Insurance Units

Basic Unit - All insurable acreage of an insurable type of tobacco in the county in which you have a share on the date of planting for the crop year and that is identified by a single farm serial number at the time insurance attaches under these provisions for the crop year. Premiums are reduced 10 percent for a basic unit.

Late Planting

For insured acreage initially planted after the final planting date, the production guarantee is reduced:

- One percent per day if planted day 1 through 10 after the final planting date; and
- Two percent per day if planted day 11 through 15 after the final planting date. The premium amount for late planted acreage is the same as for timely planted acreage.

Prevented Planting

Your prevented planting coverage is 35 percent of your production guarantee for timely planted acreage. Additional prevented planting coverage levels are not available for tobacco.

Loss Example

Assume Maryland tobacco with an APH yield of 1,440 pounds per acre, 60-percent coverage level, and one basic unit.

x 0.60	Coverage level
864	Acre guarantee
