2006 COMMODITY INSURANCE FACT SHEET

Tobacco

Maryland

Crop Insured

The tobacco production guarantee policy covers Maryland-type tobacco (type 32) grown in Maryland.

Counties Available

Tobacco is insurable in Anne Arundel, Calvert, Charles, Prince George's, and St. Mary's counties. Tobacco may be insurable in other counties if specific criteria are met.

Causes of Loss

Adverse weather conditions¹
Fire
Insects²
Plant disease²
Wildlife
Failure of irrigation water supply³

¹Natural perils such as hail, excess precipitation, drought, wind, etc.
²If proper applications of disease or pest control measures are applied. ³If caused by an insurable peril during the insurance period

Insurance Period

Coverage begins at transplanting and ends at the earliest of: 1) total destruction of the crop, 2) weighing-in at point of delivery, 3) final adjustment of a claim, 4) removal of the tobacco from the field where grown (except for curing, grading, packing, or immediate delivery to a buying point), or 5) April 30, 2007.

Reporting Requirements

Acreage Report— An acreage report is due to your agent no later than July 15 for all your tobacco acreage in the county, by type.

Production Report— A production report for the previous crop year is due to your agent before April 30, 2006. A yield will be assigned if this information is not timely provided.

Important Dates

Sales Closing..... March 15, 2006
Final Planting Date..... June 25, 2006
Acreage Report Date..... July 15, 2006
End of Insurance..... May 15, 2007

Price Elections

TYPE	PRICE ELECTION
32 Maryland	\$1.45

Price elections are posted on the RMA website at: <http://www3.rma.usda.gov/apps/pricesinquiry/>

Coverage Levels and Premium Subsidies

Coverage level options range from 50 to 75 percent of your approved yield and subsidized as follows:

Coverage Level % →	50	55	60	65	70	75
Premium Subsidy %	67	64	64	59	59	55
Your Premium Share %	33	36	36	41	41	45

Catastrophic (CAT) coverage is fixed at 50 percent of your approved yield and 55 percent of the price election. CAT is 100-percent subsidized with no premium cost to you except for an administrative fee of \$100, regardless of the acreage.

Definitions

Approved Yield—The average yield per acre based upon your Actual Production History (APH) and used to determine your production guarantee.

Production Guarantee— Number of pounds guaranteed per acre determined by multiplying your approved yield times the coverage level percentage you select.

Duties in the Event of Damage or Loss

- If crop damage occurs, give notice within 72 hours of initial discovery of damage.
- Protect the crop from further damage if possible by providing sufficient care.
- If representative samples are required of any unharvested acreage, the strips must be at least 5 feet wide (at least two rows), extending the entire length of the field. Samples must not be harvested or destroyed until after a field inspection is made.

Insurance Units

Your insurable acreage is grouped into a unit based on your selection of one of the following unit arrangements.

Basic Units: A basic insurance unit includes all of your tobacco acreage, by type, in the county in which you have 100 percent share. For example, the tobacco acreage on your own farm (including any cash-rented land) would all be one basic unit. If you also grew tobacco on shares with another entity, that acreage would be a separate basic unit. Premiums are reduced 10 percent if you insure under basic units.

Optional Units: If a basic unit consists of two or more farm serial numbers (FSN) and certain record-keeping criteria are met, you may select optional units by FSN. The 10-percent basic unit premium discount will not apply.

Late Planting

For any insured acreage initially planted after the final planting date (FPD), the production guarantee will be reduced as follows:

1. One percent per day if planted during the 1st through the 10th day immediately following the FPD;
2. Two percent per day if planted during the 11th through the 15th day after the FPD.

The premium amount for late planted acreage will be the same as for timely planted acreage.

Prevented Planting

Prevented planting provisions do not apply.

Loss Example

This example is for Maryland type tobacco and assumes 60-percent coverage level, price election of \$1.68, approved yield of 1,500 pounds per acre, and basic units.

1,500	Producer's approved yield
<u>x .60</u>	Coverage level
900	Pounds per acre guarantee
<u>- 400</u>	Pounds per acre harvested
500	Pounds per acre loss
<u>x 1.68</u>	Price election
\$840	Indemnity per acre
<u>- 15</u>	Estimated premium per acre
\$825	Net indemnity per acre
