

Raleigh Regional Office — Raleigh, NC

Revised January 2015

Green Peas

Maryland

Crop Insured

All shell type and pod type green peas are insurable if:

- A premium rate is provided by the actuarial document; and
- Grown under requirements of a processor contract executed by May 15 without exclusion from the contract at any time during the crop year.

Please refer to policy for exclusions at:

www.rma.usda.gov/policies/2015policy.html.

Counties Available

Green peas are insurable in Baltimore, Caroline, Carroll, Dorchester, Kent, Queen Anne's and Talbot counties. Green Peas may be insurable in other counties by written agreement if specific criteria are met. Contact an insurance agent for more details.

Causes of Loss

You are protected against the following:

- Adverse weather conditions, including natural perils such as hail, frost, freeze, wind, drought, and excess precipitation;
- Failure of irrigation water supply if caused by an insured peril during the insurance period;
- Fire if caused by an insured peril during the insurance period;
- Insect damage and plant disease except for insufficient or improper application of control measures; or
- Wildlife.

This policy does not cover any loss of production due to bypassed acreage because of the equipment or facility failure; or failure to follow requirements as specified in the processor contract.

Insurance Period

Coverage usually begins when the peas are planted and ends with the earliest occurrence of one of the following:

- Destruction of the crop;
- The date the green peas should have been harvested but were not;
- Abandonment of the crop;
- Completion of harvest;
- The date you harvest sufficient production to fulfill your contract if a specific amount is so stipulated;
- Final adjustment of a loss;
- September 15; or
- September 30 if you provided notice that crop will be harvested as dry peas.

Important Dates

Sales Closing Date February 15, 2015

Final Planting Dates

Baltimore and Carroll Counties May 10, 2015

Other Maryland Counties April 30, 2015

Acreage Report Date May 15, 2015

Premium Billing Date August 15, 2015

Reporting Requirements

Acreage Report - An acreage report is due to your agent by the date shown in the Special Provisions of Insurance under Important Dates. It must include all acreage (insurable and uninsurable) in which you have a share. You should provide a copy of all processor contracts to your agent along with your acreage report.

Duties in the Event of Damage or Loss

Notice of Loss - If a loss occurs you should:

- Protect the crop from further damage by providing sufficient care;
- Notify your crop insurance agent within 72 hours of initial discovery; and
- Leave representative samples intact for each field of the damaged unit.

Definitions

Bypassed Acreage - Land on which production is ready for harvest but the processor chooses not to accept such production so it is not harvested.

Green Peas - Shell type and pod type peas that are grown under a processor contract to be canned or frozen and sold for human consumption.

Nurse Crop (companion crop) - A crop planted into the same acreage as another crop, that is intended to be harvested separately, and is planted to improve growing conditions for the companion crop.

Price Election - The contracted price used to calculate your premium and indemnity.

Processor Contract - A written agreement between the producer and a processor, containing at a minimum:

- The producer's commitment to plant and grow green peas, and to deliver the green pea production to the processor;
- The processor's commitment to purchase all the production stated in the processor contract; and
- A base contract price.

Multiple contracts with the same processor that specify amounts of production will be considered as a single processor contract unless the contracts are for different types of green peas.

Loss Example

Assume green pea with an APH yield of 3,500 pounds per acre, 65-percent coverage level, contract price of 10 cents per pound, non-irrigated, 100-percent share, and a one-acre basic unit.

Item	Percent					
Coverage Level	50	55	60	65	70	75
Premium Subsidy	67	64	64	59	59	55
Your Premium Share	33	36	36	41	41	45

Catastrophic Risk Protection (CAT) coverage is fixed at 50 percent of your average yield and 55 percent of the price election. The cost for CAT coverage is an administrative fee of \$300.

Coverage Levels and Premium Subsidies

Coverage levels range from 50 to 75 percent of your average yield and are subsidized as shown below. For example, an average actual production history (APH)

yield of 3,500 pounds per acre results in a guarantee of 2,275 pounds per acre at the 65-percent coverage level.

3,500	APH Yield per acre
<u>x 0.65</u>	Coverage level
2,275	Acre guarantee
<u>- 575</u>	Production-to-Count
1,700	Loss per acre
<u>x \$0.10</u>	Price election
\$170	Indemnity per acre

Where to Buy Crop Insurance

All multi-peril crop insurance, including CAT policies, are available from private insurance agents. A list of crop insurance agents is available at all USDA service centers and on the RMA website at:

www3.rma.usda.gov/apps/agents/.
