing	March 15, 2018
Earliest Planting	April 25, 2018
Final Planting	May 31, 2018
Acreage Reporting.....	July 15, 2018
Premium Billing	August 15, 2018
Production Reporting....	45 Days After Sales Closing

Reporting Requirements

Acreage Report - You must report all acreage of your grain sorghum in the county, both insured and uninsured, including share, type, practice, and land identifiers by the acreage reporting date.

Coverage Levels and Premium Subsidies

Catastrophic Risk Protection (CAT) coverage is 50 percent of your average yield and 55 percent of the price election. The cost for CAT coverage is an administrative fee of \$300, regardless of the acreage. There is no additional premium for CAT. For insurance coverage above 50 percent (buy up), a \$30 administrative fee is charged per crop per county. Additional premium applies. Premium is discounted for all units except optional units. For example, at the 75-percent coverage level, an average yield of 40 bushels per acre would result in a guarantee of 30 bushels per acre and a producer paid premium of 33 percent of the base premium with an enterprise unit.

Item	Percent					
	50	55	60	65	70	75
Coverage Level	50	55	60	65	70	75
	Premium Subsidy					
Basic/Optional Unit	67	64	64	59	59	55
Enterprise Unit	80	80	80	80	80	77
Whole Farm Unit	80	80	80	80	80	80

Whole Farm Units are only available with revenue protection

Price Elections

The price is based on the Commodity Exchange Price Provisions (CEPP) and is published in the

actuarial documents. The CEPP is on RMA's website web site under the Common Crop Insurance Policy. Certified organic production has a separate (higher) established projected and harvest price. Contract pricing options are available for certified organic crops grown under guaranteed contracts.

Insurance Plans Available

Yield Protection - Provides protection against a production loss only. The guarantee is based on individual yield history multiplied by the projected price.

Revenue Protection - Provides protection against loss of revenue due to a production loss, price decline or increase, or a combination. The guarantee is determined by multiplying the production guarantee by the greater of the projected price or harvest price.

Revenue Protection with Harvest Price Exclusion - Provides protection against loss of revenue due to a production loss and/or price decline. The guarantee is determined by multiplying the production guarantee by the projected price. A request to change insurance plans must be made to your crop insurance agent no later than the sales closing date.

Additional Coverage Options

Actual Production History (APH) Yield Exclusion - If eligible, you can exclude yields in exceptionally bad years from your production history, resulting in a higher approved yield. APH Yield Exclusion is only available in select counties.

Supplemental Coverage Option (SCO) - Provides additional coverage to your underlying policy. The losses are determined by overall area performance for a given year. SCO is only available in select counties.

Trend Adjusted Yield - You can increase your yield guarantee based on the county's historical yield trend. Trend Adjusted Yield is only available in select counties for select types and practices. Contact your crop insurance agent for more information.

Duties in the Event of Damage or Loss

You must perform the following duties in the event of damage or loss:

- Protect the crop from further damage by providing sufficient care;
- Notify your crop insurance agent within 72 hours of your initial discovery of damage (but not later than 15 days after the end of the insurance period); and
- You cannot destroy or put the crop to another use

without prior approval.

Loss Example

Assume an APH average yield of 40 bushels per acre, 75-percent coverage level, one basic unit, and 100-percent share in the crop.

Yield Protection Example:

	40	Bushels per acre APH yield
x	<u>0.75</u>	Coverage level
	30	Bushel per acre guarantee
-	<u>15</u>	Bushels per acre actual yield
	15	Bushels per acre loss
x	<u>\$4.45</u>	Projected price (estimated)
	\$66.75	Indemnity per acre

Revenue Protection Example:

	30	Bushel per acre guarantee
x	<u>\$4.45</u>	Projected price (estimated)
	\$133.50	Guarantee per acre
	15	Bushels per acre actual yield
x	<u>\$4.05</u>	Harvest price (estimated)
	\$60.75	Revenue to count per acre
	\$133.50	Guarantee per acre
-	<u>\$60.75</u>	Revenue to count per acre
	\$72.75	Indemnity per acre

Your premium will be deducted from an indemnity payment.

Where to Buy Crop Insurance

All multi-peril crop insurance, including CAT policies, are available from private crop insurance agents. A list of crop insurance agents is available at all USDA service centers and on the RMA website at www.rma.usda.gov/tools/agent.html.
