2010 COMMODITY INSURANCE FACT SHEET

Tobacco

West Virginia

Crop Insured

The tobacco policy covers Burley tobacco (Type 032) grown in West Virginia.

Counties Available

Cabell, Jackson, Lincoln, Mason, Monroe, Putnam, Wayne. Tobacco acreage may be insurable on other counties if specific criteria are met.

Causes of Loss

Adverse weather conditions¹
Failure of irrigation water supply²
Fire
Insects³
Plant disease³
Wildlife

¹Natural perils such as hail, excess precipitation, drought, wind, etc.
²If caused by an insurable peril during the insurance period.
³If proper applications of disease or pest control measures are applied.

Insurance Period

Coverage begins at transplanting and ends at the earlier of: 1) Total destruction of the tobacco on the unit, 2) Removal of the tobacco from the unit where grown, except for curing, grading, and packing, 3) Abandonment of the crop on the unit, 4) Final adjustment of the loss on the unit, 5) February 28, 2011.

Reporting Requirements

Acreage Report—An acreage report is due to your agent no later than July 15 for all your tobacco acreage in the county, by type.

Production Report—A production report for the previous crop year is due to your agent before April 30. A yield will be assigned if this information is not timely provided.

Important Dates

Sales Closing Date... March 15, 2010
Final Planting Date.. June 20, 2010
Acreage Report Date... July 15, 2010

Price Election

TYPE	PRICE ELECTION
Type 31 — Burley	\$1.75

Price elections are posted on the RMA Web site at:
<http://www3.rma.usda.gov/apps/pricesinquiry/>

Definitions

Approved APH Yield— The average yield per acre based upon your actual production history (APH) and used to determine your production guarantee.

Production Guarantee— Number of pounds guaranteed per acre determined by multiplying your approved yield time the coverage level percentage you select.

Coverage Levels and Premium Subsidies

Coverage level options range from 50 to 75 percent of your approved yield and are subsidized as follows:

Coverage Level % →	50	55	60	65	70	75
Premium Subsidy %	67	64	64	59	59	55
Your Premium Share %	33	36	36	41	41	45

Catastrophic (CAT) coverage is fixed at 50 percent of your approved yield and 55 percent of the price election. CAT is 100-percent subsidized with no premium cost to you except for a \$300 administrative fee, regardless of acreage.

Duties in the Event of Damage or Loss

- If crop damage occurs, give notice within 72 hours of initial discovery of damage.
- Protect the crop from further damage if possible by providing sufficient care.
- If representative samples are required of any unharvested acreage, the strips must be at least 5 feet wide (at least two rows), extending the entire length of the field. Samples must not be harvested or destroyed until after a field inspection is made.

Insurance Units

Basic Unit: A basic unit is all insurable acreage of an insurable type of tobacco in the county in which you have a share on the date of planting for the crop year and that is identified by a single FSA farm serial number at the time insurance first attaches under these provisions for the crop year.

Late Planting

For any insured acreage initially planted after the final planting date (FPD), the approved yield will be reduced as follows:

1. One percent per day for each acre or portion thereof planted during the 1st through the 10th day immediately following the FPD;
2. Two percent per day for each acre or portion thereof planted during the 11th through the 15th day after the FPD.

The premium per acre for late planted acreage will be the same as for timely planted acreage.

Prevented Planting

Your prevented planting coverage will be 35 percent of your production guarantee for timely planted acreage. Additional prevented planting coverage levels are not available for tobacco.

Loss Example

This example is for burley tobacco and assumes a 60-percent coverage level, an approved APH yield of 1300 pounds per acre, a price election of \$1.75, and one basic unit.

1,300	Producer's APH yield
x .60	Coverage level
780	Pounds per acre guarantee
x \$500	Pounds per acre harvested
280	Pounds per acre loss
- \$1.75	Price Election
\$490	Indemnity per acre
- 80	Estimated premium per acre
\$410	Net indemnity per acre

Note: For APH purposes, the production-to-count in pounds used to determine the value of production will be used to calculate the APH yield for the unit. If there is any quality adjustment (QA), the APH will be based on the pounds before applying any QA factor.
