March 2010

2010 COMMODITY INSURANCE FACT SHEET

CORN CT, DE, ME, MD, MA, NH, NJ, NY, NC, PA, RI, VT, VA, WV

Crop Insured

Insurable corn includes field corn planted for harvest as grain or silage (if provided for on the county actuarial tables). Corn may be of yellow dent, white, mixed yellow and white, waxy, or high-lysine varieties. Excluded from coverage are any varieties of high-amylase, high-oil, high-protein, flint, flour, Indian, or blue corn. Corn varieties genetically adapted to provide forage for wildlife and openpollinated varieties are not insurable. Silage-only corn varieties cannot be insured for grain. Corn is insurable in virtually every county.

Causes of Loss

Adverse weather conditions¹ Fire Insects² Plant disease² Wildlife

¹Natural perils such as hail, frost, freeze, drought, and excess precipitation. ²But not damage due to insufficient or improper application of pest or disease control measures.

Insurance Period

Coverage begins when the crop is planted and ends at the earliest of: (1) total destruction of the crop, (2) harvest of the crop, (3) abandonment of the crop, (4) final adjustment of a claim, (5) December 10 (grain all States), (6) September 30 (silage—NC and VA), or (7) October 20 (silage—DE, MD, WV and States north thereof).

Important Dates

| Sales Closing—NC | February 28, 2010 |
|----------------------------------|-------------------|
| Sales Closing—Other ¹ | March 15, 2010 |

¹Other States (CT, DE, ME, MD, MA, NH, NJ, NY, PA, RI, VT, VA, WV).

Note: Final planting and acreage reporting dates vary by state and county. Consult a crop insurance agent for specific dates and other details.

Definitions

Production Guarantee— Number of bushels or tons guaranteed, determined by multiplying your average yield (based on your records) times the coverage level percentage you elect.

Price Election— The price used to calculate your premium or indemnity. Price elections are posted on the RMA Web site at: http://www3.rma.usda.gov/apps/pricesinguiry/

Price Elections

Grain \$3.55 per bushel Silage \$32.75 per ton

Coverage Levels and Premium Subsidies

Coverage level options range from 50 to 75 percent of your average yield (up to 85 percent in certain counties in DE, MD, NJ, NC, PA, and VA). An average corn yield of 100 bushels per acre, for example, results in a guarantee of 75 bushels per acre at the 75percent level.

Premiums are also subsidized as shown in the table below. At the 75-percent coverage level, your premium share would be 45 percent of the base premium:

| Item | Percent | | | | | |
|--------------------|---------|----|----|----|----|----|
| Coverage Level | 50 | 55 | 60 | 65 | 70 | 75 |
| Premium Subsidy | 67 | 64 | 64 | 59 | 59 | 55 |
| Your Premium Share | 33 | 36 | 36 | 41 | 41 | 45 |

Catastrophic (CAT) coverage is fixed at 50 percent of average yield and 55 percent of the price election. CAT is 100 percent subsidized with no premium cost to you except for an administrative fee of \$300, regardless of the acreage.

This fact sheet gives only a general overview of the crop insurance program and is not a complete policy. For further information and an evaluation of your risk management needs, contact a crop insurance agent.

Replant Provision

A replanting payment is allowed if your corn crop is damaged by a covered cause of loss to the extent that the remaining stand will not produce at least 90 percent of your bushel guarantee and it is practical to replant. The maximum replanting payment per acre will be price election multiplied by the lesser of:

- 20 percent of your production guarantee per acre, or
- 8 bushels (grain) or 1 ton (silage).

Note: Replanting payments are not available with CAT coverage.

Late and Prevented Planting

These provisions provide reduced protection on acreage that is planted late or that cannot be planted by the final planting date or within the late planting period. Consult a crop insurance agent for more details.

Insurance Units

Your insurable acreage will be grouped into one or more units in order to establish the approved yield, calculate a guarantee, and determine any indemnity.

Basic Unit: A basic unit includes all of your corn acreage in the county by share arrangement. Premiums are reduced by 10 percent for a basic unit.

Optional Units: If a basic unit consists of two or more farm serial numbers (FSN) and certain recordkeeping criteria are met, you may apply for optional units by FSN. The 10-percent discount will not apply.

Loss Example

This example is based on an APH yield of 100 bushels per acre, 65-percent coverage level, non-irrigated, and one basic unit.

- 100 Bushels per acre average yield (APH)
- <u>c.65</u> Coverage level percentage
- 65 Bushels per acre guarantee
- <u>– 15</u> Bushels per acre actually produced
- 50 Bushels per acre loss
- <u>x 3.55</u> Price election
- \$178 Indemnity per acre
- <u>– \$16</u> Estimated premium per acre (varies)
- \$162 Net indemnity per acre
