2010 COMMODITY INSURANCE FACT SHEET

Soybeans—Indexed Income Protection Maryland

Crop Insured

Indexed Income Protection (IIP) coverage for soybeans is available in Maryland and provides coverage against production losses and price declines.

Counties Available

This plan of coverage is available in all Maryland counties where the actual production history (APH) plan of insurance for soybeans is offered.

Causes of Loss

- Adverse weather conditions¹
- Failure of irrigation water supply²
- Fire
- Harvest price less than projected price
- Insects³
- Plant disease³
- Wildlife

¹Natural perils including hail, frost, freeze, wind, drought, and excess moisture. ²If due to an insurable cause of loss. ³Does not include damage due to insufficient or improper usage of recommended control measures.

Insurance Period

Coverage usually begins when the crop is planted and ends at the earliest of: (1) total destruction of the crop, (2) harvest of the crop, (3) final adjustment of a claim, (4) abandonment of the crop, (5) December 10.

Indexing

The IIP plan compares and indexes an individual's yields to the county yields for a base period of up to ten years. Indexing may result in the insurance yield being greater or less than the producer's actual average yield.

Important Dates

Sales Closing	March 15, 2010
Final Planting Date ¹	June 20 or July 5, 2010
Acreage Report Date	July 15, 2010

¹ Consult a crop insurance agent for the specific date in your county.

Definitions

Enterprise Unit— All acreage of your crop within the county, regardless of share (no basic or optional units)

Projected Price—The price that determines the dollar guarantee is the average of the daily settlement prices for Chicago Board of Trade (CBOT) November soybean futures contracts during the month of February 2010.

Harvest Price— The price that determines revenue-to-count and indemnity is the average of the daily settlement prices for CBOT November corn futures contracts during the month of October 2010.

Year	Projected* Price	Harvest** Price
2010	NA	NA
2009	8.80	9.66
2008	13.36	9.22
2007	8.09	9.75
2006	6.18	5.93

* Published on or after March 1 of the crop year.
** Published on or after November 1 of the crop year.
NA-Not available at this time.

Price elections are posted on the RMA Web site at:
<http://www3.rma.usda.gov/apps/pricesinquiry/>

IIP Yield Determination Example—

County Average Yield	Individual Average Yield	Year
24	28	2005
20	16	2006
22	15	2007
24	27	2008
28	19	2009
118	105	Total
÷ 5	÷ 5	No. Years
24	21	Avg Yld

Soybeans

Yield Difference:

County Average Yield – Individual Average Yield

$$\text{Yield Difference} = 24 - 21 = 3$$

IIP Approved Yield:

Expected County Yield* – Yield Difference

$$\text{IIP Approved Yield} = 28 - 3 = 25$$

* The most recent year's county average yield from the actuarial table will always serve as the expected county yield. For example, in the sample table above, the county average yield of 28 for 2009 is used as the expected county yield.

Note: Observe that the IIP approved yield of 25 in this scenario exceeds the grower's original average yield of 21. This, however, may not always be the case. Depending upon the situation, the IIP yield could possibly be less than the producer's average yield. Obtain guarantee and premium quotes for all insurance plans (IIP, CRC, APH, GRP, GRIP) to determine which plan is most suitable for you.

Insurance Unit

Under the IIP plan, acreage may only be insured as an **enterprise unit**. An enterprise unit combines all your soybeans in the county into one county-wide unit, regardless of ownership, share, or rental arrangement.

Loss Example

This example assumes an IIP approved yield of 25 bushels per acre, a projected price of \$8.80, and a harvest price of \$9.66.

25	Bushels per acre IIP approved yield
x .60	Coverage level
15	Bushels per acre guarantee basis
x 8.80	Projected price/bushel
\$132	Dollar guarantee per acre
– \$97	Revenue-to-count (10 bushels per acre produced x \$9.22 harvest price)
\$35	Indemnity per acre
– \$7	Estimated producer premium per acre
\$28	Net indemnity per acre
