## Replanting Provisions

A replanting payment may be allowed only in counties with both fall and spring planting dates if:

- Fall-planted acreage is damaged by an insurable cause and less than 75 percent of a normal stand remains; (a minimum of 9 live plants per square foot will be considered to be a normal stand for loss adjustment purposes)
- It is practical to replant
- We give written consent to replant; and
- Such acreage is replanted the following spring by the spring final planting date.

Note: A replanting payment will not be made on acreage for which one replanting payment has already been allowed.

## Loss Example

This example is based on one basic unit of 50 acres of spring-seeded forage at 65-percent level of coverage with 10 acres fully established and 40 acres at 50-percent stand.

Protection in force:	\$9,450 <sup>1</sup>
Production-to-count:	\$1,890 <sup>2</sup>
Amount of loss:	\$7,560 <sup>3</sup>
Net indemnity to grower:	\$7,116 <sup>4</sup>

<sup>1</sup>50 acres x \$189 amount of insurance per acre.

<sup>2</sup>10 acres total established x \$189 coverage per acre.

<sup>3</sup>\$9,450 protection - \$1,890 production-to-count.

<sup>4</sup>\$7,560 - \$444 (estimated producer premium).
